

Maine Masque Play Has Successful Trip

"A Couple of Million" the Farce Comedy Presented By The Maine Masque Meets Enthusiastic Reception on Annual Trip.

The Maine Masque, presenting the farce comedy "A Couple of Million," journeyed on its fourteenth annual season's trip last week. The Masque played in Togus, Freeport, Millinocket, Greenville, Old Town, Bangor and twice in Augusta, at the Augusta State Hospital on April 19 and at the City Hall April 22.

From the State Hospital where the Masque played on Wednesday night, it journeyed to Togus. Here professional equipment, such as scenery and properties and lighting effects were obtainable which helped to make the entertainment even more "finished" than it had been at the Hospital. From Togus the cast traveled to Freeport where the play was presented in the Nordica theater under rather cramped conditions but judging from the laughter and applause, the farce was also a decided success at that place. A dialogue not in the lines was staged here between "Genevieve" and "Stubby" which "brought down the house." From Freeport, where the cast gave its presentation on Friday night, it journeyed back to Augusta, where, on Saturday night, the farce comedy was again given in the City Hall. This engagement was the last performance of the trip and, although absolutely no scenery was available, the affair was again a success. Dancing followed three of the four engagements and much comment was passed as to the merits of the play.

The success of the play is due to the good will with which everybody did their part. Harold Moon, the well known musical director of Bangor, directed the play while Jacob Horne managed the

(Continued on Page Five)

Flack's Men All Ready For the Penn. Relay Races

Saturday afternoon one of the preliminary trials for the Penn relays was held on the cinder track. Another trial was held Tuesday to finally decide what men are to make the trip. In all probability five or six men will be taken as two races are to be run, one on Friday and the other Saturday. The team with Coach Flack will leave Orono at 12:45 P. M. Wednesday, arriving in Philadelphia, Thursday noon. A short workout will be given Thursday afternoon to put the men in condition after the long ride. In the medley sprint race, Maine has drawn second place out of fifteen teams running, with Syracuse having the pole.

The dual meet with Holy Cross is only two weeks away and the squad is rapidly rounding into shape in spite of the cold and rainy weather of the last week.

Assistant managers and freshmen are busy every afternoon working on the track and the jumping pits so that everything may be in the best of condition for the dual meet.

Bates and Bowdoin also are to have dual meets on the same date which will show the strength of their material. Bowdoin looms up as the, strong favorite in the state meet due to her victory last year and the exceptional good times made in her indoor meets. The Kennebec Journal stated last week that Archibald of Bates did the quarter mile in a class race in a little over 51 seconds. Bates is placing great hopes on this Huntington lad to be one of the big point winners in the state meet.

The squad will be put thru some stiff paces this week and altho Coach Flack will be away for the week end, work will go on under his assistants. He will return Sunday night so that the last week before the dual meet may be filled to good advantage.

Sargent Competent Man To Lead Baseball Team

In Carl Sargent, captain of baseball, the varsity squad has a leader qualified in every way for his duties. As a leader in many different campus activities Sargent has won the respect and good will of the student body by his incessant and helpful work for Maine.

Carl is from Westminster, Mass., where he played on the high school team and later at Fitchburg making the baseball and basketball teams. At Maine he has been a consistent performer on the baseball team here for four years playing third base with the exception of his sophomore year when he alternated in the field.

CARL SARGENT
Captain of Baseball

In 1917-18 Sargent was in the Aviation Corps and was at the various flying fields in this country.

During the summer vacations he has not forsaken his favorite sport but has played on the Fitchburg Athletic Club one of the fastest teams in that part of Massachusetts.

Sargent is an ex-'20 man and is taking the Mechanical Engineering course. He is a member of the Sophomore Owls, Junior Masks, Senior Skulls and the Alpha Tau Omega fraternity.

UNIVERSITY CO-EDS SPEAK

A deputation team of four students two of whom were co-eds, spoke at the Old Town Baptist Church last Sunday evening. The speakers were Arthur Wilson, Myrtle Bean, Ruth Crockett, and Earle McGraw. The general subject was "The big Goal in Life" each speaker taking a different view point of the subject. These talks were well received by a good audience.

Maine Debaters Succeed In Defeating N. H. State

The Maine Debaters Show Results of Clever Training by Gaining Decisive Victory over Both of the Durham Teams

The University of Maine Negative team easily defeated New Hampshire's affirmative team, Thursday the 20th at Alumni Hall. The Maine boys were strong from start to finish and it is only fair to say that it would have taken a mighty good affirmative team to stop them.

Curran made a strong, pleasing appearance, and appeared to be at perfect ease on the platform. His voice was well modulated and every word could be heard easily.

Paul, who is an entirely different type of a speaker, was equally effective. His sledge hammer blows, and his oratorical style were powerful and effective.

Noyes, captain of the team, showed his usual ability. His clear headedness, his logical presentation, were big factors in the success of the home team. Not only as a speaker, but as a manager and director Noyes has done some truly remarkable work.

At Durham, a large body of undergraduates filled the gymnasium to witness the Maine Affirmative-N. H. Negative debate. The Maine team, by winning 2 to 1, upset all dope as to the result, as N. H. had previously defeated Colby, who had won over Maine and also in eight of her ten western debates all on the same question.

The Maine debaters proved superior to their opponents at every stage of the contest. The Affirmative, under the direction of Capt. Wilson, launched a vigorous and versatile attack upon the Negative's case from the very start, placing the Negative on the defensive. The fatal weakness of the home team lay in the fact that they failed to fathom the

IN MEMORIAM

It is with deep regret that the students of the University learn of the death of Bananas III, the popular Maine mascot.

Since her debut as an awkward cub at the Maine-Bowdoin football game in 1919, Bananas has been a great favorite with the student body, as well as being

BANANAS III

a great attraction to all visitors to the Campus. So widespread became her prestige that no football game, no baseball game, nor any Maine celebration was complete without her.

Assuredly her loss will create a decided vacancy in the program of future athletic events, which nothing less than a well-trained Bananas IV will be able to fill. Requiescat in pace.

The Scandal Sheet
has your number. Watch it!

Maine Defeats Colby In First Game Played

The Maine Baseball Team Wins Its First Game of the Season By Defeating Colby 4-2 by Errorless Playing.

Intramural A. A. Elects Officers for Next Year

The Intramural A. A. held a meeting and election of officers at the Kappa Sigma house Wednesday April 12. The accomplishments of the association were discussed and plans for next year were formulated. The basketball series and track meet which the Intramural put across this year were very successful, and the winter carnival was also a success. The baseball series and tennis tournament which are to start within the next couple weeks are also under the auspices of the A. A. The baseball schedule is as follows:

NORTH LEAGUE

April 27 Beta vs. S. A. E.
May 2 Theta Chi vs. Sigma Nu

LYOYD G. HAY, New President of
Intramural

May 3 Commons vs. Delta Tau
May 4 Kappa Sig vs. Sigma Phi
May 9 Winners of games on April 27 and May 2
May 10 Winners of games on May 3 and May 4
May 16 Semi-finals
SOUTH LEAGUE
April 27 Phi Eta vs. Lambda Chi
May 2 Sigma Chi vs. Phi Kappa
May 3 A. T. O. vs. Phi Gam
May 4 Phi Ep vs. winner of game April 27
May 9 Winners of games on May 3 and May 4
May 19 Semi-finals

North League games are to be played on old diamond on Alumni Field; South League games on Oriole field. No letter men or present varsity men are eligible. The new diamond is not to be used under any circumstances.

The officers elected were: President, Scrapper Hay; Secretary-treasurer, Bob Welis.

TAU BETA PI INITIATION

The spring initiation of Tau Beta Pi was held in Wingate Hall on Thursday evening, April 14. The initiates were Donald F. Alexander, Philip W. Davis, Lorenzo G. Currier, John C. Winslow, Henry L. Doten, Sidney Osborne, Stanley G. Hall, C. Roger Lappin, Adrian L. Ackley, Stuart M. Johnson, Vernon L. Johnson, Eric S. Hope. After the initiation a smoker was held for the new members.

The Scandal Sheet
can be obtained only at the
SCANDAL DANCE

Maine started the baseball season right by administering a defeat to Colby in the first State Series game at Waterville Patriot's Day by the score of 4 to 2.

The game started out with McDonald's putting a strike across the plate, but the good omen was overshadowed when Sargent came up and got a base hit and Osgood put Sargent on third with a two-bagger.

The Colby team snapped to about this time and the next two men filed out. The Colby team came to bat and the first two men were put away without seeing the ball. Then Huhn got to first no balls and Burck ended the inning by fanning. In the second inning the first two men filed out and the third man never saw first. Lanpher came up for Colby and knocked a pop fly to third base for the first out. Royal swung at the sphere and dashed away for three sacks while Lunge was relaying the ball back to the diamond. Things looked bright for Colby then but sighs arose for the crowd when Fransen popped to Sargent.

OSGOOD SHINES

Niles stepped up to the bat and with a savage swing sent the ball down between third and second at a mile a minute clip for what looked about two bags. Just about the time the crowd started to yell there was a smack and Osgood reached up about ten feet in the air and pulled the ball back to earth with one hand. It was a pretty catch. Just to show that it wasn't luck Osgood kept up the same brand of ball throughout the game, and any ball that passed his way was good for a sure out. Colby's hopes dashed to earth. They trotted

(Continued on Page Six)

The Domino Club Will Give Entertainment Sat. Night

On Saturday evening, April 29 at 8 o'clock the Domino aided by the Maqua committee of the Y. W. C. A. will give its first public entertainment.

The Domino which was formed the first of this semester has been developing rapidly and has been developing sketches have been given before the members of the club. Out of these, two of the best have been chosen and carefully managed for public performance.

The two plays to be given are, "The Will-o-the-Wisp" by Doris Halman, and "The Playgoers" by Arthur Pinero. "The Playgoers" which is a domestic sketch gives an amusing account of the troubles of a young married couple. Dora Ramsdell, who appears as the young mistress is found in many perplexing situations as she tries to solve the servant question. The problem solved in her own mind, she conveys her idea to her husband, Barbara Hitchings, who although not very well pleads tries to carry out her suggestion. It is interesting to see how the scheme works out with the servants who vary from an hysterical housemaid to an old man, Gales, who is called everything from Wind to Blizzard.

"The Will-o-the-Wisp" is a much deeper impressionistic one act play. The mystery which accompanies the Will-o-the-wisp throughout as she allures the young poet's wife away is worth tracing. What becomes of the poet's wife?

Another interesting feature of the evening will be a Swedish and a Greek dance done by a group of girls, while Bessie Cooper will do some solo dancing.

There will be a stag dance after the plays. Tickets are on sale at all of the fraternity houses and dormitories as well as at the college store.

Freshman Discipline

We feel that some pressure should be brought to bear on the elusive Frosh. He marches proudly around the Campus hatless and with members of the fairer sex without a question being raised by any upper classman. If the offender's attention was called to the fact that he was breaking some of Maine's most precious traditions each time he was to meet an upperclassman the offenses would soon be stopped. There is no pressure stronger than that of public opinion if properly and consistently applied.

It is also an astonishing fact that the members of the first year class give their opinion when uncalled for, with as much assurance as a senior. This is particularly noticeable in the athletic office where faculty members and upper classmen are verbally pushed aside to make way for the Frosh.

Only on very unusual occasions is it that a freshman will deign to speak to an upper classman before being addressed himself. If the members of the Sophomore Owl society, particularly, will make an effort to stop this rapid promotion of our first year man our Campus will be much better off for their work. Let us all get together and for the remaining few weeks show the fresh men how they should make the next years' crop act when they arrive on our Campus as preparatory school seniors. You speak to the next offender of our traditions!

The Scandal Sheet
was raised on Home Brew.

Prof. Sitch

"To listen is a fine art!"

"It's an extraordinary man who hits the bases, whether the umpire is looking or not."

We understand that members of the Military Department have used the University lawn between Coburn Hall and the Library as a parade ground. At this time of year particularly we feel that this should not be allowed as the repeated tramp of army shoes on the young grass does not act as nourishment.

We suggest that the roads and the athletic field be used in place of the grounds which are being put in proper shape for commencement. We feel that this was a case of thoughtlessness and will not be repeated.

"One can declare war, but it takes two to conclude Peace."

We believe that our Student Chapel exercises on Fridays do not receive sufficient publicity and that that is the reason for the very small attendance at these meetings. We suggest that the Athletic Association have posters made to call attention to all future student chapel exercises.

Engineering Requirements

That the requirements of the Engineering Colleges in the country are very exacting is accepted by the majority of the people as is shown by the following article which appeared in the editorial column of the Boston Herald.

"As the people come to understand how human life nowadays hangs on engineering, they will see more reason for the grueling requirements in our technological schools."

Many students drop engineering because the work is too hard. We feel that because the required work is diffi-

cult, courses in engineering offer exceptionally good training for any line of work. It is true that more hours are required for graduation from the college of technology and that much time must be spent in the laboratory but it is only by hard work that a real benefit can be derived.

It is human nature to do as little as possible and it often under compulsion that the best work is done. Poor authors who are compelled to write in order to eat often turn out our best literature. Altho as much work may be done in any college as in the college of technology the requirements are not as exacting and consequently the tendency to do less work is always present. If you enjoy engineering stick to it! God hates a quitter!

There is a kind of pride that stinks like a fertilizer factory and makes a noise like the Devil stoking the furnaces of Hell.

Self-control: The ability to restrain a laugh at the wrong place.

The Ball Diamond

The new ball diamond on the south side of the athletic field has been very carefully prepared for the varsity ball team. A great deal of time and work has been put on this diamond and Coach Clark is very anxious to keep the diamond in first class shape.

Many times when the varsity is not practicing students play on the diamond without baseball shoes. The ordinary shoe with a heel cuts the base lines up when men run around the bases. Due to the fact that the diamond is on very heavy clay soil these tracks and holes made by heels cannot be rolled out except after a rain. For this reason Coach Clark wishes to ask all students to refrain from playing on the new diamond.

The old ball diamond in the north east corner of the field can very easily be put in first class shape for the general student body. It does not seem unreasonable to us to ask the student body to help the ball team in this respect. The principal offenders are those who play Sunday baseball on the new diamond. We feel that this is showing a very poor brand of Maine spirit and hope the offenders will be more considerate in the future.

"The meanest habit in the world is self-pity."

Annual Poverty Ball Given by "M" Club

The annual Poverty Ball, which is given each year by the members of the "M" Club, took place in the gym, Tuesday, April 18. In spite of the fact that the dance was postponed from Friday and a little difficulty arose in finding a date, there was a fairly large number present although not as many as in previous years.

The custom has always been that everyone should appear poverty stricken but there were only a few that lived up to this idea and there was no difficulty in deciding the prize winners. The prize for the most poverty stricken looking man was awarded to Harry Belyea, while that for the lady went to Barbara Dunn. No taxes were imposed for appearing otherwise than poverty stricken and consequently many good opportunities for making money were lost.

Fraternity Parties

Delta Tau Delta held an informal party, Tuesday, April 18 as a Patriot's Day Dance.

An order of fourteen dances was furnished by Reiche's Orchestra. Mrs. Kelley acted a chaperone for the evening.

An informal party was held at Theta Chi, Saturday, April 22. Reiche's Orchestra furnished music for an order of sixteen dances, which were enjoyed by about twenty-five couples. The party was chaperoned by Mrs. Johnson.

An informal party was held at Sigma Alpha Epsilon, Tuesday, April 18. The music was furnished by Vallee's orchestra. The matron, Madame Parcher, acted as chaperone.

The Alpha Omicron Pi girls gave a most successful Stag Dance, Wednesday, April 19. Music was furnished by Vallee for about seventy couples. The dance was successful both financially and socially. Mrs. L. T. Cummings acted as chaperone.

(Continued from Page One)

clever stand taken by Maine boys until late in the rebuttal. The Maine Affirmative team, disregarding the usual tactics, refuted all arguments during their constructive case and left their rebuttals open for questions which they "defied, asked, begged, challenged and demanded" their opponents to answer without any noticeable results.

The New Hampshire team made one last bid for victory when Dearborn, with one minute to go, shot question after question at Wilson, Maine's "clean-up" man. The Maine captain, however, was at no loss for apt replies and upheld his usual reputation as a rebuttal speaker.

Richardson, a new man on the Maine team, proved to be a tower of strength throughout the debate. As a rebuttal speaker, he had no equal. His vicious and well-directed attack upon the Negative case was the feature of the contest.

Calderwood, Maine's "lead-off" man, starred in the constructive case for his team. Much credit for the victory belongs to him, as it was principally thru his efforts that the Negative was early forced to assume the defensive.

The latter two men were slightly unnerved at the start, having got lost in Congreve Hall, the girl's dormitory, on their way to the debate and escaping only after several nerve-racking experiences!

Minstrels Baseball and Track Feature in Rally

The baseball team, the track squad and Moon's Maine Minstrels were all given a prominent place at the rally on Friday, April 21.

The hall was attractively decorated with red, white and blue, the streamers of which hung from the center and were attached to the balcony. The lights were covered with paper frames on the insides of which were placed pictures of the ex-presidents. The booths, around the hall representing the different companies were attractively decorated. The sponsors were 1st Battalion, Muriel Goodrich, Co. A, Christine Peterson, Co. B, Angela Fasset, Co. C, Rachel Connors, Co. D, Hortense Harden, Co. E, Rebecca Hall, Co. F, Gladys Springer, Co. G, Martha Sanborn. Each sponsor received a bunch of flowers during the evening.

The entertainment for the evening included saxophone solos by Mr. Vallee, selection by the University Band, the awkward squad and Manual of Arms. The refreshments consisted of ice cream and fancy crackers. Punch was served during the evening. The novelty of the evening was in the form of a balloon dance. The usual amount of confetti was thrown during the evening and in the last dance the decorations were torn down.

Music was furnished by the Harmony Hounds.

Patriot's Day last week was celebrated by the Phi Kap boys in having a Victrola Party in the afternoon. About ten couples were present, and the party was chaperoned by the matron, Mrs. Mary Stuart. New records for the occasion were a special feature, and the party was a gay one from start to finish.

The Phi Kap spring initiation came to a close Monday the 17th. The initiates were Arthur N. Pendleton, Dark Harbor; Harold L. Gerrish, Brownville; George N. Coburn, Weld.

The weekly rehearsals of the University Orchestra have been progressing finely under the direction of Professor Sprague. At the present time plans are being made for a program to be given by them during Junior Week. It is their present intention to also make one or two appearances in chapel before the close of the year.

"The man who hates to fight," said Jud Tunkins, "can usually be depended on when forced into a fight to work as hard as he knows how to get it over with."—Washington Star.

Baseball Team Leaves On Massachusetts Trip

The University baseball team left Orono Sunday on the Massachusetts trip; those making the journey are: Graduate Manager Bryant, Manager Thomas, Coach Wilkie Clark, Captain Sargent, Prescott, Cohen, Torsleff, Jewett, Nichols, Repscha, Conley, Johnson, Osgood, Lunge, Jordan, Rusk, King and Foster.

The first game is with Brown at Providence, Tuesday the 25th, Wednesday, Harvard at Cambridge, Thursday, Boston College at Boston, Friday, Norwich at Northfield, Vermont, Saturday, Dartmouth at Hanover; Monday, May 1st, University of Vermont at Burlington.

It is quite obvious that our men face no easy week in opposing some of the strongest teams in New England.

Bowdoin Defeats Bates

Bowdoin defeated Bates 6 to 1 in the annual Patriot's day game. Bowdoin played good baseball throughout, and both Flinn and Walker were more or less of a puzzle to the Garnet batters. Despite a cold raw day a good sized crowd saw the contest which did not count in the race for the pennant. Bowdoin won the game in the second. Graves led off with a single and advanced on an error. Hill flied out. M. Morrell was safe on a fielder's choice which failed to get Graves and both advanced when Spiller uncorked a wild pitch. Davis and M. Morrell worked a double steal for a score. Handy fanned but Flinn doubled, scoring Davis. Smith fanned.

Bates got their only run of the game in the fourth. With one gone Kenney got an infield hit and stole second and third. Burrill struck out and Dimlick walked. Partridge hit to second and the throw was too late to get Kenney.

Princeton defeated the Bowdoin baseball nine, 7 to 1, in the opening game of the season on University Field, Princeton, Wednesday afternoon.

The Orange and Black team started off well, in the first inning, scoring two runs and hitting Flinn, the Bowdoin pitcher, with apparent ease. Flinn was forced off the mound in the third frame. He gave way to Walker, under whose pitching the Tigers were less successful but were not stopped. Townsend, a southpaw, pitched good ball for Princeton, allowing the visitors only five hits.

The hitting of MacPhee and McIlvaine was a feature of the game, each of these veterans collecting three hits. MacPhee and Jeffries each made a three-base hit, while Berg and McIlvaine of the locals, and Gibbons of Bowdoin, collected two-baggers.

Princeton earned two runs in the first, two in the second, one in the third and two more in the eighth inning. Graves led the visitors' attack with two hits and scored their only run, which came in the seventh frame.

Kennebec County Alumni Assoc. Meets at Augusta

University of Maine is on the uplift! The spirit of cooperation between the governing boards, the faculty, the student body and the alumni, the bright outlook in athletics and the feeling of "coming back strong" which pervades the campus were brought out in a most impressive manner in the addresses which were given at the annual banquet of the Kennebec County Alumni association held Friday, April 14 at the Augusta House.

Messages from a trustee of the University, the graduate manager of athletics and the alumni secretary gave the information as to conditions at Maine. The plans for the celebration of the fiftieth anniversary of the first commencement were explained so that as many alumni as possible will realize how important this commencement is to be. Clarence C. Little, the newly elected president of the University was given much credit for the spirit of cooperation which is shown.

The meeting was made enjoyable as well as beneficial by Hon. William R. Pattangal of Augusta, who as president of the association and toast master of the post prandial exercises kept things moving after the banquet was finished. Many alumnae were among those present. Maine songs and cheers were in order as well as the speeches.

At the business meeting of the association the following officers were elected: President Paul D. Sargent of Augusta; vice president, George S. Williams of Augusta; Secretary-treasurer, E. L. Newdick of Augusta; executive committee, the three preceding officers and Herman H. Mansur and J. E. Church, both of Augusta.

The three speakers of the evening were Hosea B. Buck of Bangor, trustee of the University, "Hamp" Bryant, graduate manager of athletics and Pep Towner, alumni secretary.

"The message I bring is that the University of Maine, our university is coming back," said Hosea Buck, alumni member of the Board of Trustees, who was the first speaker of the evening. He proved that this was true by citing many incidences of improved conditions in the relations between the governing body and the alumni, improved financial conditions, plans for improvement of the buildings and the spirit for which the recently elected president was responsible. He told how the trustees decided to get a young man to fill the office left vacant by President Alek and how they found in Dr. Little a man who was democratic, easy to meet, a man who talked straight from the shoulder. They also found that the new president believes in "getting under the skin" of the students. He closed his address by emphasizing the need for the alumni to support the non-athletic organizations such as the Masque, the debating teams and musical clubs.

Graduate Manager Bryant, the next speaker, discussed recent developments in the athletics situations, from the recommendations made by some of the Portland alumni last year and the changes that resulted from these recommendations. He stressed especially the present conditions in baseball and track, emphasizing the development of the baseball squad under Coach Clark's direction. He spoke of the track squad, telling how material for the field events was needed. The scholastic cleanup of athletes, the success of the basketball season, and the financial system of the athletics department were also explained.

Pep Towner, the alumni secretary was next introduced. The political situation of the University was discussed, particularly the plank in the Republican platform pledging support to the University. In conclusion he spoke in detail of some of the scenes to be portrayed in the Maine pageant which will feature the celebration at the commencement exercises in June.

Among other speakers were J. M. Horne 23, manager of the Maine Masque who spoke of the plans for the Masque trip, Mrs. Ruth Merrill Dana '12 who spoke on behalf of the alumnae present, and the newly elected president of the association, Mr. Paul D. Sargent.

takes the Bang out of Whiz Bang.
The Registrar

A tourist reports seeing the following police regulations posted up in Ireland: "Until further notice every vehicle must carry a light when darkness begins. Darkness begins when the lights are lit."

CORRESPONDENCE

The Maine Campus is not responsible for the sentiments of letters published in the correspondence column. Signed communications from graduates, undergraduates and members of the faculty will be placed in print if they are not of too great length.

No communication will be admitted to this column without the name of the writer being attached not necessarily for publication.

Editor of Maine Campus,
Orono, Maine

Dear Sir:

On April 14 there was a rally held in the chapel at which time the members of the basketball team were awarded gold basketballs in recognition of their splendid showing.

It comes to mind that the cross country team has not been awarded anything in recognition of their showing. They were New England champions and all they have to show for it is medals awarded by the New England Athletic Association. It is about time that the University of Maine Athletic Association should recognize that team.

Isn't it possible for us to give that team, a team that helped to put Maine "on the map" recognition in some way? All large colleges recognize championship cross country teams by awarding the members a winged foot. Is Maine going to be up with the rest of them?

I want every Maine man and woman to think this over. Let's give that team some recognition.

Sincerely,

A Senior Student

Dean Berrill

Mr. Graham to Tell Civils Of Uses of Asphalt

An interesting lecture is to be given before the Civil Engineering Society, Thursday evening, April 27th at 7:30 P. M. in 14 Wingate Hall.

The subject will be: Asphalt and Its Use in Highway Construction.

The lecture will be given by Mr. Germain P. Graham, District Engineer of the Asphalt Association. The address will be supplemented by stereopticon slides which will illustrate the construction methods for the building of Bituminous Surfaces, Bituminous Macadam and Bituminous Concrete. The talk will also cover the manufacture of asphalt, both native and artificial. It is believed that the lecture will be of interest to the Forestry and Chemistry students as well as those majoring in Civil Engineering.

The Civil Club extends a cordial invitation to everyone interested to attend this meeting.

The Scandal Sheet
snaps like the froth on Beer.
Prof. Dudegal

Summer Camp of Forestry Dept. on the Lunkasooos

The Forestry Camp will be held this summer at Lunkasooos, on the East branch of the Penobscot river. The camp opens on August 1 and lasts for five weeks.

The subjects covered during the time at the camp are, forest mapping, surveying, timber cruising, growth study, forest botany, silviculture, fire protection and management.

This camp which was discontinued during the war, is to be held annually under the directions of the Forestry Department. It is hoped by the department that the required number will be enrolled so as to make the camp a success. Anyone desiring further information should get in touch with Prof. Briscoe.

Boston University—Six perfect scores! Such was the unique record rolled up on Saturday afternoon by the Boston University Rifle team competing against the University of Maine.

100 Per Cent Perfect Record.
Man after man made a perfect bull's eye at the range at the South Armory.

Since only the five high scores count, the team record for the day was 100 per cent perfect. There was an additional perfect score, which could not be figured in the record.

Call for Candidates for The Girl's Track Team

Manager "Katie" Dennison of the Girls' Track Team has sent out an urgent call for candidates. With the annual meet only two weeks off, many girls are needed to make it a success. Coach Schenkel has had new hurdles constructed in back of Balentine and all is in readiness for the candidates. The events of the Spring Track and Field Meet, May 6, are as follows:

1. 50 yd. dash
2. 50 yd. sack race
3. 60 yd. hurdles (3 hurdles)
4. Inter-class relay (200 yds.)
5. Potato race
6. Standing broad jump.
7. Running high jump
8. Running broad jump
9. Baseball throw
10. Hurl ball throw
11. 5 lb. shot put
12. Stand. hop, step, jump

The meet is to be an interclass competition, with points as follows:

- 1st place—5 pts.
- 2nd place—4 pts.
- 3rd place—3 pts.
- 4th place—2 pts.
- 5th place—1 pt.
- Relay—1st place—10 pts.
- 2nd place—5 pts.
- 3rd place—2 pts.

Mr. Baggs: "I hear that you have become engaged to my son, Miss Smythe. I think you might have seen me first."

His Stenographer: "I did, but I preferred Harold."

Ikey: "For why you go up them stairs two at once?"

Izzy: "To save my shoes, papa."

Ikey: "Fine, sonny, but be careful and don't split your pants."

Do You Need Extra Courses?

Send for catalog describing over 400 courses in History, English, Mathematics, Chemistry, Zoology, Modern Languages, Economics, Philosophy, Sociology, etc., given by correspondence. Inquire how credits earned may be applied on present college program.

The University of Chicago

HOME STUDY DEPT.

CHICAGO, ILLINOIS

30th Year

Harvard Graduate School of Business

A two-year course in business, open to college graduates, leading to the degree of Master of Business Administration.

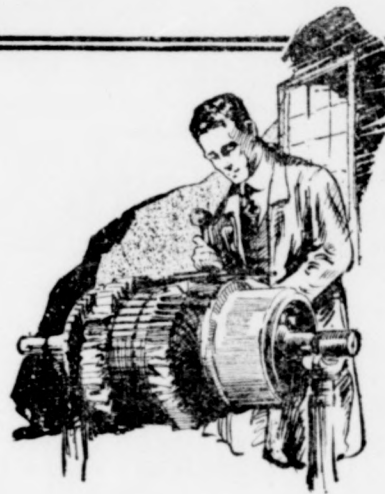

The School aims to give its students a basis of facts and principles which the beginner who is looking forward to executive work cannot readily obtain in his early business experience.

The case method of the School provides training in analyzing actual business problems.

The various courses are correlated in the following study groups: Accounting, Banking, Business Statistics, Foreign Trade, Industrial Management, Lumbering, Marketing, Transportation.

Registration for 1922-23 is limited. For further information and formal application blanks, write to

Dean W. B. Donham, University 22
Harvard Graduate School of Business Administration
Cambridge, Massachusetts

This Junior is learning to be a banker

If you are putting in three hours a day in the electrical lab, don't be surprised twenty years later to find yourself promoting a public utility bond issue. Or if you start in newspaper work, as like as not later on you will turn to manufacturing or advertising or law.

You don't know where opportunity or inclination will lead you. This fact has a great deal to do with your work at college—not so much the things you learn as the way you learn them.

Don't think of education as a memory test in names and dates and definitions. That knowledge is important, but only as an incidental. Of far greater value is the habit of getting at underlying laws, the basic principles which tie facts together.

The work of the pioneers in electrical experiment, at first glance confusing, is simplified once you realize that much of it hinged upon a single chemical phenomenon, the action of the voltaic cell.

Analyze your problems. Look for fundamentals. Learn to connect a law or an event with what went before and what comes after. Make your education a training in logical thinking.

This ability to think straight, whether acquired in Engineering or Arts, is the biggest thing you can get at college. Its aid as a means to success applies equally to whatever work you take up—since mental processes are the same everywhere. It is the power which enables a mechanic to become sales manager, a lawyer to head a great industrial organization. Develop it, if you would be ready when your big opportunity comes.

Western Electric Company

The executives of this Company have been chosen from all branches of the organization. It doesn't make much difference where you learn to think straight, so long as you learn.

Published in the interest of Electrical Development by an Institution that will be helped by whatever helps the Industry.

New Station Established For Radio Broadcasting

A radio broadcasting station, more powerful than any now sending out programs, has been installed by the General Electric Company at its plant in Schenectady, N. Y.

From the roof of a five story factory building, two towers 183 feet high and spaced 350 feet apart, support an antenna at such height as to give the wireless waves unobstructed freedom to travel equally well at a speed of 186,000 feet per second in all directions.

This station has not been regularly operated nor has advance announcement been made of the impromptu or test programs sent out, which would cause amateurs to be listening, yet, letters have been received from such distant points as Cedar Rapids, Iowa, Minneapolis and Santa Clara, Cuba, the latter place 1450 miles distance, announcing that the programs have been heard. These reports come from operators who, in an evening's experimenting with their receiving sets, have accidentally come upon the waves from Schenectady and are no indication of the distance this station may be heard.

Broadcasting stations, with but a fraction of the power of the G-E station, have been heard at distances of 2,000 miles or more under favorable atmospheric conditions.

The General Electric station has been licensed to operate on a 360 meter wave length under the call letters of W. G. Y. It is equipped with the most modern of radio apparatus, including the multiple tuned antenna which, because of its many advantages, has been installed in Radio Central, the world's most powerful commercial station at Rocky Point, L. I., and other trans-oceanic stations of the Radio Corporation of America.

A three room studio, where the programs are produced, is located in a Company office building, 3000 feet from the transmitting station. One room is used as a reception room for the artists, where they may sit and chat until their time on the program arrives without danger of interfering with what is going on in the studio. The second room is the studio, where a concert grand piano, victrola, an organ and other equipment for the artists are to be found. Here a number of portable microphones, which are commonly known as pick up devices can be shifted about to locations best suited for the reception of announcements, musical numbers, or whatever may be sent out. In the room on the opposite side of the studio is apparatus for amplifying the sound wave before they are transmitted by wires to the broadcasting station.

A switchboard in the studio, which lights a red light when the station is in operation thus warning persons in the room that whatever they might say will be sent out to thousands of ears of an invisible audience, is within reach of the studio director at all times. Not until he throws a switch can anything reach the antenna. A telephone attached keeps him constantly informed just how the program is going out and allows him to change position of the artists or microphone if such is necessary to improve the tone quality of the entertainment.

With the exception of the small pick up devices or microphones and the switchboard, there is nothing in this room to indicate it as different from any musical studio.

In the apparatus room, the sound waves are put through a number of steps of amplification by means of vacuum tubes which increases their volume thousands of times. The amplified sounds are then put into a wire and sent to the broadcasting station, where they enter another bank of vacuum tubes, known as modulators or molders of the electric waves.

Direct current at a high voltage is necessary for the operation of a transmitting station. To obtain this, a 220 volt alternating current line, which is but little longer than the voltage used for lighting purposes in the home, is boosted to 30,000 volts by means of a transformer. This voltage is then applied to a number of vacuum tubes, acting as rectifiers, which change the voltage to direct current. Placed between the rectifier and the modulator or molding tubes, is a high power oscillator tube. The electric power entering this tube sets the ether into vibration and upon these vibrations the electric waves, molded into shape in the modulator tubes, are sent to the antenna to go out into space.

The Scandal Sheet
ranks high. Dean Heart

How An Old Farm House Became a College Building

Through the generosity of the citizens of Orono and Old Town, two buildings with their lands, valued at \$11,000 were added to the University's property. The purchase of these two farms, the Goddard or Frost property and the White farm, took place in 1868 during the administration of President Fernald. The former was called the Goddard or White House prior to 1868, as it had been owned and occupied by Col. John Goddard and by Nathan Frost. It was on the site of the present Beta House.

From 1868 to 1879 the Frost House, now known as North Hall, was occupied by the first president of the University, Merritt Caldwell Fernald. Later Professor Allen E. Rogers resided there with his family until 1886, when Beta Theta Pi entered under a ten-year lease. Upon the expiration of the lease, it was renewed with two conditions, of which one was that extensive repairs should be made by the chapter, and about \$1,000 be expended for that purpose. The second condition provided that upon its expiration the Betas might, if they desired, build a new house upon the site of the old one.

Before the building of the Beta House in 1905, the Frost House was removed to its present site near the north line of the Campus where it was occupied by the Sigma Nu Fraternity.

When the Sigma Nu's started the construction of a new house in 1915, North Hall became the residence of some women students until Balentine Hall should be completed. The next occupants were the Phi Epsilon Pi's who gave place in the fall of 1919 to the students in Senior Home Economics.

Under the Home Economics students the house is absolutely self-supporting; from the money which they pay in for board and room the girls give the University the same rent it formerly received from the fraternities, heat, water and all other bills.

This building then in the constant service of the University from 1868 to the present day, has had most interesting career and as a matter of history its record is worthy of preservation.

The Scandal Sheet
is a cross between Hot Dog and the Whiz Bang.

Prof. Morsey

ALUMNI NOTES

E. Richard Page '13 is now Associate Professor of Electrical Engineering at the University of Oklahoma.

Reports from Jerome C. Burrows ex '21 who left college in his junior year because of illness, state that he is gradually improving. His intentions are to return to Maine in another year to complete his course.

William E. Nash '17 has been recently appointed purchasing agent of the South for the Turner Construction Company with headquarters at Atlanta, Ga.

W. Linwood Chase '20 is now sub-master of the North Junior High School of Waltham, Mass.

Miss Helen L. Stuart and Mr. Lee Vrooman '18 of Hartford, Conn., have recently announced their engagement.

Allen C. Hardison '90 was recently appointed by Gov. Stephens of California as a member of the legislative committee to investigate the College of Agriculture at the University of California. Mr. Hardison is a large land owner and is interested in the Limonera Rancho. He is a director of the Ventura County Fruit exchange of the Santa Paula and Mupus Citrus association, as well as in many other farming and orchard incorporations.

L. A. Rogers '96 has been elected president of the Society of American Bacteriologists which held its first meeting in Philadelphia.

Stephen J. Bussell '82 of Old Town is republican candidate for representative to the Legislature from Old Town.

Mr. and Mrs. Earle H. Danforth '19 of Gardiner announce the birth of Richard Hamlin Danforth on April 12.

Paul F. Webber '19 has returned from Costa Rica for the summer and will return to college for commencement.

Dr. Caroline Colvin left for Baltimore, Maryland Tuesday where she will represent the State of Maine at the Pan American Congress of Women and the Third American Congress of the League of Women Voters.

Mr. and Mrs. I. W. Barbour of Portland have announced the marriage of their daughter Elsie Barbour to Lynn M. Reynolds ex-'22. The wedding took place in Portland.

NORTH HALL (Practise House)

Everything for QUALITY— nothing for show

THAT'S OUR IDEA in making CAMELS—the
Quality Cigarette.

Why, just buy Camels and look at the package! It's the best packing science has devised to keep cigarettes fresh and full flavored for your taste. Heavy paper outside—secure foil wrapping inside and the revenue stamp over the end to seal the package and keep it air-tight.

And note this! There's nothing flashy about the Camel package. No extra wrappings that do not improve the smoke. Not a cent of needless expense that must come out of the quality of the tobacco.

Camels wonderful and exclusive Quality wins on merit alone.

Because, men smoke Camels who want the taste and fragrance of the finest tobaccos, expertly blended. Men smoke Camels for Camels smooth, refreshing mildness and their freedom from cigarette aftertaste.

Camels are made for men who think for themselves.

Camel

trip to make it a success financially as
well as a success in the eyes of the vari-
ous audiences.

In all probability, the play will be giv-
en in the near future at Old Town, Ban-
gor and on the campus.

The cast of this season's production,
"A Couple of Million" is, in the order
of their appearance, follows.

Hon. Jeremy Wise	Merle Niles
James Patrick Burns "Stubby"	Stanley Hanson
Genevieve McGully	Charles Burbank
Professor Noah Jabl	Herbert Fifield
Bemis Bennington	Earle Whitmore
Mrs. Clarice Courtenay	

Fay Fairbanks	Bryant Patten
Beverly Loman	Kenneth MacGregory
Squire Piper	Jacob Horne
Pink	Dwight Demerit
Sammie Bell Porter	George Stackpole
	Horace Atwood

This farce is in four acts, the synop-
sis of which are as follows:

ACT 1

The law office of Hon. Jeremy Wise,
New York City. A morning in July.

ACT 2

The exterior of the court-house
square, Opelooa, Alabama. An after-
noon in October.

ACT 3

Same as Act 2. The next afternoon.

ACT 4

Mrs. Courtenay's sitting room, Opel-
ooa, Alabama. A night in April.

MEN'S STORE
Old Town, Maine

Dean Stevens: "State the character-
istics of that image, Mr. Jacobs."

Jacobs: "It is small, inverted, and vir-
tuous."

Senior who was suffering from an at-
tack of the Spring Fever: "Just hear
those birds sing!"—and it was a scold-
ing squirrel.

Salesman (at automobile show): "Are
you interested in a new motor car?"

Pedestrian Visitor: "Naw, I'm just
seeing how it feels to dodge 'em with-
out getting hit."

Teacher: "How many seasons are
there?"

Izzy: "Two! Busy 'season and dull."

When H₂O Isn't Water

"GENTLEMEN" said the Chem. Prof., at
the end of the term, "You'll probably
remember only one thing of all I've tried
to teach you. And that is that Water is H₂O
—and then you'll be wrong."

Even shaving soap isn't always *shaving*
soap. A *correct* shaving preparation like
Williams' Shaving Cream must do a lot
more than simply make a lather.

—It must be generous with its lather. It must be
thick and creamy in cold water or hot.

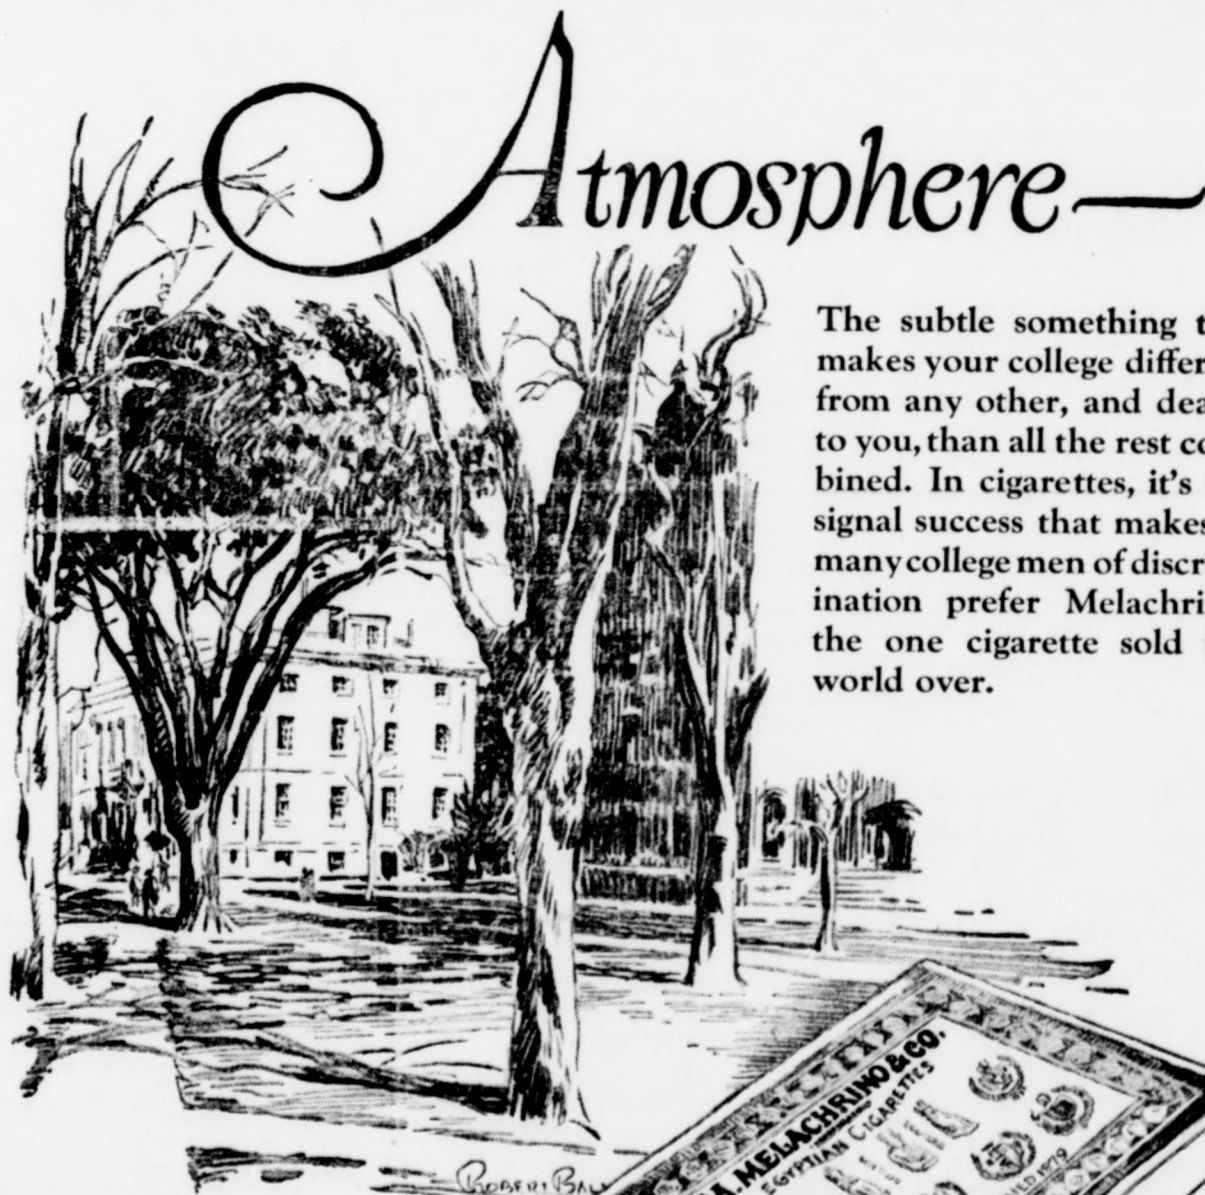

—It must hold its moisture. Williams' will not
"freeze" dry on your face.

—It must soften your
beard right down to the
very roots.

—It must prepare your
face for quick, gentle
shaving. Williams' is
so pure and whole-
some that it actually
helps the most tender
skin.

Try it—
tomorrow before
chapel.

Williams' Shaving Cream

The subtle something that
makes your college different
from any other, and dearer
to you, than all the rest com-
bined. In cigarettes, it's the
signal success that makes so
many college men of discrim-
ination prefer Melachrino,
the one cigarette sold the
world over.

Remember that Melachrino is a master
blend of the finest Turkish Tobaccos
as originated by Miltiades Melachrino.
Egyptian cigarettes are simply those
that originated in Egypt. But the to-
bacco is what you want to know about
—and if it's Melachrino—it's right

**Maine Defeats Colby in First
Game Played**

(Continued from Page One)

onto the field and Maine came to bat to
win the game in the third inning.

Repscha, the first man up gave the
ball a long ride into left field for two
bags and landed on third when Johnson
sacrificed. Sargent batted an easy
grounder to McDonald and Repscha
started for the plate. McDonald fielded
the ball all right and then drove it over
Lanpher's head while Repscha strolled
home without even having to slide.

THING SHIFTS

While this is going on Sargent goes
first. Osgood comes up to bat fresh in
McDonald's mind because of his half-
circuit clout in the first. He swings on
the first ball and a hot grounder streaks
between first and second. Anderson was
after it but somehow it sneaked between
his legs. Sargent got to third and Os-
good landed safe on first. Anderson gets
the ball and heaves it to Niles to head
off Osgood, but Niles loses his grip, and
Sargent goes home before the ball is
recovered. Osgood goes second and
starts for third. The ball follows, but
the third baseman was not on his job,
and the ball laid around loose again
while Osgood wnet home.

COLBY WAKES UP

The Colby team snapped to to some
extent after the game was lost, and the
next two men went out on the bases.
The game was tight for the next few
innings until the first half of the seventh.
Lunge fled out to the pitcher and then
Prescott patted the apple for two sacks
over the left fielder's head. He got to
third on an error by Royal and then
came home on a base hit by Jordan.
This was Maine's final scoring and it
looked as though the Colby nine was
going to be locked out until the ninth
inning. All of a sudden Nichols seemed
to tire of tossing the ball across the
plate. He passed Fransen, hit Niles and
Hunter, and then with the bases full
pitched the first ball to the next man,
about ten feet above the catcher's head.
While Prescott was after the ball Fran-
sen came home and Niles and Hunter
came to second and third. Wilkie Clark
began to look worried. Jowett peered
off his sweater and hurried in to take
Nichols' place. The memory of Jowett's
pitching was not altogether dead in the
minds of the crowd and the cheering
died down to a kind of expectant hum.

After warming up a bit Haines came
up as the batting order started over
again. Jowett wound up and then let
loose for a smoky ball that the umpire
called a strike. The ball was certainly
hurrying along for Haines did not seem
to know that it was being thrown at all
until the crack in the mitt announced
the arrival of the second and third
strikes.

The Maine team seemed to find the
ball practically every time up and only
two strike outs were made by Calla-
ghan while McDonald was unable to
fan anyone. On the other hand Rep-
scha put away six men before he went
wild and Jowett put two to sleep out of
the three he pitched to. But Royal

found Nichols every time, and got two
hits out of the four times up. Young
Niles made some savage clouts, but he
failed to get any of them out of the
range of the fielders.

hours.

The Scandal Sheet

would have made the Romans
laugh.

Prof. Puddleson

Cincinnati University—The freshman
girls' basketball team of this University
has been undefeated this season.

M. I. T.—One-tenth of the 3,500 stu-
dents of the Massachusetts Institute of
Technology are foreigners. One-fifth of
these foreigners are Chinese.

Flapper—Female for rounder.

Shrill—Girl, skirt, flapper.

G. G. (gullible goof)—Fellow who
takes his girl around and spends his
father's money on her.

Jeweler—Girl who gathers up all the
Frat pins she can.

Originally an animal, man has been
improved by civilization and may even-
tually develop into a perfect beast.

THIS IS IT!

WHAT?—A SCANDAL DANCE.

WHEN?—Friday, April 28

WHERE?—Alumni Hall

Yes—on Friday, April 28, the Maine
Campus board will give its first dance.
This is to be the first not only in num-
ber but the first of its kind ever given.

The Campus Board which has always
existed here on the campus to publish
our college paper, has decided to make
itself known and has been busy through-
out the whole year making plans for
this dance. A great amount of real de-

tective work and literary talent has been
used in preparing THE SCANDAL
SHEET which is to be an important
feature. This can be obtained only
by attending the dance and this alone is
well worth price, as "there are some
very good points well brought out."

Music will be furnished by Vallee's
orchestra and the usual good numbers
and latest hits will be given even in
the musical line.

Tickets are on sale in all of the fra-
ternity houses and at the college store.
Get your tickets and see what happens!

SUMMER WORK FOR STUDENTS

Pleasant Work—Big Pay—Extra Awards

What are you going to do this Summer, Men? Will you take a job
that will tie you down, keep you in-doors the whole Summer long, pay
you \$15 or \$25 a week, and leave you feeling like the very old dickens
when College opens next Fall?

Or have you in mind landing something that will keep you out of
doors, enable you to travel, pay you \$50 each week for expenses, give you
a good sum of money to defray next year's expenses, and at the end of the
Summer leave you with the feeling that you have had a real vacation?

Every student desiring employment for this Summer will do well to
look into the opportunities which we are in a position to offer. A letter
of inquiry will bring you full details.
