No. 8

## SECOND CHAMPIONSHIP GAME SATURDAY

### Colby vs. Maine on Alumni Field

The second championship game of the year comes off Saturday, Nov. 1, on Alumni Field. This time Colby is Maine's opponent and Maine's chances for winning are not as bright as they were for the Bates game. The Colby backfield in Fraser, Lowney and Cauley is about the fastest in the State and their line has been strengthened by moving Stanwood from end to center. Colby's lineup is much more formidable this year than last and every man is playing a stiffer and scrappier game. On the defense Fraser plays a tackle thereby adding a great deal more strength to the line.

Lowney is reported to have entirely recovered from his injuries and with the field dried up hard, as it now promises to be, this brilliant halfback should shine on Saturday. He has always been a wonder at carrying the ball and much is expected of him by the Colby followers. As this is the first time this season that Lowney has been entirely free from injuries too much cannot be expected from him. Throughout the year the reports of various games have always commented upon the great playing of "Ginger" Fraser. His all round work and especially his punting have been great factors in Colby's success on the gridiron this Fall. Unlike the Maine Team, all of Colby's attack is built around Fraser, while Maine has no particular star. Cauley, the Colby fullback, is new to the followers of the game in this state, but he is touted as a wonder and will bear watching in Saturday's contest.

After last Saturday's game with Bates, several Maine men were injured and it is doubtful if they play Saturday. Martin is still on the injured list and probably will not play until the Bowdoin game. Cobb is again in good condition, but Bernheisel still needs a rest. The line is in perfect trim and it is upon them that Maine's hopes for stopping the Colby backs are placed. Long, hard drill is now in order, every night under the lights, for the Varsity and Coach Riley is giving them the final polish for what he considers the stiffest proposition of the year.

For the last two years Maine has easily defeated Colby 20-0 and this year Colby believes that the time has come for a little revenge and the student body is expected to come up to Orono on a special train next Saturday with plenty of enthusiasm and money to show their faith in their team.

### JUNIOR MASKS INITIATION

The Junior Masks' Initiation was held Tuesday evening at the library.

The following men, all of whom have been prominent along various lines during their course at the University, were initiated: David S. Baker, of Caratunk, Me.; Robert T. Clark, of Lincoln, Me.; Madison L. Gilman, of Waterville, Me.; George H. Bernheisel, of Bloomfield, Pa.; Norman S. Donahue, of Luthersburg, Pa.; Frank D. Freese, of Bangor, Me.; Raymond H. Fogler, of Rockport, Me.

After the initiatory ceremonies were over light refreshments were served.

### THE RESEARCH CLUB

The Research Club is among the newly organized clubs at the University, having been organized but a year and a half. Its membership at the present time is fifteen, being open only to members of the faculty. The officers for the year are:—Professor Wallace Craig, president; Professor L. M. Burghart, secretary.

The object of the club is to discuss scientific papers, which are brought up at the monthly meetings by different members. At present the papers, which are brought up for discussion, relate either to chemistry or biology.

### ORGANIZATION OF MAINE ACADEMY

The organization of the Maine Academy of Science will take place at 10.00 A. M., Saturday, at the Bangor High School. Besides the adoption of a constitution and by-laws, several interesting scientific papers will be presented. A cordial invitation is extended to students and all others who are interested in the popularization of science.

### THE 1915 PRISM

#### To be a Track Number

Contracts for the printing and engraving for the 1915 *Prism* have been signed. It will be printed at The Journal Printshop, Lewiston, and the Electric City Engraving Company of Buffalo, N. Y., will do the engraving. Both of these concerns did the work on the 1914 "Prism" and were highly recommended by them.

Following the scheme started last year the new *Prism* is to be a track number. That is a section of the book will be given to the history of track athletics at the University of Maine.

The plan used in former *Prisms* will be followed. There will be several sections, for example, one will be devoted to the faculty, one to the classes, social affairs, fraternities, clubs, athletics, and grinds. The help of the whole student body will be greatly appreciated by the board who have the work in charge. Especial cooperation is needed in the grind section.

More sophomores and freshmen are needed to work out for positions on the board of the class "*Prisms*." Perhaps you are the man we need.

### OFFICERS IN MILITARY DEPARTMENT

The following officers have been appointed subject to the approval of President Alecy:

#### "A" CO.

W. F. Pride, to be captain.  
C. B. Coffin, to be 1st Lieutenant.  
L. M. Dorsey, to be 2nd Lieutenant.

#### "B" CO.

G. S. Ferguson, to be captain.  
E. F. Hanson, to be 1st lieutenant.  
L. P. Stewart, to be 2nd lieutenant.

#### "C" CO.

F. J. Norcross, to be captain.  
L. B. Tolman, to be 1st lieutenant.  
C. S. Erswell, to be 2nd lieutenant.

#### "D" CO.

S. B. Hayes, to be captain.

#### "E" CO.

O. B. Higgins, to be captain.  
C. C. Jones, to be 2nd lieutenant.

## CROSS-COUNTRY PROSPECTS GOOD

### State Meet Noverber Fifth

The cross country team is hard at work preparing for the coming State run. The first race of the season was successful in a way and yet it shows that there is much room for improvement. As Coach Smith stated in the last issue of the *CAMPUS*, there are some disappointments which must be remedial before the team may feel in a measure secure of the championship. The three new members of the team Preti, Dempey and Gerrish have shown up even better than Towner, Bell and Brooks, members of last years championship team. These veterans, however, are coming along fast and will, no doubt, be in fine condition by next Wednesday. It is generally conceded that Colby is the only team which will make the Maine men travel any. At present it looks like an even chance but with a week's practice before them our men should improve considerably and it is the opinion of Capt. Towner that they will. The team leaves next Tuesday morning for Waterville.

The race comes Wednesday afternoon. Gov. Haines will act as starter.

### RIFLE CLUB STARTS SEASON

At the meeting held by the Rifle Club in Alumni Hall, Wednesday noon, about forty new men signified their intention of joining the club and trying out for the rifle team. It is hoped that many more men will join, because a winning team can only be developed thru constant practice and competition. Every man who joins the club will help toward putting the University of Maine Rifle Team at the top of the slate. The mere fact that a fellow has never shot much need not discourage him. The schoolboy who won the world championship last year (a junior in high school) had never shot any until he entered high school. In two years he won the world's school-boy championship and was placed on the all American team, an honor which no school boy ever before received.

The rifle range in the top floor of Lord Hall will be put in condition and practice-shooting commenced at once. Competitive matches for positions on the team will commence after the football season is over. After the temporary team is picked any member of the club can challenge a member of the team to a dual match and if he wins takes the latter's place on the team. Rifles will be assigned to several men at the various fraternity houses and at the dormitory. Members of the club may obtain the rifles as well as cartridges from these men, a list of whom will be posted and published later. Any men who were not present at the meeting may join the club by notifying F. J. Norcross and paying dues of membership.

Norman S. Taber, the famous Brown athlete, has won the Rhodes Scholarship and recently sailed for England. During his years at Oxford it is expected that he will materially strengthen the Oxford track teams.

## DEAN STEVEN'S CHAPEL TALK

What Should a Student Bring to College who wishes to get the Most out of a Curriculum in Liberal Arts?

On last Friday morning, Dean Stevens gave the following talk to the student body in chapel. His subject was "What should a student bring to college who wishes to get the most out of a curriculum in Liberal Arts?" This was the fourth of a series of Chapel talks by the various Deans and was one of the most interesting. The great benefit to be derived from these lectures is a closer acquaintance with the general characteristics of every department of the University.

My task this morning is essentially different from that of the gentlemen who have preceded me. One who is training for agriculture, technology, or law, has his work quite definitely outlined from the beginning, and he can concentrate his intellectual energy upon the accomplishment of a single purpose. Here, however, we have in view no such clearly defined aim. It is likely that ultimately the student designs to become a physician, a lawyer, a clergyman, or a man of business, but his undergraduate work does not fit him for these positions in quite the same manner as do the courses laid down in the other colleges. I am not prepared this morning clearly to distinguish between a liberal and a technical training, and I certainly wish to establish no invidious comparisons between them. The methods and scope of the former, may however, be illustrated in this wise: Suppose a young man should come to our physical director and tell him that he wished to become a proficient sprinter. He would be given a course in general athletics for the purpose of building up his physical system, and later on especial attention would be paid to those parts of the body which would be used in his work as a sprinter. Again, if one designed to train himself as an expert oarsman he would never think of beginning the exclusive exercise of his arms until he had thoroughly trained his whole physical system and then the arm exercise would be easy and natural. The ideal preparation, therefore, for any occupation in life whatsoever, always has been, and always will continue to be, a liberal training in those subjects which lay broad and generous foundations; and then the training for special lines of work will appropriately follow. Our best universities, such as Harvard and Johns Hopkins, demand for admission to their graduate technical schools an undergraduate collegiate training which has led to a bachelor's degree. The student then begins his work in law or medicine with a power vastly superior to that of the untrained man who comes immediately from the secondary schools. If, then, I were to name the prerequisites for success, in a curriculum in liberal arts, I would mention first of all, a lively appreciation of such facts as these: as full a realization as possible of the meaning and scope of an education; not as a trade, not as a vocation, but as a means of power and culture for the sake of power and culture. Whatever savors of aristocracy is of necessity antipathetic to the normal American mind. No lines drawn from considerations of wealth or birth should ever separate us from our intellectual ambitions. But I strongly believe in an educational aristocracy, based upon earnestness of purpose and intellectual appreciation; the first the prerogative of every student, the second in no small degree the gift of God.

Educational theories not unlike social, political, and religious theories, are certain to go to extremes. A hundred years ago the college curriculum consisted largely of Greek, Latin, Mathematics, and philosophy. Any work in natural or physical science would have been regarded as entirely out of place. This is an extreme view in education, but no more extreme than the modern view actually expressed by reputable school men that a year's training in stenography is a full equivalent of a year's training in Latin in its development of mental power; and that a

few hours spent at home washing dishes or splitting wood should be regarded as a fair equivalent for work in algebra and geometry. These are passing fads which we will remember with an indulgent smile when the educational pendulum shall again approach a condition of equilibrium. Surely it is greatly to be regretted that the old idea of education for education's sake is becoming gradually lost sight of. No self-respecting man would recommend a public profession of a religious life for the sake of its social, political, or financial advantages. The term vocational religion has not yet been introduced into our pulpits. But religion and education are so closely allied that there should be no serious analogical jar when we protest against the commercializing of education.

We, in America, have made tremendous progress in the past fifty years. At one of our chapel services of the last summer term a distinguished educator told of the marvels of science and invention which one might note in a single day. He mentioned the telephone, the talking machine, the trolley car, the electric light, the elevator, the aeroplane, and many things besides—truly a noble list, but totally materialistic! Fifty years ago Dickens, Thackeray, and George Eliot were writing novels; Leighton and Millais were painting pictures; Verdi and Wagner were composing music; and Spurgeon Beecher, and Edward Everett Hale were preaching. We should beware lest our over-complacency be construed as an apology for the grossest materialism. The primary prerequisite, then, for a liberal arts student is an attitude of mind that desires scholarship, that welcomes hard work for its drill, that believes that life is more than meat and the body more than raiment.

Why has Greek gone out of our school and college curriculum? There are a variety of answers to this question, but the sincere reply is, because Greek is hard. Students are not willing to pay the price of such culture as a study of this language and literature affords.

No character ever challenged the admiration of the world, which did not meet and welcome the moral difficulties of life; and to this rule the Son of God was no exception. The guilelessness of Eden and the perfections of Utopia do not very largely appeal to us moderns. But in educational matters the old fashioned intellectual struggle with the difficulties of the curriculum has largely given place to the consistent habit of appealing to the Dean for permission to drop the subject.

Professor Ladd, of Yale University, tells us that in his college days he liked Greek and philosophy, but he did not like the calculus. But he adds, I studied calculus with more carefulness on that account. I learned to conquer every task before leaving it; and I would not give this bit of learning for all that is to be got from the most attractive elective courses of Harvard or Yale.

Upon very high authority we are told that if we seek first the righteous kingdom of God, all other things will be added unto us. And so it is a pleasing fact that if in education we seek knowledge for its own sake, the power which it brings us will enable us to explore new fields with comparative ease. I am only quoting well-known educational specialists when I say that it is believed that three years of liberal training and one year of special training would make better engineers, agriculturalists, and lawyers than three or four years of specialized work. The late Professor James was a preacher of pragmatism which means that the supreme test of value consists in the result which are produced. It is idle to argue regarding the merits of various lines of work; we shall never agree, and it is best that we should not. But if we are pragmatists, we come to know that there is a power in the old-fashioned liberal education. From whence it comes, we are not concerned, but it would be futile to dispute it. We pay homage to the biologists, who, by virtue of a thesis which has yielded him a doctorate, has earned the right to be

called the greatest living authority on the digestive system of a snow flea; but we take off our hats to the man who is able to fill us with a proper appreciation of the mysteries of life and the processes of nature. Let me say, then, in conclusion, and especially to those to whom these remarks are more directly addressed, that what we wish to have you bring to the College of Arts and Sciences is a *passion for knowledge*. Do not fear that this will lead you to become educational misers, for knowledge of this character thrives best when shared with others. Add to this passion for knowledge a proper perspective regarding educational values; bring to bear upon all your work a dogged determination to overcome the difficulties, and an appreciation of a culture which is entirely free from materialistic considerations, and the kingdom of the scholar is yours for the asking.

## LOCALS

Pres. Aley will speak to the Rhode Island Teachers' association at Central Falls, R. I., Thursday, October 30. Subject, "Relation of Education to Progress."

Mr. J. B. Norcross of Portland was the guest of his son F. T. Norcross '14, Phi Gamma Delta house last Saturday.

Charles Harmon of Lowell spent the week end at the Phi Eta Kappa house.

Miss Ethel Harrington and Miss Christine McLoud were at the Phi Eta Kappa house over Saturday.

Percy E. Jackman, '13, was a guest at the Delta Tau Delta house last Sunday.

R. S. Ferguson leaves for Brown University Friday night to attend the Kappa Sigma Initiation there on Saturday.

Thomas Arbuckle ex-'13, attended the Maine-Bates game and spent Sunday at the Sigma Alpha Epsilon house.

Mr. Pelletier of Biddeford spent most of last week with his friend Leon Fields at the S. A. E. house.

The Initiation Banquet of Phi Eta Kappa will take place Wednesday, Oct. 29, F. B. Ames, '13, will act as toastmaster.

James T. McDonough and William F. Carrigan of Lewiston, were visitors at the Theta Chi house, Saturday as the guests of John A. McDonough, '15.

Lloyd McFadden ex-'15, Auburn was a guest at the Theta Chi House Saturday and Sunday.

Walter Murray '13, who has stopped a week at Theta Chi left Monday for his home in Lynn, Mass.

Lloyd Crites and Charles Foss of Lewiston, were week end visitors at Theta Chi as the guests of Charles Penney '17.

The initiation banquet at Theta Chi will be held Saturday night, November 22.

A. G. Taylor '04, was at the Bates game and was a visitor at the Beta Theta Pi house.

F. W. Haines ex-'13, was a guest at the Beta Theta Pi house for the week end.

The initiation banquet of the Beta Theta Pi, will be held Thursday, evening, Oct. 30.

Mrs. Tarr, Mrs. Callahan, Mrs. McCusker and Mrs. Davis were all interested spectators at the Bates game and were entertained at the Theta Chi house afterward.

The initiation banquet of the Sigma Nu house will be held Thursday evening, Oct. 30.

Thos. Mangan '16, entertained Mr. E. L. Taber of the Bates team over Sunday.

## EDITORIAL.

It is about time to board the special train to Brunswick. If the Senior's memory serves him rightly there were ten cars on the train to Waterville last fall and a crowd of 800 Maine supporters.

**The Senior Says**

This year we have a total registration of 1047. The Senior sees no reason why we should not take a train of twelve cars to Brunswick for the Bowdoin game. The expense is lower than summer excursion rates. Next Thursday the largest mass meeting of the year is to be held in Alumni Hall. This meeting is for the purpose of boosting the special train for the Bowdoin game. A list of speakers better than any so far this year will be on hand to hand out the enthusiasm in great big bunches. If you come to the mass meeting, the Senior says, that you will undoubtedly be on board the special train one week from Saturday. That is the brand of enthusiasm that will be on tap next week. See that you are "one of those present." We must have at least 400 promise to go on the train in order to guarantee expenses to the railroad company. The Senior will be there, will you?

## DR. McKEE ELECTED TO IMPORTANT COMMITTEE

At a recent meeting of the American Chemical Society, Prof. R. H. McKee at the head of the Chemistry Department at the University of Maine, was chosen as one of a committee of six, to select the winner of the Perkin Medal. The Perkin Medal which has been awarded six times in the past, is given to an American chemist who discovers an industrial process which proves of important practical use. The medal is the highest honor which America can bestow upon the chemist and is second only to the Nobel Prize.

## ENGINEERING NOTES

## Electrical Laboratory

A new set of electrical apparatus is being installed in the Electrical Laboratory in Lord Hall, which consists of a three phase alternator and a direct current generator connected to a three phase synchronous motor.

The switchboard consists of a panel for each of these machines together with a panel synchronous converter with a panel synchronous converter and two panels for laboratory distribution.

The foundation for the three unit set is completed and also the switchboard pit.

This work is being done by the Electrical Department and the electrical engineering students of the two upper classes. They expect to complete the work by the middle of the year.

## MECHANICAL ENGINEERING

The Corliss engine formerly in the old power house has been removed to the mechanical laboratory in Lord Hall. The engine has been equipped with a new Alden Absorption Dynamometer for use in making efficiency tests of engines.

With this new apparatus it is expected that a much better course in steam engineering can be offered.

An Amsler Tortion Machine has also been purchased for the laboratory. This machine is being built at Zurich, Germany, and it is expected to be installed by the spring semester.

After the installation of this Tortion machine the University will have quite a complete laboratory for testing the strength of material.

The U. of M. student Branch of the Society of Mechanical Engineers held their first meeting of the year Wednesday, Oct. 29, and elected a nominating committee to select candidates for the officers of the coming year. The election takes place on Monday, Nov. 2.

The Society intends soon to hold a smoker and discuss the program and plans for the year.

A pump pit is being installed in Lord Hall and the piping is to be directly connected with this building.

E. W. Jennison, '13, has been appointed instructor in Mechanical Engineering in place of R. O. Jackson who was to have taken the position.

## CIVIL ENGINEERING

The Civil Society of civil engineers held a meeting and smoker Wednesday night, Oct. 29, Dean Boardman spoke on "The Choice of Theses."

Fred J. Louis '14, and M. F. Banks '15, spoke.

## SOME FRESHMAN

"Dear Kid, How is little Tootsie today?" began the letter which fluttered from a freshman trigonometry as the instructor picked up the book which had been left in the room. The class had no eye for the book. Each and every eye, including those of the instructor, focused upon the sheet which floated to the table full in sight of all. "That's how one man spends his time in class," remarked the instructor. "Where is the book?" inquired one curious member of the class. "Let's see who wrote the letter." Poor freshie was caught for fair, for there on the fly leaf stood out his name in bold relief. With an amused smile the instructor laid the book aside.

Just then the door opened and a short, dark freshman pulled off his white buttoned cap and walked in. "Did I leave a trigonometry here?" he demanded without apology for his intrusion and in a tone which indicated that he needed sophomore attention. "There is a trigonometry over here," answered the instructor walking over and picking up the book. "You may have it." The freshman opened the book, glanced at the fly leaf which had so interested the class, and shuffled from the room. The class hopes the letter was finished in proper fashion and that the "Dear Kid" received the loving missive freshie had begun to his "little Tootsie."

## SIGMA NU INITIATION

Delta Nu Chapter of Sigma Nu held its annual initiation and banquet at their chapter house, Thursday evening, Oct. 30, 1913. The following men were initiated:—

Earle L. Emery, Fy., '17, Salisbury Cove.  
 Earle R. Brawn, '17, Ee., South Portland.  
 Curtis V. Dyer, '17, Bl., Cornish.  
 Walter C. Jones, '17, Ec., Portland.  
 Nelson F. Mank, '17, Me., Portland.  
 Roger P. Merriman, '17, Ce., Bangor.  
 John M. Pomeroy, '17, Me., Calais.  
 William A. Simpson, '17, Ag., Marlboro, Mass.  
 Donald G. Ward, '17, Ee., Portland.  
 Harvey C. Waugh, '17, Me., Levant.  
 Carl G. Whitaker, '16, Me., Bar Harbor.  
 Roger B. Hill, '17, Ce., Eng., Peabody, Mass.  
 Roy G. Higgins, '17, Ce., Bar Harbor.

## MAINE TEACHERS' ASSOCIATION

The twelfth annual meeting of the Maine Teachers' Association will be held in Bangor, October 30 and 31. The meeting will be opened by an address by Hon. William T. Haines.

The following are the speakers from the University and their subjects.

The Reorganization of Our School System,  
 Professor Arthur J. Jones  
 Correlation of English with Other Subjects,  
 Professor Roland P. Gray  
 Science in the Practice of Home Economics,  
 Professor Charles W. Easley  
 R. S. Ferguson, Maine '14, will invite the teachers attending to visit the University.

## RESOLUTIONS ADOPTED BY ALPHA OMICRON PI

Whereas, God, in his divine wisdom has called home from our midst our dear and beloved sister, Asenath Helen Russell, and

Whereas, we, her sisters in Alpha Omicron Pi, wish to express our deep grief and sorrow in the loss of our true friend, be it

Resolved that we extend to her family our heartfelt sympathy in their great sorrow, and be it further

Resolved, that our badge be draped in mourning in respect for her memory, and finally be it

Resolved, that a copy of these resolutions be sent to her family, printed in the University Publications, and spread upon our chapter records. Signed

ESTELLE I. BEUPRE  
 RACHEL H. WINSHIP  
 DORIS CURRIER

October 29, 1913.

## WILLIAM EMERY PARKER

Whereas, through the operation of Divine Law, our fellow alumnus, William Emery Parker, has been taken from us; and

Whereas, we, the members of the Boston Alumni Association of the University of Maine, wish to give expression to the solemn sense of loss that we feel in his death and to record our sincere respect to his memory,

Now, Therefore, be it

## RESOLVED

That, in the death of William Emery Parker, the Boston Alumni Association has lost a valued member and the University of Maine a true and loyal alumnus.

That we extend to his parents our deepest sympathy; and

That a copy of these resolutions be sent to his parents, printed in the University publications and spread upon the records of the Association.

Boston Alumni Association of  
 University of Maine

By J. H. MCCREADIE, '03.  
 Secretary.

## INTERCOLLEGIATE PEACE CONTEST

It has been decided this year to hold the state contest for the prize offered by the "Intercollegiate Peace Association," at the University of Maine. The preliminary contest for speakers from this institution only, will be held before March 15, 1914, the exact date to be determined later. The following students have signified their intention of entering the preliminary contest: Paul W. Monohon, Preston H. Morton, Robert F. Thurrell, Maynard F. Jordan, Albion F. Sherman, Earl S. Merrill, Ross H. Varney, Carl Magnus, and George H. Garrison.

Those mentioned above are not the only ones allowed to enter this contest, for any upper classman is eligible.

Last year the state contest was between Bates and Maine but this year it is possible that Colby and Bowdoin may enter although it has not been definitely arranged. The winner of the preliminary contest will represent the University at the state contest. The winner of first prize at the state contest will represent the State of Maine at an interstate, group contest, which comprises five or six states. If the speaker representing Maine at this contest secured first prize he would be allowed to speak in the national contest.

All orations will be limited to sixteen minutes in delivery. Speakers will be called down at the end of eighteen minutes.

The state contest for this year will be held in April, 1914. The group contest will be held the latter part of April, or early in May and the national contest about the middle of May. The prizes at the state contest will be \$100.00 for the first prize and \$75.00 for the second.

To those who lack oratorical ability but do have the ability to write, there is the prize of \$100.00 offered by the "Lake Mohonk Conference on International Arbitration." This prize is given to the undergraduate male student of any college in the United States or Canada who, in the opinion of the judges writes the best essay on the subject of "International Arbitration."

Each essay should show an understanding of the nature and history of international arbitration. Each contestant is requested to append to his essay a list of works consulted, if possible with specific references.

Essays must not exceed 5000 words and must be written, preferably in typewriting, on one side only of plain paper of ordinary letter size (8 x 10 1/2 inches). Manuscripts not easily legible will not be considered.

Each essay should bear a nom de plume or arbitrary sign which should be included in an accompanying letter giving the writer's real name, college, class, and home address. Both letter and essay should reach H. C. Phillips, Secretary Lake Mohonk Conference, (address, until December 1, 1913, Mohonk Lake, N. Y.; December 1, 1913 to April 1, 1914, 3531 Fourteenth Street, N. W., Washington, D. C.) not later than March 15, 1914. Essays should be mailed flat.

The award of the prize will be made at the Lake Mohonk Conference in May, 1914. The judges will be: Hon. Charlemagne Tower, former ambassador to Germany; Rear Admiral John P. Merrell; Mr. Arthur D. Call, Executive Director, American Peace Society.

There is a similar contest for women undergraduates. The rules are the same in both cases but in the case of the women's essay there is a first prize and a second prize.

Mr. Raymond Floyd '13, is expected as a guest at the Phi Kappa Sigma house for the week end.

Mr. James Morse is the guest of his brother W. M. Morse '14, at the Phi Kappa Sigma house.

John Carleton '13, is at the Alpha House this week.

W. S. Adams of Milo will spend Saturday with his brothers H. P. Adams '14, and H. K. Adams '16, at the Phi Kappa Sigma House.

## GENERAL LECTURE

## Prof. Huddilston on "The Renaissance in France"

On Wednesday afternoon Prof. Huddilston gave the sixth of the course of general lectures. His subject, "The Renaissance in France," was handled in a very interesting manner and proved to be one of the most interesting talks of the series. It will well repay anybody to drop into the lecture room of the library on Wednesday afternoons at four-thirty to hear one of these lectures. Following is a summary of Prof. Huddilston's remarks.

The Renaissance may be defined as the readjustment of man's vision with regard to life in its broad bearings and lasted throughout some centuries. In previous lectures the courses of the great movement has been studied in Italy where as a matter of course it originated. Italy was the natural setting for the revival. It was only natural for the Italians to take up the culture and learning of their forefathers and realize that they were the natural heirs of Rome. The course of the Renaissance in France brings us one step nearer home. We must consider the agents in the migration of the movement and account for its crossing the Alps into Gaul.

First among these agents we find the individual travelers thru Italy. These men were for the most part painters, sculptors and architects who went south to study. From the enthusiastic sojourns of these men France received her first knowledge of Italy and the wonders of the Renaissance.

Another important factor was the invasion of Italy by French Armies. The most notable of these expeditions were those of Charles VIII, Louis XII and Francis I. The thousands of Frenchmen in the armies were followed by smaller armies of men who were the leaders of thought in France. These latter carried back with them much of the intellectual wealth of Italy. These invasions ended in 1525 with the capture of Francis I. Francis was a captive in more senses than one. He did more than any other monarch in the Renaissance. He is known as "The Renaissance King". Thru him were established the connections which were to bring to France the learning of Greece and Rome.

Francis engaged many of the great masters of Italy to come to Paris to work. Chief among these was Leonardo da Vinci who was engaged to go to Fontainebleau to decorate the palace there. Da Vinci did a great amount of work there and died in the arms of Francis.

The marriage of Francis I to Catherine de Medici was perhaps one of the greatest influences on the Renaissance which was brought to bear. Catherine, it will be remembered was the daughter of Lorenzo de Medici and the grand-daughter of the celebrated Lorenzo the Magnificent. She not only became the wife of Francis but the dictator of French policy thruout three generations.

A study of this sort can perhaps best be closed with a consideration of that group of men who clinch all that has gone before with their work. This group of seven men called themselves "The Pleiad" after the ancient body of men in Alexandria. Their object was to put the French language on a basis where it could be adapted to poetry. In this they were highly successful. They solved the problems of verse and meter and paved the way for Moliere, Racine and even Hugo. There is perhaps no better example of the direct influence of Classical Antiquity on Modern Civilization.

Mr. J. H. Carter, superintendent of schools in Livermore Falls and Mr. Frank Byrum, principal of Livermore Falls High School were on the campus Wednesday.

Barnard at last decided to abolish all sororities for three years. This is the result of long deliberation and thought. The Student Council is the governing factor in the college.

## HOW ABOUT THIS?

## Metropolitan Life Insurance Company

LAWRENCE ROONEY  
SUPERINTENDENT

TELEPHONE 408-4

BANGOR, ME., Oct. 20, 1913.

Mr. F. M. SAMPSON, Agent,  
Bangor, Maine,

Dear Sir:

You are making a splendid fight for supremacy among the leading agents of Maine, being but \$7,000 behind Mr. B. B. Anderson, who is credited with "placed business" to date of \$65,000, as against your \$58,000. The difference, you see is slight, and should be easily overcome by you with a little extra effort. It would surely be a nice thing to be able to hail F. M. Sampson, an alumnus of the University of Maine, as the leading agent in Maine for 1913.

What do you say? Can you land the honor?

Yours for success,

L. ROONEY, Superintendent.

## THE NEW COURSE IN JOURNALISM

The new course in Journalism, which is now offered by the University of Maine seems to be a popular one at such an early date, there being at the present two students majoring in this course, while quite a large number of the Freshmen have signified their intentions of doing so. At present the course comprises the strong training in English composition and general training which is given to those students majoring in English and in addition Eh 31 and Eh 32. Both these courses are taught by Mr. Perry. In Eh 32 which is the beginners course, and which is a Junior subject, the chief aim is to teach the principals of news gathering in so far as possible. Great emphasis is laid on the writing of a new story, and much of the work is largely devoted to that. The purposes is to get men to understand what news is, not only here on the campus, but everywhere, recognize it, and be able to write it in newspaper fashion. To this end men are sent to Bangor to gather items, and these are then put into newspaper form by the men themselves.

Eh 33 is a continuation of Eh 32 and is taken up in the senior year. The work consists essentially of editing, headline writing, and proof reading, as well as the writing by the students of their own interviews. The men in Eh 33 direct the work of the men in Eh 32; they meet as an editorial council, and discuss editorial questions. There is also work in special departments, such as interviewing, writing of paragraphs and work in the various desk positions which are associated with the average newspaper. Dramatics has its place in this course, one of the requirements being to study the history of drama and later to write intellectually of any performance.

Part of the work in these courses is confined to correspondence as far as publicity goes, and the New York Times is used in both courses as supplement of the regular work. The men write stories of incidents around the campus, and maintain regular correspondence with New York Transcript and all papers having college departments. Hereafter all persons, looking at all suspicious to our reporters here on the Campus will be promptly interviewed.

## MUSICAL NOTES

## Maine Night Music

Some time ago, at a meeting of the old members of the Glee Club it was decided that the Club would take part in the program for Maine Night. In order to do this it was obvious that a call must be given at once for new men. In response to this call that was given a goodly delegation appeared at the next meeting. A chorus has been selected from the members and those who are trying out. The two most prominent selections to be rendered are "Fill Your Steins" by Mittel, and "Hail Alma Mater."

Those chosen for the parts are as follows:

1st Tenors: Goldsmith, C. H., '15; Bradbury, B., '16; Bradbury, I. M., '14; Whittier, J. L., '16; Hurd, E. C., '17; McCusker, J. A., '17.

2nd Tenors: Ham, E. G., '16; French, N. R., '14; Thomas, P. M., '14; Hill, M. L., '17; Crowell, F. D., '17.

1st Bases: Thurrell, R. F., '15; Pierce, R. T., '15; Hanson, E. F., '15; Calhane, G. J., '17; Goodwin, A. M., '15; Youngs, F. S., '14.

2nd Bases: Higgins, T. C., '14; Haskell, T. W., '14; Varney, R. H., '15; Currier, K. M., '16, and Pitman, L. T., '17.

Trials for the Glee Club will probably take place immediately after the Thanksgiving recess.

At a recent meeting of the Mandolin Club, Gerald A. Rounds, '14, of Portland, was elected leader, succeeding R. H. Bryant, '15, who did not return to the University this year.

The University Band has been practicing for three weeks in preparation for "Maine Night" and the Bowdoin-Maine football game. The band is to have one drill before the latter event and will wear military uniforms to Brunswick.

SATURDAY, NOV. 8

Special train leaves at 6.30 for the Bowdoin-Maine game at Brunswick.

## REDPATH LYCEUM COURSE

The Redpath Lyceum Course will be given in Bangor City Hall, under the auspices of Manager Stephen Boggett of the Bijou theatre. This course consists of three lectures by well-known speakers and of a Shakespearean play. The first lecture will be given by Dr. Harvey W. Wiley, on November fifth. He will lecture on "The Public Health Our Greatest National Asset." This was given by Dr. Wiley 206 times during the past year. The next lecturer will be Champ Clark, Speaker of the House of Representatives at Washington. He will deliver his lecture on November 21. The third lecture will be delivered by Miss Virginia Brooks, January 21, and will be about "The Underworld Campaign." Miss Brooks is well known through her articles on similar subjects in the Literary Digest and like magazines. The fourth and last in this Lyceum course will be the presentation of "The Merchant of Venice," February sixteenth, by the Ben Greet players. This company has only had two weeks vacation during the past year. There are no stars in this company for as Mr. Greet says "The play's the thing."

## NOTICE

The Round Table will hold its regular business meeting next Tuesday, November 4, at 3 P. M., in the Mt. Vernon House.

William Nugent '16 entertained his brother John Nugent of Portland over the week end.

## "CLOTHING THAT'S FIT"

must be made to fit—and that means made for YOUR individual measurement from the very beginning. Discerning men have found that decent ready-made clothing costs about the same as decent custom-made—a fact which puts the made-to-measure clothing decidedly at the head. I have a particularly fine showing of the choicest Spring goods, and am prepared to produce faultless clothing at moderate cost. Every particular dresser—yes, YOU—should be interested. Step in!
