## Summer School Session Is to Open June 27

The twenty-first session of the Summer Term of the University of Maine will take place next summer during the period from June 27 to August 5, 1921. The courses will be open to all students of the University and will embrace the study of English, French, Latin, History, Mathematics, Astronomy, Physics, Spanish, Economics and Sociology, Education and Chemistry. Other courses will be offered if there is sufficient demand for them. Music, psychology, German and other courses will be added if it is deemed advisable.

The faculty of instruction will be practically the same as that of the fall and spring terms. James Stacy Stevens, dean of the College of Arts and Sciences will act as Director of the Summer Term. The entire resources of the University will be at the disposal of the students and the University dormitories will be available for board and room accommodations.

The Summer Session of the University is essentially an institution for the benefit and advancement of teachers. At the end of a hard year's work in June, most teachers feel the need of change and recreation during the summer months. On the other hand, desire for promotion in their profession and the increasing and reasonable requirements of school systems and superintendents for frequent attendance at institutes of higher learning for the refreshing and increasing of the teachers' mental equipment urges them to extra effort in the vacation period.

The following school people will find work to suit their needs: (1) *Superintendents* and those preparing to be superintendents will find all the professional subjects which the State Department of Education requires in the examination of superintendents. Superintendents' Clubs will be organized for the purpose of discussion of practical problems. The up-to-date plans of educational organization and administration will be available. (2) *Secondary school teachers* or prospective secondary school teachers will find the courses to fit their needs in professional training and subject matter. High School teachers who desire to prepare themselves for better positions in more advanced work will find available work in the Summer Term. (3) *Normal school graduates* desiring to complete the college curriculum leading to the degree of Bachelor of Pedagogy may do a part of this work in the Summer Term.

(Continued on Page Four)

## President Aley Speaks On Appropriation Bill

President Aley spoke to a large number of students in chapel Monday of the final success of the campaign for an appropriation. In spite of the difficulty in placing before the Legislature the actual situation, there has been a reaction in favor of the University in the past three weeks; we have had more friends in and out of the Legislature this year than ever before.

Late Saturday night the Bill for Maine was passed in the final session over the veto of the Governor, with but two dissenting votes in each division. Although the University did not receive all it needs, this sum of \$753,000 for a thirty month period is the most generous we have ever had and with strict economy will be enough. The Committee on Appropriations showed its approval of Maine's action during the war by setting aside \$5,000 to apply on the debt of the institution incurred during the conflict.

We have won in this matter, and as victors can afford to be generous. Nothing can be gained by speaking against anyone who may have opposed us; we must remember that the governor who vetoed our bill is still our governor and is entitled to our respect, that he was acting as he thought best in accordance with his policy of economy. Let us try then to make such a reputation for our University that when there is question of another appropriation we shall have not even four dissenting votes.

## Course for Training of Teachers to be Made

The College of Arts and Sciences has arranged for the establishment of a course for the professional training of secondary school teachers, which will entitle those who complete the course to a Professional State Certificate for Secondary School Teachers. The course has been arranged in conference with the State Superintendent of Schools and has his endorsement.

In addition to fulfilling the general requirement leading to the degree of B. A., the student is expected to complete six hours in psychology in the sophomore year as a prerequisite to 12 hours work in education in junior and senior years, thirty hours in a major subject, and from ten to twenty hours in a minor subject. The prescribed work in education includes three hours in history of education, three hours in principles of secondary education, three hours in the technique of teaching, and three hours to be elected from following subjects: adolescence, pedagogy and psychology of high school subjects, and practice teaching.

Arrangements have been made in several of the departments whereby graduates of Maine and other institutions of equal grade may register for work in consecutive Summer Term, which will lead to M. A. degree. Four terms will normally be required to fulfill the requirements for the degree. A student who is able to take one semester of graduate study at the University may complete the work leading to master's degree in the Summer Term.

## Phi Kappa Phi Welcomes New Members in Meeting

Phi Kappa Phi welcomed its newly elected members at a social meeting held at the home of Dean and Mrs. Stevens. An excellent program of music was in charge of Prof. Adelbert Sprague. For the benefit of the new members Dean Stevens told the history of the society which was first started at the University of Maine as an honor society similar to Phi Beta Kappa which many other colleges had. It soon became a national society and now has twenty-four chapters with several more colleges wanting to be admitted. The initiation of the members elected this year will take place on Friday evening of Commencement Week.

## Track Club Is To Hold A Dance in the Gym

The Track Club will hold an informal dance in the gym, Friday evening, April 15. The custom of an annual Cabaret such as has been held for years past had to be abandoned in favor of an informal dance this year.

It was believed by those in charge that an informal dance where the admission was cut to 75¢ per couple would give many more a chance to contribute their bit toward athletics. Davis' Orchestra will furnish music for an order of sixteen dances at least and as many more as time will permit. The purpose of the dance is to gather funds toward upbuilding the athletics and especially the Track Team.

## Student Election of A. A. Officers Is Held

The results of the student election of A. A. officers are as follows: Football manager, Karl Rufus Oakes; Assistant Managers, Oscar Norrel and David Hoyt; basketball manager, John McCrystle; Assistant Managers, Merl Nyles and Howard Randlette. This election counts for two votes out of seven for the coveted positions. Of the remaining votes one is cast by the coach, one by the past captain, one by the outgoing and incoming manager, and one by the team. These votes will be cast in the near future.

Keep your seats, co-eds, the man who said we all ought to be shot meant only half what he said.

## Baseball Practice Now Progressing in Earnest

The baseball season was opened with the arrival of Coach Monte Cross who issued a call for candidates right after Easter vacation. Practice has now begun in real earnest on Alumni. The field is in good condition although the diamond will not be ready until the end of this week.

About 75 candidates have reported thus far and Coach Cross has plenty of good material to work with. It is hardly necessary to say anything about Monte Cross but for the benefit of the freshmen we might say that Monte is a veteran baseball man having played

MONTE CROSS, COACH

for several years with Connie Mack's famous Athletics and has been turning championship teams at the University of Maine for some time.

Coach Cross will have to work out a tough problem to get his pitching staff this year for only one veteran is left from last year. That is Jack Jowett. The new material looks good, however. Crab Newell has played on prep school teams and industrial teams in Maine and New Hampshire and has quite a reputation. Morse from the Huntington School looks good and was a mainstay at the Boston school last year. Jordan who was a star twirler at Westbrook High and who played there during the summer is showing up well. The most promising candidates are Newell, Morse, Jordan, Torsleff, Chalmers, Nichols, Colbath, Harmon and Schofield.

Candidates for backstop are Monroe, Ray Smith and Gordon.

Candidates for the infield and outfield are numerous. Among those out for first are Fat Lunge, Pop Phipps a promising freshman from Kent's Hill, Foster and Ricker. The keystone sack will be hotly contested for by Watson, a fast, snappy freshman who was a sensation at Kent's Hill last year in baseball and football, Sargent who played out in the field last year, and Cobb. Don Coady who covered the hot corner last year will have as contenders Stearns and Wells. Capt. Al. Johnson will probably play short although some of the candidates are going strong.

In the outfield there are a multitude of candidates among whom are H. P. Wood who played on the 1919 championship team, Brig Young who played a wonderful game his freshman year out in the center garden. H. J. Wood a freshman looks good and will probably land a berth. Wood played a fast game at second at Lewiston High and at Lewiston last summer.

There is no doubt that Coach Cross will have a team that will bid high for another championship this year.

The first game of the season is an exhibition game with Colby at Waterville on April 19. The annual trip out of the state will start April 25 when Maine plays Boston College at Boston, April 26 Tufts at Medford, Springfield College at Springfield on the 27, Rhode Island State on the 28. On the 30th of April the state series will start with the game with Bates on the homeward trip.

## Coburn Team Wins in Basketball Tournament

On Saturday morning, March 26, Coburn Classical Institute won the State Preparatory School championship by defeating the St. Mary's College 27 to 22. The game was fast and exciting throughout. Little St. Mary's team put up a hard fight but could not penetrate the stiff defense of the Coburn team. The game was a thriller from start to finish and the result of the game rather surprised local basketball fans as it was expected that the more experienced and seasoned players from Coburn would play the little St. Mary's team off its feet.

The first half ended with the Coburn team leading by a wide margin. The St. Mary's quintet, however, came back strong in the second half and after several long and difficult shots by Captain Sanfancion, the score was nearly tied. In the third quarter Coburn displayed another flash of speed and began to draw away from her opponents.

The game was clean and sportsmanlike throughout. Coach Frasier and his Coburnites displayed real sportsmanship after the game when they presented the large handsome trophy which they had won to the St. Mary's team, and they were contented in accepting the smaller trophy cup which was offered for second place.

Summary: Teams competing: Piscataquis County—Sangerville High School; Penobscot County—Dexter High School; Washington County—Jonesport High School; Knox County—Rockport High School; Hancock County—Northeast Harbor High School; Somerset County—Maine Central Institute; Franklin County—Wilton Academy; Kennebec County—Coburn Classical Institute; Arctostook County—St. Mary's College.

Results:  
March 24, Rockport H. S. 27, M. C. I. 23; March 24, Wilton Academy 33, N. E. Harbor H. S. 19; March 24, St. Mary's College 49, Sangerville H. S. 19; March 24, Jonesport H. S. 31, Dexter H. S. 22; March 25, St. Mary's College 23, Jonesport H. S. 19; March 25, Wilton Academy 64, Rockport H. S. 12; March 25, St. Mary's College 30, Wilton Academy 29; March 26, Coburn Classical Institute 27, St. Mary's College 22.

Standing of the first four teams after the others were eliminated:

|                    | Won | Lost | %    |
|--------------------|-----|------|------|
| Coburn Classical   | 1   | 0    | 1000 |
| St. Mary's College | 3   | 1    | 750  |
| Wilton Academy     | 2   | 1    | 667  |
| Jonesport H. S.    | 1   | 1    | 500  |

This was an elimination tournament and Coburn Classical Institute was conceded the first place cup by the other contesting teams, previous to the start of the tournament, but was challenged by St. Mary's College, second place winner, to play for the cup. Coburn won this game but gave the championship cup to St. Mary's and accepted the second place cup for her team, believing that St. Mary's deserved first place cup after playing four previous games.

## Freshman Hop to Take Place on Next Monday

One of the biggest events in the short history of the class of 1924 will be the long looked for Freshman Hop which will take place at the gym on Monday, April 18 the night before Patriot's Day.

Chairman Jack Dempsey and his hustling committee are working hard on plans which will make the Hop a wonderful success in every way. The freshman class is pulling together to make the ball a criterion of the spirit and progressiveness of the class.

The famous Six Syncopaters have been selected to furnish their syncopated melodies and the lovers of good dance music will certainly have a chance to enjoy themselves at this year's Freshman Hop.

The dance committee consists of Phillip Dempsey, Chairman, Phillip Oak, Charles Beckett, James Rice and J. Wesley Ames.

## Appropriation Bill Marks Success of Our Supporters

All the efforts of the friends and supporters of the University of Maine in behalf of the appropriations for the maintenance of the University in the recent legislative campaign were crowned with success Saturday night, when, with but a few hours remaining before the adjournment of the 1921 session of the State Legislature, both the Senate and the House of Representatives passed the University of Maine Resolve by overwhelming majorities over the veto of Governor Baxter. The vote in the House was 119 to 2, while in the Senate it was 23 to 2. The only representatives to support the veto of the Governor were Dodge of Portland and Wentworth of Berwick, while those in the Senate voting to sustain the veto were Senators Baxter of Sagadahoc and Morrill of Cumberland.

The resolve was returned to the Legislature early Saturday afternoon with the accompanying veto message from the Governor, giving full reasons for withholding his approval. It was first brought up in the House early in the evening, when the veto message was read before the body in session. Dodge of Portland was the only representative who spoke in favor of sustaining the veto, while Houghton of Fort Fairfield, Perkins of Orono, Buzzell of Belfast, McIlherson of Lewiston, Barwise of Bangor, and Rounds of Portland and supported the resolve and urged its passage over the Governor's veto.

It was after 9 o'clock in the evening when the Governor's veto message on the resolve made its appearance in the Senate. As soon as the reading of the message was completed, about 75 members of the House, which had recessed to await the action of the Senate on the veto message, entered the Senate chamber and burst forth into song, Vetoed, Vetoed, Oh, What Will He Veto Today? As soon as the uproar had

(Continued on Page Two)

## Egyptian Princess To Be Presented in Bangor

The Egyptian Princess will be presented in Bangor on Wednesday evening, April 13. A regular old time Maine Night is to be held in the Opera House and all the students are expected to attend. The alumni are coming back, the band is going to play and a cheer leader is going to head the student body. There has not been a real Maine Night in Bangor for several years. A union of Maine Night and a production of the best operetta ever put on by a Maine Glee Club certainly ought to be a great success.

For this Bangor production of The Egyptian Princess, the stage effects and the gowns have been made more elaborate and a slight change has been made in the cast. Miss Anna Daley will take the part of the leading dancing girl. A new song, which could not be used before as the words were not suited to the part of the slave girl, is to be sung at the Bangor performance. The words have been rewritten by Miss Mildred Close and the song is to be sung by Miss Lorette Cloutier who plays the role of the little slave girl.

Tickets will be sold on the campus before they are offered for sale in Bangor. This will insure the best seats for the students who will be together in order to swell the cheers for old Maine and shake the Opera House with the echoes of the Stein Song.

## Rifle Club Dance Was Very Successful Affair

The Rifle Club held a dance in the gymnasium on Friday evening, April 8. The gym was appropriately decorated with targets and blankets. The Melody Makers played for dancing until twelve o'clock. Punch was served throughout the dance and ice cream was sold during intermission. About 75 couples attended and the dance proved to be a great success.

## Editorial

The College of Technology comprises the curricula in Chemical, Civil, Electrical, and Mechanical Engineering, and Chemistry. The Morrill Act, by which the Land Grant Institutions were created, specified, among other things, that the mechanic arts should be taught. The original name of the institution was the State College of Agriculture and Mechanic Arts. In 1897 the name was changed to the University of Maine. Civil Engineering was taught with the opening of the institution. Mechanical Engineering was added in 1873; Chemistry in 1874; Electrical Engineering in 1894; and Chemical Engineering in 1905. A Mining Engineering curriculum was contemplated and catalogued for a few years, in order to receive the benefits of a bill which was then before Congress, should it finally become a law. It, however, failed, and the curriculum in Mining Engineering disappeared.

At the time of the organization of the institution, Engineering as a profession was comparatively young, and was struggling for recognition. In its transition from a trade to a profession the curriculum offered in most institutions was a narrow one and principally along mathematical lines. With the development of modern education, great changes have taken place, so that today an engineering curriculum, although dealing largely with applied science, is expected to contain a considerable proportion of History, Economics, and English, together with a further opportunity to elect other subjects which tend towards a liberal education.

The rapid advance in science has given new and broader opportunities for the engineer. Electrical engineering and Mechanical Engineering were unknown until within a comparatively few years. Civil Engineering has now many branches, such as Hydraulic, Sanitary, Municipal, Highway, Railroad, and Structural Engineering. Electrical Engineering may be divided into Telephone, Railway, and Illuminating Engineering, in addition to Transmission and Power Plants, and Wireless Telegraphy. Mechanical Engineering includes Marine, Gas, Power, and Steam Engineering, as well as Heating and Ventilation. Our institution was the pioneer in offering a course in Pulp and Paper, and at the present time is one of a very few institutions offering work along that line.

Dean Boardman of the College of Technology in a recent interview said, "The opportunities for the engineer have never been so great as during the past few years. The World War showed the power of the engineer, and the demand for his services is being felt more and more. Of course the demand is influenced by industrial conditions, but experience has shown that hard times are followed by a period of prosperity, during which time much new construction work of all kinds is

performed, which demands the constant services of engineers of all types.

This is an age of development, where efficiency and service go hand in hand. Engineering educators are alive to the fact that efficient service can not be rendered by a man who has had a narrow education. The trend of the times is, therefore, to give the young engineer a training in college which will not only fit him to deal with applied science, but will also give him a clearer perception of the finer qualities of life. Thus the so-called engineer of early days, who really was an expert in a trade, is becoming educated in a profession, which, even if he fails to follow it after graduation, will be of service to him, no matter into what walk of life he finally goes."

## Appropriation Bill Marks Success of Our Supporters

(Continued from Page One)

subsidized, a debate ensued in which only those who favored the passage of the measure over the Governor's veto were heard. After Senators Gillin, Folsom, Thombs, and Sprague in turn addressed the Senate in support of the resolve, the vote was taken and the passage of measure ensued.

The Resolve as it was passed by the Legislature Saturday provides for an appropriation of \$620,000 for the period of 30 months. This represents a total increase of \$195,000 for a 30 month period or an annual increase of \$78,000 over the annual appropriations for each year 1919 and 1920, which was \$170,000. Although the appropriation does not provide for certain new equipment for the library and the laboratories asked for by the authorities, the measure is a decided victory for the University. It is estimated that the sum will cover the expenditures required to properly maintain the University for the next 12 months. In this sum is included an annual increase in salaries to instructors of \$78,120 over the previous year, affords a 47% increase over present expenditures. The salaries of officers are increased annually by \$6,408; those of clerks and stenographers by \$6,408. The item providing for the maintenance of buildings is increased by \$6,400 or an increase of 34%, while the provision for administration expenses is increased \$7,221, or 28%. Maintenance of property is increased \$18,997 or 121% and the item Power, Heat and Light is increased \$17,892 or 29%. As an offset against these increases which total \$134,644, there are decreases which total \$21,573, making a net increase of \$116,071, or 27%, over the year 1920 and a net increase of \$168,000 or 45% over 1919.

In his veto message, the Chief Executive stated that he would have approved a bill granting \$550,000 for the fiscal period of two and one-half years, adding that the annual sum of \$220,000 together with estimated annual income of the University of \$397,515 would be ample for its yearly maintenance. The

Governor's plan would, however, necessitate a considerable increase in tuition fees and would not provide for the settlement of certain debts amounting to \$216,000, incurred by the University during the past three years. This deficit, the Governor stated in his message should be borne by the alumni.

The passage of the Resolve over the veto of the Governor with only two dissenting votes in each house, is a decisive indication of the fact that the State of Maine possesses faith and pride in its University, and will support it to the utmost while it is progressing steadily to the stage where it will be unsurpassed by any other state institution of higher education in the country.

## Prism Is Delayed by Unsettled Conditions

Junior Week is fast coming along, but the Junior Prism is not coming along at a correspondingly fast pace. The board met and overcome many difficulties which are usually attendant upon the publication of the Prism and just as things began to look bright a thundercloud burst in its midst. Due to the doubtful outlook for the University appropriation and the corresponding shortage of funds, the necessary credit to the Prism could not be advanced by the treasurer's office. But last week's passage of our appropriation measure by the state legislature has put this final difficulty out of the way and, after a three weeks delay, Editor Carey and his staff of associates are working night and day in an attempt to make up for lost time. Mr. Haswell and Mr. Libby of the printing plant are equally enthusiastic, and through their efforts it is just possible that the Prism will be completed and ready for publication by the usual time, Junior Week.

This year's Prism is to be larger and more interesting than any number which has preceded it for years. For the first time it is to be bound in a leather cover of exceptional beauty. The art work is of a nature which is unsurpassed and among other features, are several colored cuts of rare beauty. The issue is to be dedicated to Professor William Sweetser.

Contributions for the Grind section and in fact any contributions except pictures, are to be held open for one more week. This is the very last opportunity which is to be offered contributors.

The Juniors can not be too grateful to Editor Carey and the other members of the board for the hard work which they are now doing to have the publication ready by Junior Week. They are putting their very best efforts into the task and it is safe to predict the best issue ever.

The board consists of:  
Editor-in-Chief: Carey  
Art Editor: Bernice Smith  
Grind Editor: Kennison  
Business Manager: R. W. Graffam  
Associate Editors: Ivan Craig, S. Hanson, H. Fifield, Stanton Glover, Arnold Tyler, F. Marston, F. Blake and Ina Gillespie.

## Much Interest Shown in the Senior Election

Much interest was shown in the senior election which was held Tuesday of the past week. The voting in each case brings close and the parts were awarded as follows:

Valedictorian, Albert J. Bedard; Orator, Philip J. Leary; Marshall, Carroll C. Swift; Historian, William L. Blake; Chaplain, Robert R. Owen; Prophets, Robert D. Milton, Emily A. Critter; Address to Undergraduates, Frederick E. Baldwin; Presentation of Gifts, Ralph A. Ranger, Ida Anderson; Curator, Carl A. Legrow; Cane Committee, William B. Cobb, William D. Murray, Wesley Plummer; Class Day Committee, Simon C. Frazer, Reginald M. Jocelyn, Norman F. Tozier, Pauline E. Miller, Ruth M. Small; Commencement Ball Committee, Francis Foley, George S. Ginsberg, Donald G. Lambert, Dorothy E. Hart, Helen P. Reed; Class Poet Florence Salley.

## Dr. Crothers Appears Before the Arts Club

Dr. Samuel McChord Crothers, pastor of the Unitarian Church in Cambridge, Mass. and one of our leading essayists read a chapter from his book "Dame School of Experience" before the Arts Club at the home of President Aley on Saturday evening.

## Commencement Week Program Is Arranged

The following program has been arranged for Commencement Week:

Friday, June 3  
9:00 A.M. Annual Meeting of the Board of Trustees  
9:30 A.M. Meeting of the Alumni Advisory Council, Library  
3:00 P.M. Baseball, Maine vs. Tufts, Alumni Field  
5:00 P.M. Phi Kappa Phi Initiation, Hannibal Hamlin Hall  
6:00 P.M. Phi Kappa Phi Banquet, Club Room, Hannibal Hamlin Hall  
8:00 P.M. President's Reception, Library  
Saturday, June 4, Alumni Day  
9:30 A.M. Class Day Exercises, Oval in front of Alumni  
10:00 A.M. Annual Business Meeting of the General Alumni Association, Chapel.  
1:00 P.M. Class Luncheon, The Commons.  
2:30 P.M. Formation Alumni Day Parade, front of Alumni  
3:00-4:00 P.M. Class frolics, Athletic Field  
4:00 P.M. Baseball, Maine vs. Colby, Alumni Field  
6:00 P.M. Alumni Banquet, gymnasium  
9:00 P.M. University of Maine movies, Chapel, Alumni Hall  
9:30 P.M. Informal Hop, Gymnasium Sunday, June 5  
10:30 A.M. Baccalaureate Address by Dr. Warren J. Moulton of Bangor Theological Seminary  
Monday, June 6, Commencement Day  
9:30 A.M. Commencement Exercises, Speaker to be announced  
Conferring of Degrees  
8:00 P.M. Commencement Ball, Gymnasium

## Kappa Sigma Holds a Party on Friday Evening

The Kappa Sigma fraternity had an enjoyable little masquerade party Friday evening. The house was decorated in Japanese fashion. Inside were many strings of electric lights of which some were colored and from others were suspended Japanese lanterns. Outside were strings of red, green and white lights, the fraternity colors, and a big center light, made to resemble the pin.

The dancing for the evening was started by having a Grand March. Then there were five dances for which the partners were chosen haphazardly or lassoed by throwing serpentine to them. After the fifth dance everybody unmasked. Respects were then paid to Dr. and Mrs. Aley and the matrons who had been invited in for a short time to watch the fun.

After a few more dances intermission was held. Salad, ice cream, cake, and coffee were served at this time. Also, for a little remembrance of the occasion, the guests were given a little jewel case on which was the Kappa Sigma coat-of-arms.

After intermission dances were exchanged in the usual way except for a Candle Dance which was the ladies' choice and a Lollipop Dance, the men's choice. Dancing lasted until one o'clock at which time the party broke up and the guests were escorted to their various homes.

## Pi Beta Phi Fraternity Has Initiation Banquet

The Pi Beta Phi fraternity held its annual banquet for the initiates in the English room of the Bangor House on Saturday, April 8.

The table was decorated with wine carnations and candles of the same shade.

Bernice Nicoll acted as toastmistress and many clever speeches were given.

The initiates were: Louise Thompson, Alta Jones, Mary Friend, Una Greenlaw, Dora Ramsdell, Cora Meservey, Christine Peterson, Frances Dunning.

## Prof. Toelle Addresses Rotary Club of Bangor

On March 22, Prof. J. H. Toelle addressed the Rotary Club of Bangor at the Bangor House on "The President's Cabinet." Prof. Toelle also addressed the Athene Club at the Bangor Library March 11 on "Current Political Problems."

That many dropped in to take the arrangements but just as many casually dropped out again?

That "Brownie" has accepted the position of coach for the Mt. Vernon baseball team?

That a chap who has an auto (on the Campus) is excused from shaving?

That "Gus" has at last bequeathed his "galoshes" to the tender mercies of the moth-balls?

That if one judges by looks some girls must hang up their clothes like firemen and simple rush under 'em and let 'em drop when the eight o'clock bell rings.

That Lieutenant McKay has a withered leg?

That the Stillwater Dancing Pavilion has been closed because of overcrowding etc.?

That Bernard actually found a cuckoo in his Calculus?

That Clean-up Day for everybody on the Campus wouldn't be amiss—papers, leaves, butts, and (sh—sh—sh—hands and faces)?

That Ivan is nearly ready to call out the candidates for the croquet tournament?

That new fence around the Athletic Field?

That one needs a stabilizer to navigate the crests and troughs of our concrete walks?

That Monty Cross brought all his baseball dope for a championship team but he forgot the spring weather?

That all rumors to the contrary, Maine is going to win the track meet at Bowdoin?

## NOTICES

April 14—Meeting of Economics Club at 4:00.

April 14—Joint Heck and Home Economics Clubs will meet in Winslow Hall at 7:00. The main feature of the meeting will be a debate.

April 15—Student chapel at 11:30.

Presentation of Intramural Cups.

April 18—Freshman Hop

April 30—Track and Field meet for Physical Training classes.

May 21—Track Club Cabaret Dance.

There will be a student chapel on Friday, April 15 at 11:30.

The band and cheer leaders will be there to put the old time spirit into the crowd. Monte Cross will speak and will be backed by several other good speakers. The Intramural Cups will be presented.

There are more than 4000 vacancies in the commissioned personnel in the Army. When the promotions under the reorganization law are completed, about 1200 of these vacancies being in the grade of first lieutenant, the remainder being in the grade of second lieutenant. While it is not proposed to fill all vacancies at present the necessity for more officers for the Army requires that a portion of the vacancies be filled without delay. An examination for appointment will, therefore, be held April 25, 1921. This examination will be competitive for 2585 vacancies.

Miss A. Genevieve Violette '22 of Milford was chosen at the annual town meeting, a member of the school board of that town to serve for three years.

**LAW**

THE BOSTON UNIVERSITY LAW SCHOOL

Trains students in the principles of the law and in the technique of the profession so as to best prepare them for active practice wherever the English system of law prevails.

America's new place in international politics and commerce challenges the young American.

He must equip himself for new world conditions with a knowledge of legal fundamentals.

LAW—Its principles and application to all business is almost as necessary to the coming business man as it is indispensable to the lawyer.

Special scholarships (\$75 per year) are awarded to college graduates.

Course for LL.B. requires 3 school years. Those who have received this degree from this or any other approved school of law may receive LL.M. on the completion of one year's resident attendance under the direction of Dr. Melville M. Bigelow. Several \$25 and \$50 scholarships open in this course.

Prof: You're not much of a militarist.  
Student: Why not, sir?  
Prof: Every time I call on you, you're unprepared.

Starlight, starbright,  
First star I've seen tonight  
I wish that May would say I might—  
But shucks! she won't and so there's no use calling her up.

## Who Was Moseley?

**H**E was a young Oxford man, only twenty-seven when he was killed at Gallipoli. Up to his time, man had never seen the inside of an atom. He turned the X-rays on matter—not figuratively but literally—and made them disclose the skeleton of an atom just as certainly as a surgeon makes them reveal the positions of the bones of the body. Moseley proved that all atoms are built up of the same kind of matter. He saw, too, just why an atom of copper is different from an atom of gold.

Atoms are built up of electrons. Each atom consists of a nucleus, a kind of sun, with a certain number of electrons grouped about it, like planets. Moseley actually counted the number of electrons of all the metals from aluminum to gold.

When you discover what gold is made of or a new fact about electricity, you open up new possibilities for the use of gold or electricity. For that reason the Research Laboratories of the General Electric Company are as much concerned with the "how" of things—atoms and electrons, for instance—as they are with mere applications of the electric current.

Hence Moseley's work has been continued in the Research Laboratories, with the result that more has been learned about matter. How does water freeze? What is lead? Why are lead, iron, gold and tungsten malleable? Such questions can be answered more definitely now than ten years ago. And because they can be answered it is possible to make more rapid progress in illumination, in X-ray photography, in wireless telegraphy, and in electrical engineering as a whole.

There would have been no coal-tar industry without the vast amount of research conducted in organic chemistry, and no electro-chemical industry without such work as Sir Humphrey Davey's purely scientific study of an electric current's effect on caustic potash and caustic soda. Sooner or later research in pure science always enriches the world with discoveries that can be practically applied. For these reasons the Research Laboratories of the General Electric Company devote so much time to the study of purely scientific problems.

YOU HAVE WRITTEN  
POEMS!

Do you care to have them revised or constructively criticised by successful authors? If you do, then send us your manuscript (stories, articles or poems). We will criticise, and place them should they prove to be acceptable for publication.

There is no actual charge for our services. If, however, you have not previously enrolled with the advisory department of this association, we request that you enclose the initial fee of two dollars, which we must ask of each new contributor. There is no additional expense, no future obligation.

It must be realized that we can only be of aid to those of serious intent. If you do mean to strive for literary success, we can help you in many ways. Our services are yours until we have actually succeeded in marketing at least one of your manuscripts. Send something to-day!

Please enclose return postage with your communications.

Summer School Session Is to Open  
on June 27

(Continued from Page One)

Graduates of Maine normal schools who are graduates of an accredited high school may earn the degree of Bachelor of Pedagogy by completing two years' college work. This is a recent regulation of the university. A number of normal school graduates are taking advantage of it.

The College of Arts and Sciences at the University of Maine has arranged for the establishment of a course for the professional training of secondary school teachers, which will entitle those who complete it to a Professional State Certificate for Secondary School teachers. The course has been arranged in conference with the State Superintendent of Public Schools and has his endorsement.

In addition to fulfilling the general requirements leading to the degree of

Bachelor of Arts, the student is expected to complete six hours in psychology in the sophomore year as a prerequisite to twelve hours work in education in the junior and senior years, thirty hours in a major subject, and from ten to twenty hours in a minor subject. The prescribed work in education includes three hours in the history of education, three hours in the principles of secondary education, three hours in the technique of teaching, and three hours to be elected from the three following subjects: adolescence, pedagogy and psychology of high school subjects, and practice teaching.

Students of the university and other institutions who, for various reasons, are in arrears in their work, or who may wish to gain additional credits in their course, find the Summer Term profitable. For such students the opportunity is offered to register for elective subjects which they would regularly take in their college curricula.

Arrangements have been made in several of the departments whereby graduates of the University of Maine and other institutions of equal grade may register for work in consecutive Summer Terms which will lead to the degree of Master of Arts. Four terms will normally be required to fulfill the requirements for the degree. A student who is able to spend one semester in graduate study at the university may complete the work leading to the master's degree in two Summer Terms.

Courses are arranged to give university credit to students who desire it. As a rule, a course which meets daily during the summer term is counted as equivalent to a course which meets twice a week for one semester. Courses which are scheduled for less than five times a week during the Summer Term will be estimated up on the proper time basis. So far as possible the courses are given numbers which correspond with those in the university catalog, with the letter *s* added.

Tuition charges for the term of six weeks, covering all charge for instruction up to fifteen hours a week, use of library and laboratories, except a small additional fee covering the cost of materials used in the laboratories will be \$20.00 for residents of Maine, and \$25 for residents of other states. An additional charge of \$1.00 will be made for registration in excess of fifteen hours a week.

## REGULATIONS

The Summer Term is organized under a distinct faculty composed of the members of the university faculty engaged in teaching in the Summer Term, and such other instructors as may be employed for the purpose. The Dean of the College of Arts and Sciences is the administrative officer.

Courses meeting five hours a week for new work give credit of two semester hours. Courses which are taken as review courses may be credited for their original semester value.

Courses offered primarily for graduate credit may be organized to count for three semester hours credit.

The maximum registration allowed without special permission is fifteen hours a week, equivalent to three new courses for which credit for two semester hours each is allowed, or two new courses, for which credit of three semester hours each is allowed.

All cases of over-registration will be passed upon by a special committee appointed for this purpose.

Final examinations will be scheduled in two-hour periods beginning Thursday at 2 P. M., and ending Friday noon.

Recitations begin at 7.30 and close at 12.00. Each period will be 50 minutes and there will be 20 minutes allowed for chapel services.

Students who have had three or more absences from a subject which come five times a week, or like proportion of absences in subjects which are scheduled for a less number of hours a week, must present excuses for all their absences to the committee on attendance before 4 P. M. of the last Wednesday of the term. If desired, they may appear personally before the committee and present their excuses.

For the entertainment of Summer Term students and their friends, the gymnasium will be open one evening of each week, where music will be furnished for dancing or other informal social intercourse. The social life of the Summer Term and athletic and other activities will be in the hands of the following committees:

Chapel: Stevens, Ellis Fuller; Social: Kuony, Thompson, Buzzell, Whitmore; Athletics: Fitch, Brann, Waldbauer; Registration: Chase, Ashworth, Brautlecht; Attendance: Willard, Peterson, Tripp.
