

Plenty of "Pep" at  
First Rally of Year

Coach Kanaly Praises Freshmen  
for Interest in Track

The first rally of the year was well attended by the student body. From the time that the band, under the leadership of "Hal" Chase, played its first march, until Coach Brice had finished speaking, the air was filled with cheers, which could be heard over the campus. "Ollie" Berg was master of ceremonies.

As first speaker of the evening, Coach Kanaly showed the student body the prospects of our cross country, relay, and track teams. Coach Kanaly called on the upper classmen to turn out for track. According to figures kept by the coach, the freshman class has as many at work as the total of candidates from the three other classes. In conclusion, Coach Kanaly said, "I hope that the Rhode Island State game tomorrow will be the first of a series of notches toward the state championship." Since coming to the University, Coach Kanaly has proved very popular with his charges.

Captain "Sim" Raymond of the cross-country team outlined the schedule of the coming season. This includes the triangular meet with Dartmouth and Harvard at Boston, the state meet at

(Continued on Page Four)

Dr. Peterson's Book  
Is Published in Rome

The American Academy in Rome has recently published as the first volume of a series of monographs dealing with matters of an archaeological character a work entitled "The Cults of Campania" by Dr. Roy M. Peterson, Professor of Spanish and Italian in the University of Maine. This is concerned with the field of early religions, and treats of the various divinities that were worshipped in the old district called Campania, which included that part of Italy adjoining the Bay of Naples. It deals with Capua, Neapolis, Cumae, Pompeii and other neighboring towns. It aims to bring together the evidence on the subject scattered thru the Greek and Latin authors and that of the inscriptions and other remains. In the past while enough attention has been given to the study of the cults of Rome itself, comparatively

Freshman Reception  
Attracts Big Crowd

The annual freshman reception was held in the gymnasium Saturday, September 22.

A large attendance enjoyed the social hour which was spent in making acquaintances among the entering class.

In the reception line were Dr. and Mrs. C. C. Little, Dean and Mrs. Stevens, Dean and Mrs. Hart, Professor and Mrs. Pollard and representatives from the various societies of the University.

Following the reception short speeches were made by A. B. Clark, A. L. T. Cummings, Rev. Allyn K. Foster and Dr. C. C. Little, welcoming the freshman class and encouraging the students at the University for the highest ideals in scholarship and college activities.

The latter part of the evening was given over to an informal dance with music furnished by the students.

Sophomore Owls

The pledges for the Sophomore Owl Society were announced between the halves of the football game Saturday by "Pat" Patten. The society, which was founded in 1909, is for the advancement of athletics whenever possible and for instilling Maine Spirit in the two lower classes. The new members are to be as follows: "Ken" Barker, George Cahill, "Al" Doerr, "Zeke" Dwelley, "Bob" Durrell, "Art" Hillman, "Ginger" Fraser, "Joe" Simon, "Stove" Stover, "Ed" Stanton, "Jack" Foster, "Myles" Standish, "Phil" Rowe, "Janie" Hart, "Hap" Ward, "Freddie" New all, "Jack" Jackson.

Two New Officers  
Join R. O. T. C. Unit

Major. G. Barrett Glover and Capt. Joseph Ready Assigned to Local Corps

Two new officers have been detailed to the Maine R. O. T. C. unit this year as professors of military science. Both are exceptionally well qualified, of pleasing personality, and will doubtless be popular with the student body.

Major G. Barrett Glover, Jr., the new department head, was born in Haddonfield, New Jersey, Aug. 14, 1885. His prep school days were spent at the William Penn School, Philadelphia, from whence he entered West Point. Graduating from West Point in 1908, he was commissioned second lieutenant in the 21st Inf. stationed at Fort Logan. With the 21st Inf. he sailed for the Philippines where he served two and one-half years. Later he was transferred to the 20th Inf., and for a period was detached on recruiting at Fort Slocum, N. Y. He served a year and a half on the Texas border, and from there was ordered to Hawaii, where he served two and one-

Freshman Registration  
Smaller than Last Year

This year the freshman class is small compared with those of the last few years, but what the class of 1927 lacks in quantity, it makes up for in quality. Up to this year any student who had graduated from high school was eligible to enter Maine. This year's entering class, however, was limited to those students who, in high school, had attained the rank of 85% or better. Those not having that rank were compelled to take entrance examinations.

The total number of freshmen registered at the University is three hundred sixty, of which more than seventy are women. The enrollment of the College of Technology is more than 1/4 times that of the Arts and Sciences, and the enrollment of the latter is more than 1/4 times that of the Agricultural College. The following is the statement of the registrar, dated September 14.

FRESHMAN REGISTRATION

College of Agriculture

|                | No. Enrolled |
|----------------|--------------|
| Agriculture    | 20           |
| Forestry       | 37           |
| Home Economics | 11           |
|                | 68           |

Bananas Returns from  
Beach with a Playmate

Becomes Attached to White English Bulldog Named "Jiggs"

"Bananas IV" has returned to the campus after spending a most enjoyable summer with her trainer at the hotel "Atlantis", Kennebunk Beach. She has donned her jet black winter coat and is in the best of condition. She made many friends while at the beach and among them is a white English bulldog named "Jiggs." The bear and dog played and wrestled together all summer long much to the amusement of the guests. At the end of the season, these boon companions became inseparable. The result was that when "Bananas" started for college "Jiggs" came too.

"Bananas" and "Jiggs" made their debut between the halves of the Rhode Island State game last Saturday. A one round bout was staged in which "Bananas" was the victor.

An amusing incident occurred on August 17th. "Bananas" broke her collar in the evening and had roamed the beach at large the whole night. When Stackpole went to feed her in the morning, she could not be found anywhere. He organized a searching party that scoured the woods until 10:00 A. M. The party returned to the hotel after a fruitless search.

Upon arriving at the hotel, Stackpole received a telephone call from a cottage about a quarter mile away, requesting him to come at once and remove "Bananas" from their veranda, as she had been asleep there in a willow rocking chair all the morning and not a soul had dared to venture from the house.

Several Faculty Members  
Leave the University

Professor Chrysler came to the University of Maine in 1907, to take up the duties of Assistant Professor of Biology. In 1911, as a reward for his four years of faithful service and loyalty to the University, he was promoted to the head of the Biology Department. The success of that department from 1911 to the present time is, in a great measure, due to Professor Chrysler's untiring zeal, and his unshakable faith in the future of the University of Maine. Altho he has not felt it necessary to make clear his reason for going to Rutgers, it arises undoubtedly, from a desire to give the greatest number of students the benefits of his many years of study and research. Major Luther R. James, Professor of Military Science and Tactics, has been

MAINE TRIUMPHS  
OVER R. I. STATE

Varsity Opens Season With 14-0 Victory on Alumni Field  
Saturday Afternoon. Jack Foster is Individual  
Star of the Game

Freshmen Compete in  
Novel Lawn Meeting

Ball Games, Races, and Pie-eating  
Provide Much Amusement

By Dean H. S. Boardman

During Saturday afternoon of Freshman Week, a meet was held upon the lawns in front of Alumni Hall and the Experiment Station. In case you should care to publish an item relating to that event, I am giving you the following information:

The freshmen were divided into four fictitious colleges: The Google Optical Institute, Bananas University, Shean Conservatory of Music, and Gallagher Institute of Applied Arts. Each college entered students in the different events.

The first event consisted of two ball games. Google played Bananas, and Shean played Gallagher. The two winners played each other at the end of the meet.

The second event was an umbrella race, the contestants being four co-eds from each college. The first heat was won by Miss Sawyer, of Google, the second by Miss Johnson of Shean, the third by Miss Newcombe, of Bananas, and the fourth by Miss Muzzy, of Shean. In the finals Miss Sawyer was the winner.

The third event was a men's sack race. In the trials Turner of Shean, Trask of Gallagher, Leary of Shean, and Haines of Shean won. In the finals Turner came in first.

The next event was a candle race in which Miss Mulvaney of Gallagher was the winner.

In the wheelbarrow race, the smallest man in the college wheeled the largest. This was won by Bananas, but the names of the two winners were not taken as they were not known to the judges, and after the race they were not able to give their names on account of having no breath left.

(Continued on Page Three)

Beginning their season Saturday afternoon on Alumni Field, the varsity football men smashed through the Rhode Island State line for a 14 to 0 victory, thereby coming up to the pre-season prophecies. A spectacular 30 yard run by Blair was the feature of the game and Jack Foster, playing fullback for the first time, was the outstanding star.

Henry Small played a good game but did not get away around the end for any long runs, as was his custom last year. Fraser was the most conspicuous man in the line, making two or three difficult tackles, and Merritt outgeneraled his opponent at quarter throughout the game.

R. I. ON DEFENSIVE

Rhode Island played a hard game but they were outclassed all the time and resorted to kicking which held the score down. In the first half she made only two first downs while there were none in the third quarter.

In the last quarter she came back strong and made her best showing of the day, making three first downs and holding Maine for downs on her 30 yard line. At no time during the play was Rhode Island near scoring.

Captain Kirby played the best game for Rhode Island at left end. He completed a pass for Lamont, ran it through a broken field and made for a touchdown only to be overhauled by Captain Small and thrown after a 35 yard gain. This was the nearest the visitors came to a score. He also was down under every punt and usually nailed the receiver in his tracks. Lamont and Tweedell both played good ball.

FIRST PERIOD

The game opened with Rhode Island kicking off to Maine, Merritt receiving the kick and running it back 10 yards. Two first downs followed in quiet succession until Clark intercepted a forward pass from Small to Blair, Rhode Island then made a first down, but was forced to kick on the second.

After two short gains Blair took the ball around left end for a 30 yard gain. Another first down was made by Maine before the quarter ended, with the ball on Rhode Island's eight yard line.

SECOND PERIOD

In the beginning of the second Foster took the ball over and Small kicked the goal.

Foster received the kick following the scoring and carried it back 20 yards to the 30 yard line. By hitting the line Maine made three more first downs only to lose the ball on an intercepted pass from Small. Rhode Island then made her second first down, but as before she was not able to go farther. McIntosh then tried an offside kick which was recovered by Taylor. Then a pass from Small to Blair netted the home team 30 yards and put the ball on Rhode Island's three yard line. Blair went over for the second touchdown and Small kicked the goal. Maine kicked off and N. Smith ran the ball from the goal posts to the 20 yard line. After one attempt at carrying the ball which ended in a loss the half ended.

(Continued on Page Three)

Junior Masks

The new members of the Junior Mask Society for the coming year were announced between the halves of the football game Saturday. The names of the men are as follows: "Joe" Murray, "Jim" Blair, "Bozo" Gruhn, "Bill" Elliot, "Fat" Campbell, "Rep" Repscha, "Don" Penley, "Hap" Gerrish, "Larry" Connors, "Doc" Turner.

### Subscriptions, \$1.00 per year

Single Copies, Five Cents

Entered as second class matter at the postoffice, Orono, Maine.

The editor-in-chief is responsible for the general policy of the paper and for the editorial columns; the managing editor for the news columns and the makeup of the paper; and the business manager for the business and finances.

Communications should be at the postoffice at Alumni Hall before Saturday noon to insure publication.

Printed by the University Press, Orono, Me.

### More About Coffee

At the time of the convention of preparatory school journalists here last Spring, the editorial staff of *The Squeak* commented unfavorably on the practice of charging ten cents for a cup of mediocre coffee at the University Store. *The Campus* believes that this complaint was justified at the time and is justified now. What is to be done about it?

It is unfortunate that the University does not maintain a regular lunch counter for the benefit of students who live in Bangor and Old Town, as well as for residents of the dormitories, men and women, who ignore the breakfast bells. That these individuals are forced to patronize a counter where the prices are greatly disproportionate to the quality of the products served is calamitous.

Alleged exorbitant prices at the University Store have been criticised ever since there was a store. In some cases, the protests have been amply justified; in other cases, they have not. But in the matter of coffee, there is no excuse whatever. If thrifty Greeks can sell a generous cupful for five cents in the high rent district of a large city, there is no reason why it cannot be done here. And two thin slices of bread divided by a layer of peanut butter were never worth one-tenth of a dollar in any community.

That the profits from the University Store go to the Athletic Association of the University is no excuse for excessive prices. Why should the commuters in a student body bear the burden of an expense which all should share equally?

*The Campus* believes that an immediate investigation should be made of the cost of preparing and serving a cup of coffee.

### Why Work on the Campus?

*The Maine Campus* needs candidates to work out for all positions on the paper, which include those of Reporters, Editors and also in the business department. As the *Campus* is published entirely by University of Maine students, it is a college activity, hence remuneration for work on it is largely in the form of experience gained and the satisfaction of being busy. There are, however, certain things to be gained by work on the *Campus*, which we shall attempt to set forth.

To the undergraduate who lacks athletic ability, the *Campus* offers a splendid opportunity to help the University by engaging in a student activity. Its news publication is one of the foremost factors by which a college or university is judged, hence by contributing your services you may help publish a better paper to represent your Alma Mater.

Aside from being active, a second advantage is the experience that may be gained by work on the *Campus*. A great many people lack confidence in their own ability along literary lines. Nothing will dispel this feeling more quickly than writing a few news stories and seeing them in print. The work also aids in the development of a good vocabulary and fluency in the use of good grammar. The journalistic experience gained in college is often a stepping stone to greater achievement, for journalism is a large and fascinating profession which employs thousands of college graduates each year, a large percentage of whom get their start in college journalism.

As an inducement to freshmen to work out for the *Campus* a scholarship of fifty dollars is to be awarded to the deserving freshman who has done the most work and taken the greatest interest in the *Campus* during the year. Freshmen are required to work out all the year, submitting a news story on an assigned subject or helping with the business department each week. In May those who have worked faithfully and shown ability are elected to the *Campus* Board for the ensuing year, and have their names inserted in the paper. From this list the winner of the scholarship will be picked by a disinterested committee.

Upperclassmen who come out for the *Campus* for the first time find rapid advancement if they show ability they are elected to the board, and are eligible to fill any business or editorial position for which they may work out. Positions are filled by non-political election. The new board is elected for the ensuing year in May, and positions are filled by election as they become vacant.

Campus Pendants, attractive gold and black enamel emblems engraved with a pine tree and the words "Maine Campus," are awarded every year to the editors and business and circulation managers.

The surplus profits of the paper for the year are divided among the editors, business and circulation managers, and others who have been on the board for two years or more.

Work on the *Campus* is not difficult. For those trying out for Reporters' positions all that is required is one news story a week on assigned subject and attendance at the regular weekly meetings of the *Campus* Board, which are usually held Wednesday noons. Beginners are given easy assignments, which increase in importance as the candidates show improvement.

Taking all these factors into consideration, we assure you that *Campus* work is not only worth while, but interesting, and we urge every energetic student, freshman or senior, man or woman, to get into the game. *The Maine Campus* needs you, and you'll be helping the University; but most of all it will be you who is benefited.

### Football

The showing made by our football team in defeating Rhode Island State's strong team last Saturday was very gratifying to every member of the University. Considering the number of veterans who are out and the excellent material that is on the squad, there seems to be no reason why we should not expect a great deal from our gridiron warriors this year. There is, however, always the danger of overconfidence. The coaches can well be trusted to take care of this among the players, but it is we who must dispel it among ourselves. Let us be on hand to cheer our team to victory at every game played in the State this fall, but count no game won until the final whistle.

### A Successful Experiment

In spite of the fact that before its trial the idea of having the freshmen register a week earlier than the upperclassmen was the subject of considerable doubt and headshaking among some, the results seem to show that the plan was indeed worth while and has accomplished the purposes desired of it. Contrary to what is usually the case this time of year, the freshmen seem to know what they want and how to go about getting it.

As is stated in another part of this paper, interesting educational facts were brought to light by certain tests given. These results, however, are relatively unimportant as compared with the effects of the week's training on the freshmen themselves. Perhaps the beneficial aspects of the experiment may best be summed up in the words of a present senior who said, "This year's freshmen have learned through the front door what we learned through the back door."

### To the Freshmen

*The Campus* takes this opportunity to welcome to the University you new Maine men and women who are members of the Class of '27. We are glad to see you, and offer you our sincere friendship, loyalty, and aid when you need it, but in return we expect a great deal from you.

You are entering the University at a very auspicious time. Under Doctor Little the University is entering a period of construction which will mean much to you. Maine has awakened from a long complacency to a realization of its limitations, and is now finding its stride toward a goal of higher educational, social, and athletic standards. It is your duty and privilege to take an active part in this decisive step in the betterment of the University of Maine.

As a class you have been taught in one busy week many of the rudiments of University life, but as individuals you have much to learn. Take then, a bit of advice from we who have already experienced what you must learn before you become Seniors. Our advice to you is *study, make friends, and be active.*

*Study*, for that is the primary purpose for which you are here. The harder you study this year, the easier will be the succeeding years, and the more you learn in college the more valuable you will be when you are thru.

*Make friends*, for friendships you make in college will last you forever. Friends are invaluable, for they are a means to success, a source of happiness and delight, and a comfort in failure.

*Be active*, for by being active you will acquire success in college, and success in college means success in after life. It is said that most senior honors are won the freshman year. Hence, if you would have the senior honors, do not put off until too late your attempt toward their acquirement. No excuses that you may make to yourself are acceptable to others. You are not too busy, you *do* have time, and you *can* if you *will*. If you aspire to be a wearer of the "M", then go out and get it, but if you aren't fitted for athletics or don't care for them, then don't stop there. Be active along other lines, for there are plenty of non-athletic activities for all.

But why need we elaborate? The situation may be summed up in one word, *Work*. Work, then, will bring to you all the worthwhile things college has to offer. Through work you will gain success, and success means true happiness. "Be busy, and you will be happy" applies just as well to college as to anywhere else.

## Freshman Week Was a Success, Says Dr. Little in Interview

Questioned as to his opinion regarding the working of his plan of giving the members of the freshman class a week on the campus in advance of the coming of the upper classmen, President Little is quoted as saying:

"Although some changes in apportionment of time to the various activities will undoubtedly be made, the general plan of the week seems to me to have worked out remarkably well. Because of the constant care and hard work on the part of the group leaders we were able to obtain in many cases a real hold on the minds of the new students. There seems to be at the present time little lost motion on the part of the freshmen in finding and in changing, where it is necessary, their courses. Undoubtedly these facts have characterized the efforts in all institutions which have required their freshmen to return in advance of the upper-classmen."

"The greatest benefits of the week will, however, undoubtedly be more clearly realized when the group leaders and heads of the departments by which tests were given, get together for conferences and comparisons of records made by the freshmen during the periods of observation and examination. A superficial study shows a remarkable correlation between the general information test and the psychological test given. Undoubtedly the interrelationship between these tests and those for mathematical ability and those for English will prove one of the interesting educational topics brought up for investigation by the data collected during the week."

"Most of the members of the faculty with whom I have talked feel that the idea has distinct elements of good and that next year will enable us to perfect it to a very much greater degree."

## WE HAVE WITH US

Frederick S. Young, Treasurer, U. of M., 1914, B. S.

Dept. of Chemistry: Paul D. Bray, Associate Professor of Chemistry, U. of M., 1914, B. S.; 1918, B. Ch. E.; A. B. Cutler, Instructor in Chemistry, U. of M., 1923, B. S.; Dr. R. Macy, Instructor in Chemistry, U. of N. Y., 1920, B. S., 1921, M. S., 1923, Ph. D.

Dept. of Mechanical Engineering: Eric S. Hope, Instructor in Mechanical Eng., U. of M., 1923, B. S.

Dept. of Economics: Cornelius C. Janzen, Assistant Professor of Economics—Tabor College, 1913, B. A., U. of Kansas, 1914, M. A.

Dept. of Home Economics: Pearl S. Greene, Assistant Professor of Home Economics, Northwestern, 1909, A. B., Lewis Institute, 1914, B. S., Teachers of Col., 1923, A. M.

Dept. of History: J. Albert H. Imlah, Instructor in History, U. of British Columbia, 1922, B. A., Clark University, 1923, M. A.

Dept. of Sociology: Evelyn Buchanan, Assistant Professor of Sociology, U. of Chicago, 1920, Ph. B., 1922, A. M.

Dept. of Spanish: Edward Gomez-Duran, Instructor in Spanish and Italian, Colegio Mayor del Rosario of Bogota, 1910, Ph. D., Valparaiso University, 1922, A. B.

Dept. of Engineering Drawing: Stanley G. Hall, Instructor of Eng. Drawing, U. of M., 1923, B. S.

Dept. of Physical Training: F. M. Kanaly, Professor of Physical Training.

Dept. of Philosophy: William S. Taylor, Professor of Philosophy, Gettysburg College, 1916, B. S., Harvard, 1920, M. A., Harvard, 1921, Ph. D., Wisconsin, 1923, M. S.

The last named department was started this year at the University of Maine.

## Twenty-two Maine Men At Devens Summer Camp

The University of Maine was well represented at the Camp Devens course for the R. O. T. C. during July and August. There were twenty-two men in the advanced course and seven in the basic. In number of men attending, Maine ranked third Norwich sending forty men and M. I. T. thirty-two, but for marksmanship and bearing Maine was among the first.

Vernon Somers '26 and Robert Haskell '25 qualified as expert riflemen.

John Small '24, Stanton Swett '24, Guy Griffin '24 and Francis Weatherbee '26, qualified as sharpshooters.

Those qualifying as marksmen were: Roger McKay '24, Leslie McGary '26, Wesley Patterson '24, James Mulligan '24, Arthur Eastman '24, Clifton Ham '23, Irving Kelly '26, Henry Perkins '24, Arthur Willey '24, Phillip Taylor '24, Julien Merrill '24, and Frederick Chandler '26.

Vernon Somers also qualified as sharpshooter with the automatic pistol while John Donovan '24, Robert Haskell '25, Leonard Bragdon '24, Roger McKay '24, James Mulligan '24, and Henry Perkins '24, qualified as marksmen with this weapon.

Other men attending the camp were Paul Morrill '24, Joseph Kolouch '26, Bruce Davenport '24, Laforest Saulsbury '26, George Muzey '25, Lincoln Sennett '26, and William True '26.

Camp life was not all work. Most of the afternoons, after the two weeks of range work were finished, were devoted to recreation, including swimming, indoor and outdoor baseball, and tennis. Maine men easily won their tennis matches and furnished a pitcher for their platoon ball team. Rivalry between platoons, both in sport and work, was very intense, and the Maine-N. H. platoon was leading the others most of the time.

Every Wednesday evening was devoted to dancing, for which partners were invited to the camp from the surrounding towns by the Y. M. C. A. Secretary and the wives of the officers. Perhaps the most enjoyable part of camp were the week-end historical trips. Those who cared to go on these trips left Camp Devens Saturday afternoon on a truck for Boston, to visit such places as Concord and Lexington, Bunker Hill Monument, the Customs House, the Charleston Navy Yard, where a modern battleship was entirely explored and studied, the Harvard Museums and the beaches. Entertainment was furnished in Boston for Saturday evening by the matron of the Y. W. C. A. where dancing was enjoyed. Toward the end of camp an overnight hike and maneuvers were participated in and Maine furnished several of the student officers who were chosen as the pick of the camp.

## Sophomores Fight Way To Victory Against Odds

Outnumbered by the freshmen, but apparently better organized, the Sophomore class won the first victory between the two groups, in the bag scrap at Alumni Field, Saturday afternoon, following the football game.

The contest to see which class could move the bags of straw the nearest to their goal, was full of excitement. One bag did not move but the other was dragged back about five yards by the second-class men. The Senior Skulls, who conducted the battle royal, awarded the victory to the Sophomores.

A large number of the boys lost their shirts and other articles of clothing. Two of the students were deprived of everything except shoes and stockings. One freshe ducked inside of an overcoat double quick and hastened to his room. The other combatant wrapped himself in a blanket, and lost no time in leaving the field.

The Sophomores also won the power house scrap, reaching there first and holding possession of the whistle.

### ALUMNI NOTES

#### MARRIAGES

Cards have been received announcing the marriage of Bertha Ardis Marr to Lawrence James Hodgkins '20 in Chicago, September 4. Mr. Hodgkins has a very fine position with the Standard Oil Co. of New York.

A marriage of interest to students is that of Pauline Hathorn '23 to Alton T. Littlefield '21 on June 24. Mr. Littlefield has a position with the Central Maine Power Co. in Augusta, where they are now residing.

## Maine Triumphs Over R. I. State

(Continued from Page One)

### THIRD PERIOD

Rhode Island had the ball but was not able to gain, so kicked to Maine's 40 yard line. Maine lost the ball in the next few plays but Rhode Island only kicked back to the 35 yard line. The former made one first down but was forced to kick. The visitors started the ball on the 55 yard line but were set back for an eight yard loss in the first play. Kick again to Maine's 40 yard line. After two short gains Maine was penalized five yards for moving the ball. Then followed a kick to McIntosh who was nailed in his tracks on his 25-yard line.

### FOURTH PERIOD

Rhode Island fumbled and Small recovered the ball for Maine on their opponents' 30 yard line. Small, Foster and Blair then made another first down but the visitors' line then stiffened and Maine was held for downs. Rhode Island kicked and Maine started on another march which ended after one first down. McIntosh took the ball through the Maine line for a 15 yard gain after which several passes were tried, all of which failed, and ended in Rhode Island kicking to Maine's 40 yard line. Following several futile attempts to get through the Rhode Island line, Maine lost the ball on a forward pass.

The visitors then came back strong and made a first down and Captain Kirby made his 30 yard run on a pass from Lamont. They then attempted a forward pass which was intercepted by Jordan who had replaced Foster at full-back. In the first play Maine completed a pass from Small to Eliot which netted 15 yards. Before the ball could be set in play again the whistle blew and the game was over.

The summary:

### MAINE (14) (0) RHODE ISLAND

|                               |                           |

Substitutes: Maine, Newhall for Taylor, Gruhn for Foster, Foster for Blair, Jackson for Gentile, Jordan for Foster, Repscha for Gruhn, Merrill for Lunge; Rhode Island, L. Smith for Haslam, Makin for L. Smith, Gratton for Tweedell, Clark for Gifford. Touchdowns, Foster and Blair. Officials: Williams of Wesleyan, referee; McNorton of Tufts, umpire; O'Connell of Portland, head linesman.

## Dr. Peterson's Book Is Published in Rome

(Continued from Page One)

Little has been devoted to conditions in the provincial towns outside of the capital. In the preparation of this work Professor Peterson studied the topography of the region around Naples a few years ago and utilized the abundant resources of the libraries of Rome. The appearance of the book was delayed by the period of high costs following the War, which made its publication expedient at that time. Early in 1921 a contract was made with a firm in Rome, but this house found that their resources were not adequate for the printing because of the copious notes of the treatise and so turned it over to an establishment in Venice. It was then held up many months because of the prevalence of labor troubles. Only after the Fascists came into power and industry revived was any progress made in the publication.

## Freshmen Compete in Novel Lawn Meeting

(Continued from Page One)

In the faculty lawn-mower race, Sweetser, Little and Grover were the winners of the three heats. In the finals 'Prexy' came out ahead by a fluke, taking advantage of Swatt's waddle and Archie's bow-legs. The finals in this race will be run off again sometime in the future.

In the potato race, Cooper of Bananas took first.

The final event was a pie eating contest. This event was run off by the contestants lying flat on their stomachs, their hands extended, with a custard pie directly under their faces. At the word "go," the stunt was to consume the pie without touching it with the hands. Dow, of Bananas, showed that he was more

## ATHLETIC NOTES

victory to secure it. The Blue won last year at Lewiston and expect to dispute Bates' claim to the cup when the run occurs at Waterville.

Fall track practice has been started and a fairly stiff schedule was drawn up by Coach Kanaly, Cross Country Manager "Hot" Ayer, and Track Manager "Don" Penley. This includes besides the various cross country runs and trials, a handicap meet and a series of interclass relays. The relays will be held between halves of the football games. These are intended to arouse the interclass spirit and also the interest in track and relay. It is hoped that the results of these will interest the Boston management enough to invite the Blue runners to the B. A. A., American Legion, Knights of Columbus and possibly the N. Y. A. C. games.

An interesting fact to Maine men in connection with this, is that M. I. T. relay trials are run November 2 and the Maine trials November 3. Make the comparison of the two times in Maine's favor.

In another column may be found the football and cross country schedules for the season.

used to eating from a trough than the rest of them and took first honors. Bridges, of Coogee, however, came in a close second.

## Entertainment Furnished By Night Shirt Parade

The annual night-shirt parade occurred last Wednesday night with a fair percentage of the freshman class participating.

At promptly 12 p.m. the whistle sounded the '26 call and the freshman line began to assemble in front of the Phi Kappa Sigma house. Armed with stout paddles, the sophomores endeavored to straighten the line and proceeded to march them around the campus. At the Mt. Vernon house they were put through the usual stunts in which many humorous incidents were recorded. Any attempts at breaking the line were ruthlessly repulsed by the concerted action of the sophomores.

Strengthening their numbers by the addition of those freshmen who were quartered in the houses along the way and by others who were at Oak Hall, the freshmen made several successful attempts at breaking the line, so that by the time of arrival at Balentine Hall the ranks had become considerably depleted.

Entertainment by the remaining members was furnished to the ladies at Balentine Hall. Then the gauntlet was run, after which the crowd quickly faded away into the darkness of the night.

## Maine Forestry Magazine Meets Considerable Favor

"The Maine Forester" published last spring by the forestry club at the University of Maine has excited very favorable comment, especially from the professional men in the state. Complimentary copies were mailed to the forestry alumni and many of the Maine lumbermen. Enthusiastic replies have been received.

Articles of general forestry interest were contributed by men prominent in forestry work in this state. Examples of these are: *Management of Private Timber Lands* by George T. Carlisle, *The Spruce Bud Worm in Maine* by H. B. Pierson, *Forest Entomologist*, *Forest Fire Protection in Maine* by Samuel T. Dana, *Forest Commissioner*.

Several large companies like the E. C. Atkins Saw Co., the Oxford Paper Co., and the Machine Lumber Co., helped the cause with generous advertisements.

The honor of publishing the first issue of "The Maine Forester" fell to the following men:

Gregory Baker, Editor-in-chief.  
Wilbur Christopherson, Assistant editor.  
Karl H. McKechnie, Assistant editor.  
George H. Webb, Assistant editor.  
F. Gilbert Hills, Art editor.  
Paul Morrill, Assistant Art editor.  
Julian Morrill, Business Manager.  
Thomas Adams, Assistant Business Manager.  
Amory Houghton, Assistant Business Manager.  
Prof. John M. Briscoe, Faculty Advisor.

The University of Maine football team played its first home game Saturday when they defeated Rhode Island State. The other home game is against Bowdoin. The rest of the games with the exception of New Hampshire State at Portland, will be played on the opponents' fields. In spite of this handicap the team, with the students back of them expect to show the other team what the "Maine fight" means.

While the Varsity are away, the Freshman football team will line up against the best prep school teams in the state. Coach Murray reported that a squad of around sixty men are out at present and are rapidly rounding into shape.

Coach Frank M. Kanaly has been on the Campus the past week or more getting the Varsity cross-country squad in form. He expects to have a good squad developed under the veteran captain "Sim" Raymond, to meet Harvard and Dartmouth at Cambridge, October 26. A great deal of interest is felt by the State colleges when the State cross-country run is mentioned. Bates has won two legs on the cup and need but one more

HAVE  
YOU  
NOTICED  
?

The effect of sub-freshman week on our verdant freshmen?

How cute the boys look in their caps?

How retiring the freshman girls are after the Juniors get through with them?

MacFarland's harem isn't behaving as nicely as usual?

That Pick Boyden is burning the candle at both ends?

The six-inch apart dancing at the reception?

The upper-classmen taking back seats for the freshmen?

The décolleté costumes worn at the bag scrap?

That twenty-six has got a bit of spirit after all?

That "Jancy" Jr. is up to his usual form?

The new sleeveless effects of our fair co-eds?

The do or die expression of the English majors?

The usual talk about what an easy time the A. B.'s have?

That bear baiting isn't confined to Shakespeare's time?

That we sure have Bananas?

That the leaves are turning?

That there is a full moon?

Our lovely Owls and perfectly dear Masks?

## Frosh Rule University Without Upperclassmen

For the first time in the history of the University, the freshmen ruled the campus for a full week, immune from the compulsory joys and sorrows inflicted by the upperclassmen.

Tuesday, September 11, brought the Class of 1927 to Orono. The day was spent registering and dividing the newcomers into eighteen groups.

Wednesday, September 12, lecture courses started for these groups, which continued for the remainder of the week.

The lectures included the College customs, work, duties and responsibilities, use of the library and books, as well as lectures and demonstrations concerning the different courses of study. Psychological and physical examinations were also given.

Saturday afternoon was spent picnicking after which all adjourned to Alumni Field for recreation.

Clarence L. Smith of Brooklyn was recently married to Florence Virginia Madden of Brooklyn. Mrs. Smith is a graduate of the class of 1917.

## University of Maine

The State University Maintained by the State and General Government

COLLEGE OF ARTS AND SCIENCES.—Major subjects in Biology, Chemistry, Economics and Sociology, Education, English, French, German, Greek Language and Literature, History, Latin, Mathematics and Astronomy, Psychology, Physics, and Spanish and Italian. Special provisions for graduates of normal schools.

COLLEGE OF AGRICULTURE.—Curricula in Agricultural Education, Agronomy, Animal Husbandry, Biology, Dairy Husbandry, Forestry, Home Economics, Horticulture, Poultry Husbandry, School Course in Agriculture (two years). Short winter courses. Farmers' Week. Correspondence and lecture course. Demonstration work.

COLLEGE OF TECHNOLOGY.—Curricula in Chemical Engineering, Chemistry, Civil Engineering, Electrical Engineering, and Mechanical Engineering.

MAINE AGRICULTURAL EXPERIMENT STATION.—Offices and principal laboratories in Orono; Experiment Farms in Monmouth and Presque Isle.

GRADUATE COURSES leading to the Master's degree are offered by the various colleges.

SUMMER TERM of six weeks (graduate and undergraduate credit).

## Agricultural Club Picnic on the Campus

One of the interesting features of the summer on the campus was the assembling of the boys' and girls' agricultural and home-making clubs of Penobscot, Piscataquis, Hancock, Somerset and Waldo counties. The occasion was their annual field day and convention. There were nearly a thousand club members here, most of them coming by motor. They had for a half-day complete possession of the campus and a jolly time it was for them. The sessions were held in Alumni Hall. The activities began with two hours of sports on Alumni Field. Lester H. Shibbes, state leader of clubs, and his assistant, Mrs. Arra S. Mixer, were in general charge of the program, and they were assisted by the county agents, home demonstration agents and club leaders of the various counties represented.

Another campus assemblage was held by the Pomona Grangers of Penobscot. They came a week later than the club field day. They had a rally in Alumni Hall, a picnic dinner in the gym and spent most of the afternoon in dancing. Members of the faculty of the College of Agriculture extension service and of the Maine Experiment Station officiated as hosts.

Plenty of "Pep" at First Rally of Year

(Continued from Page One)

Lewiston, the New England at Boston, and finally the National event at New York.

Henry Small, captain of the football team, was the next speaker. He told of the hard schedule that the team faces this year due to the fact that all but two of the games are on other fields.

Manager "Tom" Gay followed Capt. Small and wanted the students to cheer for a victory over Rhode Island State, who comes to avenge a 7 to 3 defeat which Maine handed them two years ago.

Next on the platform was Maine's big line coach, "Cuddy" Murphy. "Cuddy" told how the boys had been working hard for the last two weeks. He asked the students to overlook the mistakes that are apt to occur in the first game of the season.

Coach Brice was the last speaker of the evening. He told of the many training rules that the football men were compelled to observe. He forcefully put into the students' minds that was their duty to see that these rules were kept by the players. Coach Brice concluded his remarks by saying:

"The spirit in a team must be instilled six days a week and not fifteen minutes

before a game. Remember one thing, win or lose, it will be a representative Maine team which plays on Alumni Field tomorrow."

Two New Officers Join R. O. T. C. Unit

(Continued from Page One)

half years. While in Honolulu he served as Commandant of the School of Fire. Returning to the U. S. he was assigned to the Infantry School, Fort Benning, Georgia. At Fort Benning he had charge of the School of Musketry. He rose through the various ranks up to Lt. Colonel in September, 1918. From this he was honorably discharged, and he received his permanent grade of major in July, 1920. He comes to Maine having just recently graduated from the Command and Staff School, Fort Leavenworth, Kansas.

Capt. Joseph L. Ready, the other new instructor, born Nov. 17, 1895, is a native of Brighton, Mass., where he graduated from the Brighton High School. He received his commission Aug. 9, 1917 with the 43rd Inf. He served two years in the Philippines with the 15th Inf., and later saw service with the 10th Inf. He is a graduate of the Company Officers' Course, Fort Benning, Ga. This summer he served as Assistant G-3 with the C. M. T. C. at Camp Devens, Mass. He received his captaincy in July, 1920.

Miss Marion French '20 has gone to New York to accept a fine teaching position.

transferred by the War Department to the Infantry School at Fort Benning, in Columbus, Georgia. His successor is Major G. B. Glover, who comes to the University from the Command and General Staff School, Fort Leavenworth, Kansas.

Other instructors who have left are as follows:

Frances S. Arnold, Instructor in Spanish.

Israel Chasman, Instructor in English.

Robert Dougall, Instructor in History, who has returned to his home in South Africa.

Miss Frances R. Freeman, Professor of Home Economics, married during the past summer.

Warren E. Loring, Instructor in Mathematics.

Howard Flack, Coach of Cross Country and Track Athletics.

Sherman Gould, Instructor of Physics. Bertha J. Howard, Associate Professor of Economics and Sociology.

Fred E. Jewett, Instructor in Economics and Sociology.

Albert E. Johnson, Instructor in Civil Engineering.

Thelma Kellogg, Instructor in English.

K. G. Merriam, Instructor in Mechanical Engineering.

J. S. Merrill, Associate Professor of Chemistry.

Floyd F. Oplinger, Instructor in Chemistry.

J. A. Strausbaugh, Instructor in Spanish and Italian.

Ralph A. Wilkins, Instructor in Chemistry.

Norman E. Woldman, Instructor in Chemistry.

Cummings Resigns

A. L. T. Cummings, for nearly five years agricultural editor of the College of Agriculture extension service, with headquarters in Winslow Hall, has resigned to become manager of the State Chamber of Commerce, with offices in City Hall, Portland. He and Mrs. Cummings will leave for Portland at the end of this week.

Miss Cora Russell '23 is teaching in So. Paris.

Miss Daphne Winslow ex-'25, is teaching in Union, Maine.

"What a difference just a few cents make!"

FATIMA

COUNT RUMFORD  
1753-1814

Born Benjamin Thompson in Massachusetts. Charged with being a Tory, went to England, and became Under-Secretary of the Colonies. Later, in Bavaria reorganized the military department and was made Count Rumford. Returned to England and engaged in scientific research. Founded the Rumford professorship at Harvard.

He watched the pot as it boiled

Thousands of people had watched the boiling pot, but Count Rumford wondered why it boiled. He did more than wonder; by scientific research he found out for himself.

And Rumford laid the foundation of the greatest generalization the human mind has yet conceived—the law of the conservation of energy.

Scientists in the Research Laboratories of the General Electric Company are devoting their lives to pure research, carrying on the work of Rumford and other pioneers of modern science. By methodical investigation, the frontier of scientific knowledge is being pushed steadily forward.

The General Electric Company, by continuous scientific research, has developed new and better ways of making electricity of use to mankind.
