Bears Open State Series With Bates On Saturday

Undefeated Team Strong Threat In Annual Tussle.

The gloomy past has all but faded from the memories of the University of Maine's varsity football squad tonight as it polishes off an attack which might surprise the Bates Bobcats. Although the Bears enter the state series as the dark horse team, the old story that anything can happen—and usually does—in the Pine Tree state fall classic is still in force and rules the roost for the next three weeks.

Bates Undefeated

Bates will field an undefeated team on Alumni Field Saturday afternoon, the only college team in the state to hold the honor. The Garnets have lived up to every pre-season prediction made about them and are rated as the top-ranking contenders for the state crown this year.

Trinity was the first opponent to feel the power in the Bobcats' claws. The Episcopalians took an early 12-0 lead in the opening period of Bates' season opener, but then were forced to watch the powerful Bates line lead the hard running Garnet backs to three scores and a 21-12 victory.

Freshman Tufts' Find

The Tufts game found Coach Wade Marlette coming up with an outstanding freshman find in Tony Kunkiewicz who came through with a fourth-down aerial to Jackie Joyce on a play that covered the last 25 yards to play-dirt in the second period. Bates made the most of the breaks in winning from Northeastern 12-0 last week-end. The

(Continued on Page Three)

Radio Show Will Feature 'Faculty Forum'

Broadcasting Will Be Resumed Shortly After November 1

The war effort may result in partially crippling the university radio broadcasts before the year is out, but up to this moment plans are more ambitious than ever. Because of the demand for programs which can muster active civilian understanding and co-operation with the war program, the activities in radio will focus more attention on faculty participation. Plans are under way for a "Faculty Forum" or discussion group which will feature university experts in the fields of economics, political science, government, industry, and engineering. Other programs which are tentatively scheduled are: "Music From Maine," a program featuring the band, orchestra, and chorus of the university; "The Speech Clinic of the Air," a program by Doctor Howard L. Runion of the department of speech; "This Is Maine," a dramatic program which will feature the members of the Maine Radio Guild.

Broadcasting in November

Plans at present call for the resumption of broadcasting activity sometime shortly after November 1 if the obstacles, which are chiefly technical in nature, can be removed. Since the communications engineering department of the university is busy training ordnance workers for the government, the radio studios are in constant use, and this will be but one of the difficulties to be overcome before regular broadcasting may begin.

The Maine Radio Guild, as in the past, will continue to carry much of the burden in the dramatic field, and will soon call a meeting to offer the new students an opportunity to broadcast with them. Al Reynolds, who was elected last spring as president, has volunteered as a Naval Air Cadet, and Vice-President Bill Brown has replaced him as president. Olive Rowell remains as secretary. Although many of the veterans have joined the armed services or graduated, a number of veteran radio performers remain to form the nucleus of the new radio staff. Bill Brown, Olive Rowell, Mary Hempstead, Herb Gent, Don Taver- nor, Doris Bell, Will O'Neil, and Ralph Gould are slated for early appearances.

MCA Drive Opens On Sunday Evening

Marie Rourke And Freeman Whitney Students In Charge

The annual membership drive for men and women of the Maine Christian Association, which is planned for the week of October 26 through 31, opens Sunday evening with a rally for all those working in the drive in the M.C.A. building at 6:30. The membership drive will be under the leadership of Marie Rourke and Freeman Whitney with representatives from each fraternity, dormitory, and off-campus group on the committee. A leaflet describing the organizational set-up and program of the M.C.A. has been prepared by the committee for campus-wide distribution.

At a joint meeting of the Men's and Women's Cabinets held last week, plans were made for the Sunday morning services, freshman activities, open house activities for upperclassmen, men's and women's embassies, community service program, deputations, and study groups on social and religious concerns. Plans for the increased use of the recreational facilities of the M.C.A. Building were also discussed.

Religious Leaders To Speak

For the second year regular Sunday morning services will be held in the Little Theater at 11:00 a.m. Prominent religious leaders from New England will be guest speakers at these services. The Chapel Choir of fifty voices, under the direction of James Gordon Selwood of the music department, will be another feature of this part of the Sunday program.

Campus Awarded ACP First Class Rating This Year

For the fifth semester in succession, the *Maine Campus* has been awarded a first class rating as a result of a nation-wide critical survey of college papers by the Associated Collegiate Press.

Only three papers in the class received a rating higher than that of the *Campus*, the rating of All American, while ten others received first class. Out of a possible 1000 points the *Campus* was awarded 920.

The critical survey was based on news values and sources, news writing and editing, headlines, typography and make up, department pages and special features. The *Campus* received its highest rating in news writing and editing.

Promotions and Appointments Listed Include Two Deans, Steward, and MCA Secretary

Two new acting deans, an acting steward, and a new secretary of the Maine Christian Association head the list of promotions and appointments which have been announced this fall from the office of President Arthur A. Hauck.

Rising L. Morrow, associate professor of history and government, is now Acting Dean of arts and sciences, and Payson Smith is the new Acting Dean in the school of education. Dr. Morrow takes the chair of Dean Joseph M. Murray, now in the Army Air Force, and Dr. Smith takes the place of Dean Olin S. Lutes who accepted a Captaincy in the Army Air Corps.

O'Connor MCA Secretary

As MCA General Secretary, Charles E. O'Connor '31 was appointed to succeed the Rev. Albion P. Beverage who resigned to accept a pastorate in Niagara Falls, N. Y. In 1931 Mr. O'Connor was assistant Dean of Men at the University. He then attended Yale

To Pave Way

HERSCHEL BRICKER

Professor Bricker To Work With Theatre Groups

The American Communal Theater group has announced that Herschel Bricker, regional ACT president for the region including the New England States, is lining up both the well-established institutional theaters and little-known dramatist groups of this vicinity for a unified program of entertainment and education for the advance of the "Victory at Home" idea.

The American Communal Theater is an organization recently established for the unification of directors, players, and patrons in more than a half million community, college, church, and club dramatic groups throughout the nation.

Prof. Huddilston Donates Volumes

The gift of more than four hundred volumes of classical literature and scholarship has been made to the University by Professor Emeritus J. H. Huddilston, for the purpose of forming a nucleus for a departmental library of the classics, according to Professor Leslie F. Smith of the department of classics. These volumes include a large part of the working library which Professor Huddilston used during his 44 years of teaching at the University. Latin and Greek classical authors, lexicons and grammars, books on ancient history and on classical art and antiquities are part of the collection.

Of special interest to book lovers are two 18th century editions of *Longinus on the Sublime*. The earlier was dated London, 1724.

The real importance of the collection, however, according to Professor Huddilston, is not the value of the books themselves but the purpose of encouraging the creation of a departmental library. The gift was made in commemoration of the creation of the departments of Greek and Latin in 1899, which was in part the basis for the change of name from Maine State College to the University of Maine. Professor Huddilston said.

Crosby Lab Presents Many Varied Educational Features

By Martin Scher

Between Stevens Hall and the forge and foundry, there stands a building whose contents are probably more of a mystery to many people on campus than those of almost any other structure. The name of this building is Crosby Mechanical Laboratory.

Under the jurisdiction of the Department of Mechanical Engineering, it nevertheless provides actual experience with many types of industrial machinery for all engineers, civil, mechanical, chemical, and electrical.

Contains Huge Pump

To be found in full working order in the laboratory are air compressors, steam, gasoline, and airplane engines, pumps, Diesels, turbines, and fuel testing equipment. One of the most interesting of these is a large centrifugal pump, which has the amazing ability to handle 15,000 gallons of water a minute, equivalent to about three thousand barrels. The pipe leading from this pump to the various items of hydraulic equipment is two feet in diameter.

Downstairs, there is to be found a complete steam locomotive, built in the year 1846. This locomotive, constructed by Hinkley and Drury of Boston, was in service for almost 50 years, hauling lumber on the Machiasport Railroad in Washington County.

Complete With Accessories

The pistons for this historical piece

operate in cylinders attached to the front of the engine, which is complete with an old-fashioned tapering smoke-stack and bell. Instead of having a covered cab for the engineer and fireman, there is merely a wooden platform surrounded by a rail. The tender for wooden fuel is attached behind this platform.

On the second floor of Crosby there is a complete Piper Cub airplane suspended from the ceiling. Near it, on the floor, is a complete Dodge automobile chassis with almost all the working parts exposed to view, unobstructed by a body.

Extending through the floor are several tall cylindrical columns with all sorts of valves attached. Taking up about one-fourth of the building and extending from the front to the rear is a series of connected calibrated compartments containing water which is used in the study of hydraulics.

Tunnel Aids Study

Near the tanks is a wind tunnel used in the study of aerodynamics. Built by the laboratory instructors, it is a remarkable piece of work, the practical value of which is most obvious in these times when the development of new and improved airplanes may be the deciding factor in the war.

One of the most amazing things about the laboratory is that, although one usually associates the operation of mechanical equipment with dirt and grease, it is virtually spotless.

Dow Announces Contest Subjects For Graton Essay

The three subjects on which students may write in participating in the annual Claude Dewing Graton Essay Contest at the University of Maine and the rules of the contest have been announced by Prof. Edward F. Dow, head of the Department of History and Government.

The subjects from which students may choose are: Franklin Delano Roosevelt and the Supreme Court, the "New Conservatism" of the Supreme Court, and Civil Liberties in War Time. Any regularly enrolled undergraduate under twenty-five who has not previously won the prize may enter the contest. Essays must be not less than 2,000 words nor more than 4,000 words in length and must be typed.

Participants should register for the contest with Prof. Dow at 145 Stevens Hall not later than December 31 with postmark not later than December 31. Students registering by mail should indicate the subject chosen and early in January should call in person to receive their identifying contest numbers.

The prize, established by the late Claude D. Graton of the Class of 1900, consists of the dividends from four shares of stock held in trust, the current amount of which exceeds \$40 a year. The prize is awarded on the basis of completeness, logical presentation, neatness, and correct form. Bibliographical references must be in the form required by the Departments of History and English.

Signal Corps Quota Unfilled

Contrary to the announcement in last week's *Campus*, the Signal Corps unit of the University of Maine ROTC has not yet completed its quota of the freshman and sophomore basic and the junior advanced course. Applicants should at once see Capt. Purcell in the Signal Corps office at Aubert Hall, Room 121, telephone extension 68.

Improvement In Averages For Spring Term

Sigma Nu Leads With 2.47, Owls Lowest With 2.00

Showing a slight rise of .001 over the same period in 1941, the scholastic average of the University of Maine as a whole in the spring semester of 1942 was 2.391, according to the figures recently released by the Registrar.

Sigma Nu led all other fraternities with a 2.47 average, a noticeable drop from the 2.70 average of last year's highest ranker, Tau Epsilon Phi. Beta Theta Pi was second with 2.44, and Phi Eta Kappa follows closely with 2.438.

The point averages of the remaining fraternities were as follows: Sigma Alpha Epsilon, 2.41; Phi Kappa Sigma, 2.40; Alpha Gamma Rho, 2.394; Tau Epsilon Phi, 2.38; Lambda Chi Alpha, 2.36; Delta Tau Delta, 2.358; Theta Chi, 2.31; Alpha Tau Omega, 2.29; Phi Mu Delta, 2.27; Kappa Sigma, 2.25; Sigma Chi, 2.14; Phi Gamma Delta, 2.06.

Phi Beta Phi Leads Sororities
Phi Beta Phi, rising from second place, led the sororities with 2.71. In second place was Alpha Omicron Pi with 2.66. Chi Omega was third with 2.637. Phi Mu and Delta Delta had averages of 2.59 and 2.58. Of the honor societies, Alpha Zeta ranked first with 3.40. Tau Beta Pi, had 3.26; Xi Sigma Pi, 3.11; Omicron Nu, 3.10; Kappa Delta Pi, 3.04.

Non-Frats Top Frats
The cumulative average of non-fraternity men was 2.35, while the fraternity men averaged 2.33. This was a reversal of last year when the fraternity men were on top. The sorority women maintained their lead over the non-sorority women with a 2.64 average to 2.52 for non-sorority

(Continued on Page Four)

Com. King and Prof. Mims Speakers Here Navy Day

Bell Speaker At Rally Friday

The second football rally of the season will be held this Friday night at 6:30 in the Memorial gym in anticipation of the Maine-Bates game on Saturday. Speakers will include Coaches Kenyon, Sezak, and Col. Bell, and the co-Captains for this week's game.

The University of Maine band and the cheerleaders, headed by Taverner and Leonard, will participate. During the rally the Sophomore Owls will supervise the freshman boys in stunts and impersonations.

Harvard Professor Scheduled To Talk On Armistice Day

Dr. Edwin Mims, Professor Emeritus of English at Vanderbilt University, will speak on "Have You Discovered America?" at the Navy Day assembly on October 27. It was announced this week by Fred P. Loring, chairman of the committee on assemblies. Commander A. Lincoln King, '14, United States Navy, officer in charge Casco Bay Area, will also speak. His topic will be "Our Navy."

Dr. Mims comes to the university as a Faculty Artist Visitor for a three-day period, during which he will lecture to classes and hold individual conferences.

Assembly Schedule Released

The schedule for assemblies up until the Christmas holidays was also announced. At the Armistice Day assembly Dr. Ralph Barton Perry, Edgar Pierce Professor of Philosophy, Harvard University, will speak on "Post-War Problems." The student speakers for this assembly will be Doris Bell, '45, and John P. Cullinan, '43.

Wing Commander R. Ashley Hall, Director of British University Air Squadrons, will speak on "University Life in War-Time England" at the November 30 assembly. He will also be on the campus for three days speaking to various classes and groups. The Christmas Vespers will be held December 13 at 4 p.m.

Fall Homecoming Will Honor Alumni In Armed Forces

Hauck Will Unfold New Service Flag At Annual Luncheon

Recognition of the more than 1,000 alumni of the University now serving in the armed forces of the country will be a feature of the annual Homecoming program to be held here on Saturday, October 31.

Guests of honor at the Alumni-Faculty Luncheon, where this ceremony will take place, will be the eleven living members of the University's first football team, that of 1892.

Hauck To Speak

President Arthur A. Hauck will speak in tribute to the men in service as he welcomes the guests of honor and the returning alumni. As a climax of the luncheon program, Dr. Hauck will unfold a service flag in memory of the Maine men in uniform. This flag, donated by the University Alumni Association, will display on its center star the number of men known to be in service at the time of the program and will be revised from time to time to keep pace with the changing numbers in service.

Service Men Guests

Service men from the University who are able to return for the traditional program will be guests of the University and the Alumni Association for the Luncheon and the Varsity football game with Colby in the afternoon.

Mr. George Bearce, president of the General Alumni Association, will speak in tribute to the guests of honor on the occasion of the fiftieth anniversary of the beginning of football history at the University in 1892.

Just fifty years ago, on October 29, the football pioneers of 1892 traveled to Waterville to play Colby in the first college game played by the University, then known as the Maine State College. The Colby team emerged victorious by a score of 12-0. This year, as a climax of the Homecoming program, the University will again play Colby.

Team Members Listed

Members of the team include Harry M. Smith of Bangor, right half-back; Lore A. Rogers, '96, left end; Charles A. Frost, '95, left tackle; Albion Moulton, '96, left guard; Marcus Urann, '97, center; Gerard de Haseth, '95, right guard; Walter Murphy, '95, right tackle; and John Ricker, '94, quarterback.

The captain of the team was Walter W. Crosby, '93. Substitutes were Frank L. French, '95, and James E. Harvey, '94.

Art Department To Loan Pictures

One hundred or more framed color reproductions of world famous paintings are available for student loan through the art department. Individuals and representatives of organizations desiring pictures are invited to visit the exhibit in the studio adjoining the University Art Gallery on the third floor of Stevens Hall, South Wing.

Persons wishing to borrow pictures should indicate their selection in the notebook provided in the studio. All pictures will then be distributed on Friday and Saturday, October 23rd and 24th. They will be loaned in the order in which they have been selected in advance. Since several persons may select the same reproduction, students are urged to indicate a second and third choice.

A Worthy Institution . . .

Next week the Maine Christian Association, religious organization at the University of Maine, will conduct its annual membership campaign. It is the duty of every student and faculty member to get behind this drive with everything he has got. In order for the association to carry on, it is necessary for each of us to contribute the most we can.

Now more than ever it is important that we devote a good deal of our spare time toward participation in those activities which tend to build spiritual unity and morale, activities which inculcate in us a desire for something more than mere secular ideals. The Maine Christian Association is one of the bodies here on campus which can, with the support of everyone, carry on religious and social activities which have become a most necessary part of any college or university.

The MCA is made possible by contributions and support of the students, faculty, administration, alumni, and cooperating church boards. It is part of a nation-wide and world-wide effort to bring students to a better understanding of themselves and each other through application of Christian living.

Religious activities of the MCA include the weekly Sunday services held in the Little Theatre, for which many prominent speakers are brought to conduct the services.

In addition the association sponsors the men's and women's embassies held each year, the freshman forums, panel discussions, and the community service program. Deputation teams under the direction of Mr. O'Connor, general secretary of the group, are sent to all parts of the state, where the teams conduct services in churches in the towns they visit.

Frequent visits of the Harvard Glee Club have been made possible by this association.

The students of Maine need the MCA.

The MCA needs the support of the students.

Therefore, those who would see the Maine Christian Association continue its good work under its new and capable secretary, Charlie O'Connor, and his efficient staff, should get behind the membership drive. This call is urgent. Give what you can to a good cause. Representatives may be found in each of the fraternities and sororities and dormitories, as well as the off-campus groups. Don't wait until they hunt you up, however; hunt them up.

Time For Study . . .

Several comments recently have come to the attention of the editorial board of the *Campus* concerning the new library schedule. To many students that change in schedule, which has reduced considerably the number of hours the library is available per week, has caused a good deal of inconvenience. We have been asked to bring this problem to the attention of the authorities.

The new library building was built to relieve several problems; one is that the old building is inadequate to store the many valuable volumes which the university possesses; another is that the present structure is too small to accommodate the increasingly large student body.

It was apparently felt that there was not sufficient need to keep open until 10:30 p.m. this year as in the past. Therefore the library closes at 9:15. However, at closing time during the past week, there has been a large enough group of students in the reading rooms to warrant keeping open another hour.

Some students find it impossible to get their required reading done in the time allotted them under the present conditions. And it is likewise inconvenient to carry home many heavy and cumbersome volumes for the purpose of research. Another hour each evening would help a lot.

(All unsigned editorials are by the editor.)

In the Library

By Frances Nelson

And Now Tomorrow by Rachel Field will probably be one of the best-loved novels of the year and perhaps the Pulitzer Prize winner.

It is the story of a New England woman, Emily Blair, who is left absolutely deaf after a severe illness. Her long struggle to regain her hearing is successful but her love affair is not.

The doctor who restores her hearing also teaches her a new philosophy. There is nothing original about the plot, but the story is well told. Smooth style and effective characterization are the book's best points. It is a modern love story with depth of emotion. Suspense is well maintained. This is Rachel Field's last book and

Men's Fashions Influenced By War Priorities

By Betty Brackett

"You girls think the war is cramping the style in your clothes—do you ever stop to think that we fellows are having just as hard a time?" This remark was shot at a group of co-eds on campus the other day.

The war has hit boys' clothes much the same as it has girls'. Lapels are more narrow, there are no cuffs on the trousers, no halibelts in the jackets, and no pocket flaps on the pockets.

Although we realize that the trend in the men's case seems to be definitely towards khaki and navy blue, we've seen lots of smooth civilian clothes on campus this fall, and we've noticed that just as college girls have a style all their own, the boys, too, wear outfits that are unmistakably "campus" clothes. Whether it is the slightly off-white socks (U. of M. Athletic Dept.) that drip around the ankles, or those up-to-the-minute dungarees with the turned up cuffs that add this collegiate air, we can't decide.

Plaids and M's

For campus wear, the boys seem to have two old stand-bys—either a navy

blue sweater boasting an "M" or numerals, or a loud plaid shirt of almost any color imaginable, but always with the shirt-tails hanging out.

Guide to Chaos

Jack Goodman and Allen Baer Green's book, *How to Do Practically Anything* is different! A hint of its contents is found in its sub-title, "an easy guide to complete chaos in your business life, your social life and your love life." The reader may learn how to raise a dog, how to win and woo a woman, or how to sail a boat. There are clever lines and slap-happy situations in every chapter. This book would be a wise buy for a home library—excellent light reading for odd moments.

Witty Biography

Philip Guedalla's *Mr. Churchill* is a good contemporary biography of England's Prime Minister. It is a purposeful war book rather than an objective study of the great man, but the book ripples with wit. It is interesting because its subject is interesting. The author has perception, perspective, and intelligent enthusiasm for his subject. Although there is little character study, Churchill's life story is well told. The English biographer has presented a surprising amount of material, including untold anecdotes, in spite of the tremendous number of stories about Churchill already published. One reviewer promises that you won't be able to put Mr. Guedalla's book down "until you have come plumb upon the index."

Scher Calls For Revamping Of Selective Service System

By Martin Scher

As the casualty lists begin to roll in upon the tide of intensified American military action and the inevitable second front, the problems of the young technician in industry will most certainly become a national one.

It is now a generally recognized fact that a great need exists for chemists, mathematicians, accountants, engineers of all types, and many other categories of highly trained personnel. It is also generally conceded that the maintenance of the industrial front is as important as the military.

Under present circumstances very few cases of social pressure have manifested themselves, but as the war wears on, the present system, or rather lack of system, of manpower allocation, will begin to demonstrate its inadequacy.

John Doe's Problem

Let us take the fictitious case of John Doe, a graduate of any recognized engineering school. Having been granted a deferment by his local Selective Service Board, he obtains a job in an airplane factory where it is found that he is particularly talented in the supervision of production.

Let us assume that the war has gone into a stage involving the loss of much manpower. As a result, the families of many of the older men with whom John is working are hit by the death or wounding of their kin. Before long, it is almost a sure thing that these men and women will begin to ask

themselves questions. Why isn't John Doe, who is 21 or 22 years old and in apparent perfect physical condition, up on the firing line with other boys of his age?

Calls for Reason

If the emotional aspect forced upon them by personal misfortune was not present, this could be answered rationally and to the benefit of the nation, but it will certainly color their thinking.

As time passes, this mental castigation of John for his so-called lack of patriotism will surely come into the open and create a nasty problem, for it will help destroy the morale and efficiency of both vitally needed John and his fellow workers.

What is the solution to this possible cry of "slacker" against young men who are more vital in industry than in the ranks of the armed forces? Two courses of action should be taken, not so much for the protection of John and his fellow technicians, but for the prevention of morale-destroying occurrences.

(Continued on Page Four)

Social Program Due For Changes Because of War

By Natalie Curtis

Will there be any formals this year? What about fraternity house parties? Are stag dances going to be held?

These are among the many questions that come to mind when social events are mentioned. These questions are unanswerable. However, one fact is certain, namely, this year will be entirely different from previous years.

We used to wonder what orchestra would play for Intramural Ball, but now we wonder if there will be an Intramural Ball.

Pleasure "As Usual" Out

For the sake of the freshmen, it would be best not to dwell on the usual social calendar, but to think of the various possibilities for this season. With the world in its present turmoil, the normal social activities are definitely out of the picture. Moreover, a blank social calendar is just as much out of question. All one can do is to hope for a happy medium.

There must be some social activity to maintain student interest in college life, but all should be willing to give up some of it. It may be possible to direct our social desires into more constructive and beneficial channels.

Perhaps we could do with fewer formals and more picnics and hikes. Formals are quite expensive to hold and to attend. Very pleasant social gatherings could be held in order to do defense work.

CAPITAL to CAMPUS

ACP's Jay Richter Reports from Washington

College Air Power . . .

WASHINGTON—(ACP)—Tens of thousands of men are learning to fly at some 600 of the nation's colleges this year, preparing to serve in Army and Navy aviation.

However, not all the pilot trainees are regular students—college facilities have been opened to all who can meet requirements of the Civil Aeronautics Administration. Any man who can pass the mental and physical examinations is eligible, although all trainees must enlist in the reserve of the Army or Navy air forces.

Most Navy reservists are slated to be combat pilots and must meet the standard requirements of Naval Aviation Cadet Selection Boards. They may be college students taking training under the V-1 or V-5 plans.

All Army reservists in the CAA program take their training on a full-time basis and must be men who are ineligible as combat pilots because of their age or minor physical defects. Age limits are 18 through 36. If he's under 27 an applicant must have been rejected for combat pilot training.

In the CAA-Army program five types of pilots are being trained:

Glider;
Liaison—spotter for field artillery and other similar jobs;
Instructor—transport co-pilot either for the Army Air Transport Command, or on one of the airlines working with it;
Service pilot—towing targets or gliders, short hauls of men and materials.

CAA trainees progress through elementary, secondary, cross-country, link-instrument and flight officer or instructor courses. Each course lasts 8 weeks. Trainees may be called by the Army or Navy for further training or active duty at any stage of the courses.

After call by the services they may qualify for a commission.

Education Elsewhere . . .

The Nazis termed it an "outstanding event for youth as well as for the party" when the 1924 age group of Hitler Youth was taken under the wing of the National Socialists a few days ago.

Lucky kids.

Maine Bears Host to Bates Bobcats In '42 Series Start

BEAR FACTS by Will Johns

This week I planned to devote this whole column to a write-up of the Bates varsity football squad. Last Saturday Maine's loss to the University of Connecticut changed all that.

I suppose it is only natural for the average lusty-lunged fan high up in the bleachers to look down on the side-line bench below and tell the stooped over, lonely, and dejected figure sitting there (otherwise known as the losing coach) just how to run his team. I suppose it is to be expected that most of the blame for a losing streak should come to rest upon the already over-burdened shoulders of a coach.

But the average gridiron fan has never played football. He has never even attended the practice sessions his team has held the previous week, never even seen a varsity mentor working with his team and coaching them in the finer points of the game.

That is the chief reason why no Maine man or woman can place all the blame for the grid disasters that have befallen the Black Bears on the past three Saturday afternoons on one single man; on Coach Bill Kenyon.

It is true that the loss to Connecticut was one of the worst trouncings that a Pale Blue team has taken on its home field in several years. Statistically, Maine was solidly beaten. Again Maine's pass defense broke wide open at the seams to let the opposition score the winning touchdowns. Connecticut connected on eight of their thirteen passes and all of the Nutmeg markers were either the direct results of passes or were set up by aials.

Maine's coach worked harder on pass defense with his team last week than on any other phase of the game.

Maine has been playing football with teams that have star freshmen on their rosters. One of the outstanding players on Alumni field last weekend was freshman Freddy Mohr. This Nutmeg aerial artist threw two touchdown passes to Ray Scussel, Huskie triple-threat back, and set up a third.

Maine has been outweighed in every game they have played this season. The Pale Blue starting line in three games has averaged 172 pounds per man; the starting backfield 167. The Columbia Lion line averaged 190 pounds and its backfield 180. The New Hampshire line averaged 184 and its backfield 170. The Nutmeg line you saw in action weighed, on the average, 193 pounds per man. The UConn backfield averaged 181 pounds per man.

In all but the opener with Columbia, Maine kept pace with the opposition until the second half. Scores at half time in the last two games gave Maine even chances of wins. It certainly is reasonable to state that weight of opposing lines has been one of the factors in the poor showing the Bears have made in the last two second halves they have played.

The Black Bear gridsters also have been victims of war-time transportation handicaps. In both of their away games, they have traveled in day coaches on the days preceding the games. There is a difference between pullman berths and seats in train coaches. It must be apparent to anyone who has traveled by rail that there is quite a difference. Twice Maine men have entered grid games this fall with a lack of sleep and rest.

This Saturday Maine opens its state series games against the Bates Bobcats at Orono. Past records won't mean a thing when the two teams take the field. Bates has been exceptionally strong all season, while Maine has never shown the brand of football it is capable of. Last year, the University of Maine's 1941 edition of the gridiron game showed its best form during the state series. This year I think the Black Bears will show better form.

Past . . .

EMILE KING

The Bears . . .

Don Presnell: end; 160; 5.10; 19; Portland; junior; the livewire of the Black Bears.

Jim Meehan: tackle; 189; 5.10; 20; Hingham, Mass.; sophomore; the only starting sophomore in the Maine forward wall.

Ray Neal: guard; 168; 5.10; 21; Portland; All-Maine in 1941 and the scrappiest Pale Blue guard.

"Bobo" Geneva: center; 155; 6.0; 22; South Portland; senior; the quiet pivot man whose steady playing has highlighted the three past games.

Ed Robinson: guard; 170; 5.11; 22; Bronxville, N. Y.; senior; only other senior in the starting line-up and a lot of guard.

Frank "Squeak" Squires: tackle; 190; 6.1; 21; Medford, Mass.; junior; sometimes called "Sleepy" but on fall Saturdays he's the anchor of the Maine line.

Dick "Red" Morrill: end; 180; 6.0; 21; Farmington; junior; last year's star tackle who is mowing down end interference this fall. The Bear's "Joe Palooka."

Al Smaha: quarterback; 160; 5.11; 18; Portland; sophomore; former star freshman back and replacement for Emile King.

Al Hutchinson: halfback; 155; 5.8; 21; Danvers, Mass.; junior; the Bear's triple-threat back whose educated toe averaged 51 yard punts in the Columbia game.

Mae McIntire: fullback; 188; 5.11; 20; Portland; junior; the able successor to Ed Barrows.

Bob Nutter: halfback; 164; 6.0; 21; Sanford; junior; swivel-hipped, fleet-footed ball-toter, Maine's best broken-field runner.

Maine Meets Strong Colby Harrier Team

Bear X-Country Men Look Impressive In Victory Over UConns

By Bud Hale

Strengthened by the new freshman team, down and under after three straight defeats, but still fighting, spent its hardest week of practice this week in preparation for the Bates game this Saturday. It will be the 56th game of the Maine-Bates series. The Black Bears enter their 1942 state series opener as a definite underdog, but past performances mean very little to these traditional rivals. They have met each other every year since 1893.

In the series to date Maine and Bates have been equally successful. Each team has 25 victories to its credit, while five of the annual contests have resulted in ties. Maine's 67-0 victory over the Bobcats in 1927 stands as the highest score while their 2-0 loss to the Garnet squad in 1930 ranks on the opposite end of the score board. This year the Pale Blue men will be out to avenge their 13-6 loss to Bates in last year's series inaugural.

Three Classes Represented
The Maine team is built around its three veterans, Phil Hamm, Leo Estabrook, and Dick Martinez, who are the only remaining members of a team who were national champions as freshmen. Juniors Henry Condon and Al Crockett are bound to provide stiff competition for the Mules, and Elmer Folsom and Virgil Cole are the sophomore members of the squad. Folsom was beaten only once as a freshman and that was by Malcolm Dempsey of Presque Isle, who is now leading Coach Jenkins' freshman squad.

Bears Claw Nutmeggers
Saturday morning the Maine team won easily over the University of Connecticut team by a score of 17-0. Folsom and Hamm tied for first place, while the best Connecticut could gather was a fifth. The winning time was 22:31.94.

Garnets Rate As Favorites In 56th Annual Grid Game

(Continued from Page One)

Huskies started strong, driving deep into Garnet ground in the first period, but Bates clicked consistently when it had the ball. Right end Jackie Joyce blocked and recovered a kick in Northeastern's end zone for the first Bates touchdown, while a penalty against the Huskies for unnecessary roughness helped bring about the second tally in the final canto.

Statistically, the Bobcats have shown just how powerful they are, and figures don't lie. For the last two quarters, the Bates defense has not allowed a single point to be chalked up against it. In the first two games, the line limited opposing ball carriers to 141 yards in eight periods for an average of about 15 yards a quarter. Tufts gained only 19 yards in four periods. The Bobcat backs, Johnson, Walker, and Card accounted for 490 yards against Tufts and Trinity and the line yielded only 140.

Coach Wade Mariette, who succeeded Raymond "Ducky" Pond as leader of the Bobcats last summer, will field the most experienced team in the state against the Pale Blue gridsters. At least nine of the cogs in the Garnet gridiron machine were in on the 13-6 drubbing Bates gave Maine a year ago.

In the backfield will be Arnie Card, Auburn-bred bolt of lightning; formidable Del Johnson; and durable Mickey Walker, all of whom played last season. The Bates line will look familiar to the Maine-iacs in six places. Center Sturgis, guards Howarth and McDonald, tackles Shea and Norm Johnson, and end Marshall all are out to make it four in a row over the Blue and White.

Soph Wonderback

"WINDY" WORK

Maine Has Met Bates In Series For 55 Years

Bates Has Won Last Three Games; Seven Since '24

The University of Maine football team, down and under after three straight defeats, but still fighting, spent its hardest week of practice this week in preparation for the Bates game this Saturday. It will be the 56th game of the Maine-Bates series.

The Black Bears enter their 1942 state series opener as a definite underdog, but past performances mean very little to these traditional rivals. They have met each other every year since 1893.

In the series to date Maine and Bates have been equally successful. Each team has 25 victories to its credit, while five of the annual contests have resulted in ties. Maine's 67-0 victory over the Bobcats in 1927 stands as the highest score while their 2-0 loss to the Garnet squad in 1930 ranks on the opposite end of the score board. This year the Pale Blue men will be out to avenge their 13-6 loss to Bates in last year's series inaugural.

Three Classes Represented
The Maine team is built around its three veterans, Phil Hamm, Leo Estabrook, and Dick Martinez, who are the only remaining members of a team who were national champions as freshmen. Juniors Henry Condon and Al Crockett are bound to provide stiff competition for the Mules, and Elmer Folsom and Virgil Cole are the sophomore members of the squad. Folsom was beaten only once as a freshman and that was by Malcolm Dempsey of Presque Isle, who is now leading Coach Jenkins' freshman squad.

Bears Claw Nutmeggers
Saturday morning the Maine team won easily over the University of Connecticut team by a score of 17-0. Folsom and Hamm tied for first place, while the best Connecticut could gather was a fifth. The winning time was 22:31.94.

. . . and Present

AL SMAHA

The Bobcats . .

Norm Marshall: end; 194; 6.0; 20; Malden, Mass.; senior; a letterman last fall and president of his class for three years.

Cyril Finnegan: tackle; 192; 6.1; 20; South Berwick; junior; prepped at Berwick Academy and has played fine ball all fall.

Charles Howarth: guard; 166; 5.10; 20; North Billerica, Mass.; senior; won his numerals in track as a broad jumper.

Harlan Sturgis: center; 165; 5.11; 19; Auburn; senior; a letterman in basketball.

John McDonald: guard; 181; 6.1; 20; South Portland; senior; did not play last year due to an injury but a hard charging Bobcat guard this fall.

Norm Johnson: tackle; 198; 6.2; 20; Quincy, Mass.; senior; All-Maine in '39 and Little All-American that same year.

John Joyce: end; 167; 5.11; 18; Worcester, Mass.; sophomore; star end on Bobkitten squad last fall.

Harold Walker: quarterback; 167; 5.10; Andover, Mass.; senior; does most of the kicking and is also a good line-bucker.

Henrick Johnson: halfback; 172; 5.10; 21; Chelmsford, Mass.; senior; gained consistently on the ground against Northeastern last week.

Arnold Card: halfback; 166; 5.10; 22; Auburn; junior; outstanding kicker, passer, and blocker, and end-run specialist.

Anthony Kunkiewicz: fullback; 180; 5.11; 18; Torrington, Conn.; freshman; threw touchdown pass to Jackie Joyce in Bates' win over Tufts.

Cub Dalers Engage Lee, Hartland Sat.

Yearling Harriers Gain Even Split In Meets Last Week

By Bob Derbyshire

Last Saturday morning the University of Maine freshman harriers started their 1942 season. At 10:30 a.m. the "A" team started their run against Houlton Academy, and lost their meet 25-31. The runners were paced by Freshman Malcolm Dempsey, National High School Champion for Presque Isle last year. Dempsey clinched first place in the time of 12:59. Houlton's victory came as a result of placing their five men one after the other.

The summary is as follows: 1st, Dempsey (M) 12:59; 2nd, Wood (M) 13:06; 3rd, Ford (H) 13:20.8; 4th, Larson (H) 13:55; 5th, Gardiner (H) 4:00; 6th, McGarfin (H) 14:05.6; 7th, Grant (H) 14:06; 8th, Ricker (M) 14:10; 9th, Earle (M) 14:11; 10th, West (H) 14:19; 11th, True (M) 14:21; 12th, Hermann (M) 14:25; 13th, Cobb (M) 14:40; 14th, Burlock (H) 15:32.

Cubs Place Five
The Frosh "B" team ran against Monson Academy and won their meet by a score of 25-36. Two Monson men tied for first place, but Maine won by placing men in the next five positions.

Next Saturday these two Maine teams will run their second meet. The "A" team will meet Lee Academy at 10:45 and the "B" team will run against Hartland Academy fifteen minutes later. The teams, as yet, have not been selected by Coach Jenkins, but they will probably be based upon last week's performances by both "A" and "B" teams.

Hebron Gridsters Test Frosh Eleven Saturday

Bear Tracks

By Krause and Murphy

We believe that one reason for the Nutmeggers' triumph over the Black Bears was the result of some very thorough scouting of our team by Connecticut. . . . The playing of Jim Meehan and Bob Emerson, two sophs, gave some consolation to the Maine cheering section. . . .

Malcolm Dempsey, former National Interscholastic Cross Country champ, and present Frosh ace, started running many years ago over the hills of Presque Isle. . . . the reason. . . he was always late for school and hence was forced to "beat the bell" . . . Johnny Piscopo of Portland, a new student at our University, and considered "tops" among tumblers in Southwestern Maine would look great performing in front of our stands. . . . Whatta say, Johnny? . . .

The pigskin used in the Maine-Conn. game certainly sailed with the "greatest of ease" when Al Hutchinson's toe met it. . . . one of Al's boots traveled 70 yards in the air. . . . Incidentally, Co-Captain Johnny Toffolon of the UConns was the proud possessor of that same pigskin at the close of the game. . . .

Frosh Coach Phil Jones has some great backfield material in Al Hagonian who matriculated to the U. of M. from Higgins Classical, and in Nundi Romano, former All-State back who hails from Portland. . . . Romano also is a former All-New England Interscholastic basketball player. . . . He was given this honor at the close of the season of '42 and was the first Maine schoolboy to be so honored in four years.

This Week At Home

Friday
3:30 p.m. Varsity vs. Colby (Cross Country)
Saturday
9:30 a.m. Frosh vs. Hebron (Football)
10:30 a.m. Frosh vs. Lee and Hartland (Cross Country)
1:30 p.m. Varsity vs. Bates (Football)

COMMUNICATIONS . . . directing arm of combat

...and Western Electric equipment goes to every battle front

Army planes fly and fight with radio command sets. Radios ride in tanks to coordinate mechanized operations. Army commanders get reports and give orders over field telephones, wire and switchboards. Naval vessels use announcing systems, telephones and radio.

A major source of this specialized equipment is Western Electric—for 60 years manufacturer for the Bell System—dedicated today to meeting the need for equipment that delivers fighting words to fighting men.

Western Electric
ARSENAL OF COMMUNICATIONS

Campus Brevities . . .

Representatives of the War and Navy Departments, the Department of the Interior, and the National Advisory Council on Aeronautics will be on campus tomorrow to interview seniors in all branches of engineering in the college of technology in reference to civilian Civil Service positions with these branches of the government.

A group meeting will be held at 1:00 p.m. in 300 Aubert Hall, to be followed by interviews. The War Department representatives will be in 210 Stevens; the Navy Department in 38 South Stevens; the NACA in 137 Aubert, and the Department of the Interior representatives in 11 North Stevens. Representatives of the First Civil Service Regional District will be in 300 Aubert.

No advance appointments will be necessary for these interviews.

The question of whether the *Prism* will be published this year, which has been problematical up until now, was settled definitely by a recent announcement from Irving Pierce, adviser. The *Prism* will come out as usual, with Josiah Colcord as editor-in-chief and Leslie Brewer as business manager.

There will be a few changes in the yearbook this year. The number of cuts will probably be less, because of the necessity for turning in old plates for new ones. Undoubtedly there will be fewer colors used. These deficiencies will be balanced by an addition of informal material.

Reverend Francis G. Ricker, an alumnus of the class of '32 and a graduate of Andover-Newton Theological School, will be the speaker at the Sunday morning service in the Little Theater on October 25.

While at Maine, Mr. Ricker was the originator of the interfraternity vaudeville night, a member of the Maine Masque Theater, and active in the M.C.A. At present he is pastor of the First Parish Church of Waltham, Mass.

The American Institute of Electrical Engineers will hold an open meeting, freshmen invited, on Wednesday, October 28, at 7 p.m., 26 Lord Hall, Roger Moulton, president, announced today. Faculty and student members will speak.

ROTC students interested in joining the rifle team are asked to report to Major Lask on the range next Tuesday afternoon. Previous training is not required but is desirable. The range will be open at 1:30 p.m. on Tuesdays through Fridays for range practice.

Tau Beta Pi, honorary engineering society, will hold a smoker October 29 at 7:00 p.m. in the Alumni Gymnasium. The smoker will be open to all.

Several speakers will be heard and awards will be made to students as in previous years. Refreshments will be served.

Members of the Deutscher Verein will have a hike and outdoor dinner Sunday, October 25, meeting in front of Balentine Hall in time to leave at 11 o'clock.

Juventa - -

(Continued from Page Three)

introduced the members of the athletic council who, in turn, outlined their phase of the athletic program. Dottie Ouellette, freshman class leader, aided by Evelyn Tondreau, senior class leader, Phil MacNeil, junior class leader, and Peg Stackpole, sophomore class leader, planned the picnic.

The fall tennis tournament was lined up last week with the following slate: B. Jenkins vs. S. McNealus, F. Parsons vs. Lombard, P. Stackpole vs. M. Libby, J. Wilkins vs. G. Oliver, C. Comings vs. I. Miller, H. Clifford vs. N. Goldsmith, P. Samson vs. V. Halsey, and J. Le Clerc vs. A. Thorpe. F. Donovan, E. Furbish, T. Kimball, R. Chute, L. Packard, F. Higgins, R. Troland, and R. Higgins all drew byes. Fran Donovan was winner of last year's tourney.

Upperclassmen are urged to report to their class leader for four scheduled practices before the opening of the fall hockey tournament next week. Due to the late opening of college, the Frosh-Soph Hat Game will be run in a series of three games this year instead of the one game of former years.

Note: Juventa is the symbol of National Physical Education and appears on all W.A.A. Council keys.

NOTICE

All girls who took First Aid in the spring semester may get their certificates at Miss Lengyel's office.

Northwestern university is one of the most recent to adopt a program of compulsory physical education for all male undergraduates.

Mr. G. N. Perkins, of the General Electric Company, will visit the University of Maine on Monday, October 26, to interview senior women who are interested in employment with that company after graduation. May graduates as well as those graduating in February are invited to interview Mr. Perkins. Of special interest in the interview will be women with some courses in accounting and business subjects, those with a liking for figures and detail work, or those training or trained in shorthand and typing. Other types of training and interests may be considered.

Interested students are asked to sign up for appointments at the Placement Bureau before noon Saturday, October 24.

The Maine Outing Club will hold an organization meeting tonight at seven p.m. in 15 Coburn Hall, it was announced by President John Steinmetz. Ted Curtis will be the speaker and moving pictures will be shown.

Other officers of the club are Bob Jenkins, vice president, Willa Dudley, secretary, and Norman Mosher, treasurer.

The University of Maine Photo Club is sponsoring an exhibition of fine prints in the Art Gallery in South Stevens from October 26 to November 4. These prints have been selected from the entries in the 21st Annual Competition of the periodical, *American Photography*, and should be of interest to all students and faculty members with photographic leanings.

Those actively interested in photography are invited to get in touch with the club president, Prof. E. K. Miles, 320 Stevens, or the secretary, Prof. C. J. Reynolds, 245 Stevens.

The first meeting of the year for all active and associate members of the Maine Masque Theater has been called by the Executive Committee of the Theater for this evening at 7:00 p.m. in the Little Theater.

Immediately following the meeting, at 8:00 p.m., there will be a meeting of all upperclassmen, sophomores, juniors, and seniors, whether Masque members or not, who are interested in either acting, stagecraft, lighting or makeup. Previous participation in the Masque is not required to take part in the forthcoming productions.

Another meeting of these people will be held at 8:00 p.m. Sunday evening in the Little Theater. A meeting of all interested freshmen will be held on Thursday evening, October 29, at 7:00 p.m.

"JEEP" DRESS

This is the jumper dress that's making campus history. It's a wardrobe in itself because it makes a lot of swell combinations with all your blouses. V-necks, scalloped necklines, button down fronts—and come in corduroy, too. Red, green, navy, brown, black. Sizes 9-20.

3.95

Smart rayon crepe blouses, long or short sleeves, convertible neckline—pastel shades. The season's hit is the wool flannel man-tailored blouse. Red, Kelly, maize, open blue, rose, white. Sizes 30-40.

1.98-3.98

100% wool cardigans in pastels and high shades. A campus perennial. Sizes 34-40.

1.98-2.98

women.

The average of all women was 2.56, a considerable lead over the 2.34 average of all men. Correspondingly, the freshman women, with 2.79, led the freshman men, who had 2.19.

Neat Mathetai took first place among the honorary organizations with 3.28. The All Maine Women, slipping from first to second place, had an average of 2.87. The Senior Skull Society was third with an average of 2.55. The Sophomore Eagles had 2.432 and the Sophomore Owls had 2.00.

The professional societies, Alpha Chi Sigma and Scabbard and Blade, obtained averages of 2.80 and 2.70 respectively.

The *Prism* Board led the dramatic and literary organizations with an average of 2.66. The Maine Masque had 2.618, and the Maine Campus, 2.48.

Faculty Promotions - -

(Continued from Page One)

Brush was Assistant Professor of Psychology at the University of Maine from 1931 to 1934 and Lecturer in Psychology from 1935 to 1937. She is serving on the faculty while her husband, Dr. Edward N. Brush, is serving in the United States Army Specialist Corps.

C. DeWitt Hardy, Instructor in History, B.A., Northwestern, 1932. Has done graduate work at Northwestern. Karl F. Treckel, Instructor in Economics. He has a B.A. from Syracuse University in 1939 and an M.S. from the same university in 1940.

Part-time Instructors

The following have received appointments as part-time instructors in English for the fall semester:

Mrs. Percie H. Turner, graduate of Smith College and Ph.D. from Radcliffe. She was formerly Assistant Professor of English at the University of Maine and in recent years has been Lecturer in English at the University. Mrs. Leola Chaplin Ellis, graduate of the University of Maine with graduate work at Harvard. Mrs. Ellis until recently was head of the department of English at Westbrook Junior College.

College of Technology

George H. LeCain, Assistant Professor Mechanical Engineering, B.S., Tufts Coll., 1931. Merton F. Banks, Instructor in Engineering Drafting, B.S., Maine, 1915, has served as instructor in Mechanical Engineering at Northeastern University, Boston, Bangor Engineering School, and war training class in Bangor, taught at U. of Illinois 1915-18.

Miss Anne Milman, Graduate Assistant, Department of Chemistry and Chemical Engineering, B.A., Adelphi College, 1942. Samuel W. Smith, Graduate Assistant, Department of Chemistry and Chemical Engineering, B.S., Monmouth Coll., 1942.

Donald Henry Wilson, Instructor in Mechanical Engineering, Graduate of the University of Maine in Mechanical Engineering in 1933. He is a member of the State Board of Registration for Professional Engineers and has had experience in construction and inspection work since his graduation from the University.

To University Staff

Miss Dorothy R. Pierce, House Director, North Estabrooke Hall, A.B.,

U. of Cincinnati, 1934, M.A., U. of Vermont, 1936, four years high school teaching English, coaching debate and dramatics, one year special study, Course for Deans and Advisers, Boston University.

Miss Agnes C. Daley, Nurse in the Women's Infirmary, a graduate of the Central Maine General Hospital Training School of Nursing, twenty-five years of private duty nursing.

Carlton Burkett Payson, 1st Lieut. Infantry, B.S., Maine, 1941, Assistant Professor of Military Science and Tactics.

Captain P. J. Purcell, Assistant Professor of Military Science and Tactics in charge of the Signal Corps Unit which has been added to the Reserve Officers Training Corps of the University. Captain Purcell is a graduate of Cornell University.

Thirteen Promoted

Promotions in rank were received by thirteen members of the faculty this year. In Agriculture, Margaret K. Nesbitt from assistant to associate professor of Home Economics; John F. Witter from assistant to associate professor, Animal Pathology; J. Thomas Pedlow, from assistant professor of Biochemistry to associate professor.

In Arts and Sciences, R. L. Morrow from assistant professor to associate professor in the department of History and Government; Benjamin R. Speicher, associate professor, has been named acting head of the department of Zoology; Maynard F. Jordan advanced from associate professor to professor of Mathematics and Astronomy.

In Technology, Irwin B. Douglass, from assistant to associate professor of Chemistry and Chemical Engineering; Alpheus C. Lyon from associate professor of Civil Engineering to professor of hydraulic engineering; Joseph M. Treithen, from assistant professor to associate professor of Geology; Matthew McNeary from instructor to assistant professor of engineering drafting.

In the Military Department, Francis R. Fuller, Professor of Military Science and Tactics, in charge of the Maine unit, received promotion from the War Department from lieutenant colonel to colonel. Infantry; Richard W. Healy received promotion from lieutenant to captain. Infantry. Lieutenant Colonel Leigh Bell was advanced from assistant professor to associate professor of Military Science and Tactics.

Scher Calls

(Continued from Page Two)

rences.

Need Trained Technicians

First, continuous education of the American people as to the dangerous shortage of technical men and their need in industry for the winning of the war. Second, a revamping of the present Selective Service system so that the allocation of all workers between the armed forces, industry and agriculture will have no element of personal preference.

In other words, if John Doe is placed in industry, no one will be able to say that he is there because he wanted to

escape the armed forces. They will know that he is at his job, because even if he wanted to join the armed forces, the Manpower Allocation Board would not allow him to, feeling that he could do more in his present job toward ending the war.

Unless something of this nature is done, a serious breach in national unity and morale, easily susceptible of enlargement by Axis agents and sympathizers, will result.

This sensational ink discovery eliminates the cause of most pen failures . . . ends gumming and clogging of inferior inks . . . cleans your pen as it writes! Get Quink with solv-x today. Rich, full-bodied, faster-drying—Quink gives a new zest to writing. Don't ask for ink—ask for new Parker Quink!

NEW PARKER QUINK is the only ink containing solv-x.
Eliminates the cause of most pen failures:

1. The solv-x in new Parker Quink dissolves sediment and gummy deposits left by inferior inks. Cleans your pen as it writes!
2. Quink with solv-x prevents the rubber rot and corrosion caused by strongly acid writing fluids.

154, 254, and up. Made by the makers of famous Parker Pens. 7 PERMANENT COLORS: Black, Blue-black, Royal Blue, Green, Violet, Brown, Red. 2 WASHABLE COLORS: Blue, Blue.
