Keep Ticket Neat Or You Can't Eat

BY VIRGINIA DYER

The sign in Stodder Hall's Cafeteria read, "No ticket, No Meal. Lose ticket—buy new one. Torn or crumpled ticket, buy new one."

Several hundred girls from Stodder, Chadbourne, Penobscot, and Balentine Halls reacted to the new sign by not taking their meal tickets to dinner Tuesday night, Nov. 28. Although the action was dubbed a "riot" by some, the girls were lady-like and quiet in their protest.

The dietitians, Edith G. Wilson, Dean of Women; Mary S. Zink, Assoc. Dean of Women; Mr. William C. Wells, Commons Director; and Miss Ethel M. MacLeod, Manager of Dining Rooms, called a special meeting to discuss the problem.

Three girls from each of the four dormitories involved met with the Standards Board members and with the administrative committee to air the "gripes" about the new sign and about the food and service in general. The main objection of most of the

girls was the phrase referring to crumpled or torn meal tickets. The girls feel that it is next to impossible to keep a small, thin piece of paper uncrumpled for 30 days.

The Standards Board was assigned the project to devise a new means of diningroom admission to perhaps make meal tickets unnecessary.

The girls at the meeting told the Dining Room Staff that the food was not hot when it was served. The staff assured them that they did not realize this and that steps would be taken immediately to insure hot food.

Miss MacLeod and Mr. Wells expressed their wishes that any suggestions or valid complaints be brought to their attention immediately. They feel sure that "rioting" is unnecessary and that in the future any difficulties can be worked out quietly.

ETV Sweeps Solon Vote

Public To Decide On Bond Issue In June Referendum

BY BARRY MILLS

The ETV issue clearly dominated the recent special legislative session. The solons finally approved the bill overwhelmingly last Saturday.

In the final vote, ETV swept the House of Representative 98-5 and cleared the Senate virtually without opposition. The only real debate lasted for an hour last Thursday after the second reading in the House.

The final step for educational television will be the referendum next June when the people will decide whether or not to float a \$1,500,000 bond issue to finance the project. The referendum will be held in conjunction with the party primaries.

The plan would set up educational television stations in Presque Isle, Calais, and Orono. These three stations would be tied in with the Colby-Bates-Bowdoin station in Augusta which in turn is linked with the ETV station in Durham, New Hampshire. This network would cover every school in Maine as well as 98% of the population.

The Democrats opposed financing the project with a bond issue but swung around when it looked as though their opposition might have imperiled ETV's passage. A bond issue requires a two-thirds majority of those present. The Democrats favored increasing this year's estimates to cover the project's cost.

Democratic Representative Jerome G. Plante, a senior at the University of Maine, stated that the cost of the bond issue would be over \$200,000. "If the money were available from other sources such as an enterprise would be unnecessary." He also added, "the bond issue would delay by more than six months the implementation of ETV."

Senate President Earle M. Hillman said, "We obviously could not increase the estimates anymore." He noted that sales tax and other major sources have been off for more than three months.

He added that only inheritance taxes have been keeping estimates ahead of revenues. "We increased the estimates by \$2,000,000 in the regular session and just couldn't increase them anymore," he said.

A small number of Representatives insisted on bucking the party leadership by voting against ETV. Representative Ernest D. Smith termed the project "socialized television." He went on to call it "the greatest breakthrough for socialism since Roosevelt's day."

House Majority Leader, John L. Baxter rebutted, saying that there is no more socialism in ETV than in our public school system itself.

Buried in the hurry-up atmosphere was a Democratic attempt to boost minimum wages for teachers from \$3,000 to \$4,000 by tacking an amendment to an educational subsidy bill. This same proposal was killed in the regular session.

Representative Plante cited the Governor's call for increased teacher's salaries during his inaugural address. "During the regular session," said Plante, "such utterances proved to be only teasing allusions." Plante said that the Governor again failed to back up his words at the special session.

Senate President Hillman said that the amendment was killed because "we just didn't have the money." However, he hinted that the bill will be brought up again in the next regular session in 1963.

The Democratic drive for increased governmental services was effectively countered throughout the session by Republican budgeting.

Plante mentioned that the legislature proved to be very short sighted by failing to take full advantage of our new Maine Vocational Institute. He claimed "Republican leadership, apparently with the Governor's blessing, refused the admission of legislation which would have enabled this institution to implement programs in carpentry, electrical, and sheet metal work."

He said that this was a waste of facilities already in existence. "Unfortunately, until 1964 their facilities will be used only by girls enrolled in the Practical Nursing course."

Garland Says Many Maine Educators Are Left-Wing

BY THOMAS SHIELDS

U. S. Representative Peter A. Garland said in a speech before the Maine Optometric Association Saturday in Portland that "there is definitely a conservative trend especially among high school and college students" in Maine's first district "in spite of the ultra, left-wing teachers of these students."

The Campus asked Representative Garland who and where these "ultra, left-wing teachers" are. Garland said "most are instructors of history, government, and economics that I have come in contact with." He declined to name any.

Garland said the ultra, left-wingers are "here and there, most are in colleges but there are some excellent examples in the high schools." Garland refused to be specific.

Garland, a Bowdoin graduate, said that his alma mater has "a couple of beauts." He added that Harvard is a "hornet's nest" of ultra, left-wing teachers.

Clyde Russell, Executive-Secretary of the Maine Teacher's Association, told the Campus that "Garland is running true to form. We don't consider it a serious charge, far out to the right as Garland is. Maine teachers in general are pretty much middle of the road."

New Campus Series

Foreign Feature

Ed Note: This is the first in a series of articles written by foreign students attending the University. All countries will be represented by their students here on campus. This is an endeavor to promote better international relations among students.

By Serge Henry

I was born during the War in Madagascar where my father was a volunteer for the French Army. A few months later I went with my parents to their home country, Mauritius Island, where I was brought up until my departure to the U. S. Mauritius Island was owned by

In Maine, however, life is a little different though being quite materialistic. The students enjoy a material comfort which I never dreamed of and I am told of better comfort in the bigger Universities. I am not criticizing the comfort because I like it. If you can afford it, why not have it?

I came to the University of Maine in February 1959 to start the spring semester as a special student. I chose this University because my uncle was a member of the faculty. It was quite a decision to make, but I really think that the sacrifice of being separated from my family and friends for at least four years is compensated for what I am learning at the University. Not to forget the advantages of being bilingual, as well as all the things I have seen in the big cities and in Maine, and all the new friends I have made.

The social life here is amazing and the teenagers here enjoy an independence which would provoke criticism among the Mauritian families. We do not have any universities or colleges at home, which makes it harder for me to draw a comparison. Dating was an entirely new system for me and I fortunately became acquainted with it very fast. The only way teenagers get together is in groups at an afternoon movie on a weekend, or at the beach. Besides this, all the parties are strictly private and chaperoned. None of our high schools are co-educational which makes it harder for the teenagers to mix.

Our economy depends upon the 27 sugar industries on the Island and most of the 600,000 tons of sugar produced yearly is sent to England. We do not have any direct transactions with the United States. All of our imports come from European countries, China, and Australia. We always think of the United States as the strongest country in the world, very materialistic but also very friendly. One can always identify an American tourist a home by his big cigar and his billfold.

SERGE HENRY

France until 1810 when, because of misfortune of wars, the British took it over and it is now a British Colony. Situated 1500 miles off the South-eastern coast of Africa, it has a surface area of 700 square miles. On this 34 by 42 mile Island live 600,000 people of different races, two-thirds being black.

It is almost impossible to compare such a small dot on the map to the United States. If I were a student in New York City I would try to make a comparison because it is a completely different world. Your life depends on automation.

Marlboro

campus favorite in all 50 states!

*...It's a top seller at colleges from U.S.C. to Yale
...and 1st in the Flip-Top box in every single state*

If you think you're seeing more Marlboro men lately, you're right. More than 25,000 smokers all over the country are switching to Marlboro every month!

You'll know why when you try them.

Marlboro is the filter cigarette with the unfiltered taste. The secret of the flavor is the famous Marlboro recipe from Richmond, Virginia... and the pure white Selectrate filter that goes with it.

Try Marlboro and judge for yourself. On or off campus, you get a lot to like.

Christmas Around The World Show Will Be On Television This Sunday

BY SUE DODGE

Sunday, December 10, "The University of Maine and You" will present its special show, "Christmas Around the World," over WABI TV Bangor and WAGM TV, Presque Isle at 12 noon.

This holiday season's program, by

People Say—
You can find it at PARK'S

SKATES SHARPENED

25¢

with this coupon

PARK'S HARDWARE
Mill Street & VARIETY
Orono, Maine

popular request, will be a repetition of the type of show televised two years ago at this time. Foreign students from the University of Maine will explain how Christmas is celebrated in their native countries. There will be discussions with TV host, Robert MacLauchlin and musical selections by the foreign students.

Furnishing the vocal renditions for the special program will be the combined groups of the Maine Dirigos and the Maine Steiners, both of whom have appeared on the program previously this year. Musical direction will be furnished by Mr. George Blouin.

For the first time this year there will be a live studio audience composed of classes from the University.

This will be the last of this year's series of "The University of Maine and You." The next program will be on January 7, 1962, after the Christmas holidays.

Union News

The third Annual Couples Christmas Dance will be held Saturday, Dec. 9, from 8:30 to 11:00 p.m. in the Main Lounge. The dance is co-sponsored by the Memorial Union Activities Board and the Mrs. Maine Club.

Charles Dudley's orchestra will provide music for the semi-formal dance. Admission is free.

CALENDAR

Fri.—Campus Championship Bowling Playoff 6 p.m. Game Room.

"Hoot #2" will be held in the Coe Lounge at 8 p.m. Bring guitars, banjos, ukles, etc. for an evening of folk songs.

Tues.—Poetry Hour "The Other Wise Man"—Reader: Hilda M. Fife, 4 p.m. Coe Lounge

Wed.—Film: "Between the Tides"—4 p.m. Bangor Room

The annual Union Christmas Party for students, faculty and their families, and staff of the University will be held Thursday evening, December 14, at 7 p.m.

The Christmas party will include carol singing, cartoons, a student pageant of the "Nutcracker Suite," Santa, gifts, and refreshments. Decorations will be in the holiday theme.

Chairman of the party is Robert Chadwick. Other committee members are: Connie Coyne, Decorations; Linda Maroney, Entertainment; Mary Rogers, Refreshments; Mary Lou Hazelton; Stephen DeBiasco, Music; Judy Anderson, Santa and Gifts; and Judy Kay, Judy Strickland, Sherrill True, Marilyn Mehlman, and Natalie Jackson, General.

Why college men choose careers with Du Pont

Every year, several hundred new college graduates choose Du Pont. Many Masters and Ph.D.'s do, too.

Recently we asked some of them what factors influenced them to decide for Du Pont. They cited more than half a dozen reasons. Here are some they almost all agreed upon:

OPPORTUNITY AND RECOGNITION

They were aware that college-trained beginners go right to work with men who have achieved. For example, research chemists work with individuals who've done successful research. New engineers work with pros, some of whom have designed new plants, or devised new manufacturing methods, or distinguished themselves in some other way. And other graduates, with B.A. or M.B.A. degrees, go to work with leaders who've been successful in Sales or Advertising or Treasurer's, or another of Du Pont's many departments.

RESEARCH CREATES NEW PRODUCTS; NEW PRODUCTS CREATE NEW JOBS

Men like working for a company that believes in research, enough to invest in it...\$90 million a year! The fact is that important new products come from Du Pont laboratories and go to Du Pont manufacturing plants with frequency.

Here are but a few since World War II: "Orlon"* acrylic fiber followed nylon (soon after the war). Then came "Dacron"* polyester fiber, "Mylar"* polyester film, "Lucite"* acrylic lacquer and "Delrin"* acetal resin. These, and many others, have created thousands of new jobs...in research, manufacturing, sales...in fact, in all Du Pont departments.

DUPONT BACKS EMPLOYEES WITH HUGE INVESTMENT

New graduates feel that every facility is provided for doing the job well. Last year, Du Pont's operating investment per employee was \$32,500. Since much of this was expended to provide the most modern and best of equipment to work with, it further increases the chance for individual achievement.

DUPONT PROVIDES STEADY EMPLOYMENT

Career seekers appreciate the importance of security. Today, the average annual turnover rate at Du Pont is less than one-third that of industry nationally.

If you'd like to learn more about job opportunities at Du Pont, just clip and mail this coupon. And be sure to tell us your course of study, so we can send you the appropriate booklet.

Original Works Of Art Still Available

Original Woodcut - Only \$5.00

Students can purchase original art objects, created and priced specifically for the University of Maine art lover. Prices are 15% to 50% lower than what the same objects would bring in shops or from the artist himself. Nothing in the show exceeds \$25.

On display are original drawings; paintings, both watercolor and oil; original lithographs, etchings, engravings, woodcuts; printed fabrics—scarves and handkerchieves; hand-made pottery—vases, urns, bowls, jugs, coffee cups and ashtrays. Anything and everything for the original gift-giver.

The Art Department, because it is part of a state institution, acts only in liaison between the artist and the client. In effect, the purchaser is buying directly from the artist and not from the University. This eliminates the middleman and the resulting saving goes to the student.

Although a large percentage of the show is by Maine artists, some dealers have sent original art by such great modern European masters as Picasso, Matisse, Erni, Goya, Toulouse-Latrec, Renoir. American greats which have been included: Schreiber, Jules, Mosca, Bohrod, Amen. Maine artists, many of whom are familiar to us all are: Francis Hamabe, paintings and serigraphs; Stell and Chevis, Block-printed scarves and fabrics;

Plummer Fund Announced

Wesley C. Plumer, of Schenectady, N. Y., has established a scholarship fund to be awarded annually to students in the college of technology. Plumer is an alumnus of the University, employed with General Electric. Announcement of the fund was

made by Dr. Raymond H. Fogler, president of the board of trustees. The Wesley C. Plumer Fund amounts to nearly \$6,000. Income from the sum will be used to help deserving technology students.

A native of Portland, Me., Plumer received a degree in electrical engineering in 1921 and a professional degree of electrical engineer in 1926. He is a member of Tau Beta Pi, honorary engineering society, American Institute of Electrical Engineers and New York State Society of Professional Engineers.

Carroll Thayer-Berry, woodcuts of the Maine scene; Harry and Hannah Greaver, drawings and paintings; pottery by Carol Ingraham.

Career Cues:

"This age of specialization opens special opportunities for the well-rounded man!"

Robert Saudek, President
Robert Saudek Associates, Inc.

"The more specialists society creates to cope with its complexities, the easier it can be for a non-specialist to achieve success.

If that seems paradoxical, look at it this way: the more men who go out for specific positions on the ball club, the more chance you have to wind up as manager!

Today's world—in government, business, the arts, even science—needs the well-rounded man. He's the man who

can see the entire picture...the man who can draw on a broad background of knowledge, evaluate the problem, then assign the details to specialists.

The world of entertainment may seem somewhat special, but it's a case in point. These days, it demands more of its people than ever before. Today's musical comedy score is often as sophisticated as grand opera. Drama draws heavily on psychology and history. Television productions are concerned with nuclear science and political science. If you've ever watched 'Omnibus' you may have seen how our productions have run the gamut of a wide range of man's interests.

So I suggest to you that even though you may concentrate on one special field of interest, keep your viewpoint broad. Keep your college curriculum as diversified as possible. Attend lectures and concerts, the theatres and museums. Above all, read and read, and listen and listen! But pay scant heed to the oracle who says there's no route to the top but that of specialization. I don't believe it!"

Robert Saudek is the creator of many of television's most famous programs—including the award-winning "Omnibus" series. Former network executive and head of the TV-Radio Workshop of the Ford Foundation, Bob enjoys a "Camel break". He's been a Camel fan since undergraduate days at Harvard.

And for a special kind of smoking satisfaction...

The BILL-session — Parks On The 100th Legislature

By Bill Parks

May we be among the first to offer our congratulations to Messrs. Hussey and Hill on their denunciations of the Maine Legislature. We can only hope that the remaining members of the board of trustees will join them and present a united front against the irresponsible actions of the 100th Maine Legislature. Unfortunately it is too late to amend the actions of the past

session. But there will always be a tomorrow.

Now is the time to organize support for the university. Since the legislature holds the power of life and death over the university, the only sensible solution is to pressure the individual members. We cannot believe that the actions of the last session were truly reflective of public opinion. Interest groups should be formed in every community. Those legis-

lators who voted against the university's budget should be made accountable for their actions. Why isn't it feasible to send lobbying groups to Augusta? Other groups of citizens use this method to forward their interests. The university most certainly has interests to protect. Such a campaign could be financed by interested citizens, the alumni associations, and the students and teachers. If everybody con-

tributed his own fair share, the results would prove to be astounding.

Of course there will always be those poor fools who will cry out against "Socialism" and "Federalism." In their fanaticism they fail to realize that the best protection against socialism is a well educated populace. Our university is not only the best safeguard of democracy, but also the only hope that Maine has of ever attaining economic prosperity. If Maine truly desires a thriving, modern state, then she must provide for the education of her young.

What the university needs right now is a "crash program" to meet national standards. This program would not only require the full cooperation of the legislature, but also the use of federal funds. We should not let our stupid pride stand in the way of progress. We are not giving up our "State's Rights" by accepting outside aid. We should be realistic

enough to face up to the fact that we do not have the necessary funds in this state to have the grade of education we need.

Now is the time to act. It will be too late if we wait until the next legislative session. The people of Maine must be made to realize the seriousness of the problem.

UM Fallout Shelters?

To the Editor:

Today's emphasis on nuclear warfare, brings up the vital and controversial subject of fallout shelters. What arrangements have been made for University students, and what is the recommended procedure to follow in case of an attack?

Respectfully
Chris Lake

Dear Obee

Dear Obee,

My mother has been nagging me for years, and saying that I'm a worthless failure. How can I stop her nagging and get my teeth into something?

HENPECKED

Dear Henpecked,
Nip her.

Love,
Obee

Dear Obee,

My child won't go to school because he says he won't be able to brush after every meal. What's the answer?

WORRIED MOTHER

Dear Worried Mother,

Hypnotize him and tell him he is a chicken. Chickens don't have teeth.

Love,
Obee

Dear Obee,

I was very tired when I performed my last operation at the hospital. By mistake I sewed his elbow to the back of his neck. What can I do?

DESPAIRING

Dear Despairing,
Don't Stare.

Love,
Obee

Dear Obee,

I am hopelessly infatuated with the U.S. ambassador to Japan. He is a much older man, and doesn't even know that I exist. Any suggestions?

WRAPPED UP

Dear Wrapped Up,

These passing fancies can only get you in trouble. You'd be much better off staying with the President and your two lovely children.

Love,
Obee

Exams?

Here's the easy and safe way to keep mentally alert:

It's the safe stay awake tablet—NoDoz®. And it's especially helpful when you must be sharp under pressure. NoDoz helps restore mental alertness in minutes.

NoDoz keeps you alert with the safe awakener found in coffee and tea. Yet NoDoz is faster, handier, more reliable.

Absolutely not habit-forming, NoDoz is so safe it is sold everywhere without prescription. Take it while driving, studying, working, or entertaining.

"HAPPINESS CAN'T BUY MONEY"

I have asked the makers of Marlboro—an enterprising and aggressive group of men; yet at the same time warm and lovable; though not without acumen, perspicacity, and drive; which does not, however, mask their essential great-heartedness; a quality evident to all who have ever enjoyed the beneficence of their wares; I refer, of course, to Marlboro Cigarettes, a smoke fashioned with such loving care and tipped with such an easy-drawing filter that these old eyes grow misty when I think upon it—I have asked, I say, the makers of Marlboro—that aggregate of shrewd but kindly tobaccoists, that cluster of hearty souls bound together by the profit motive and an unflagging determination to provide a cigarette forever flavorful and eternally pleasing—I have asked, I say, the makers of Marlboro whether I might use today's column to take up the controversial question: Should a coed share expenses on a date?

"Yes," said the makers simply. We all shook hands then and squeezed each other's shoulders and exchanged brave smiles, and if our eyes were a trifle moist, who can blame us?

To the topic then: Should a coed share expenses on a date? I think I can best answer the question by citing the following typical case:

Poseidon Nebenzal, a student at Oklahoma A and M, majoring in hides and tallow, fell wildly in love with Mary Ellen Flange, a flax weevil major at the same school. His love, he had

reason to believe from Mary Ellen's sidelong glances and maidenly blushes, was not entirely unrequited, and by and by he mustered up enough courage to ask her the all-important question: "Will you wear my 4-H pin?"

"Yes," she said simply. They shook hands then and squeezed each other's shoulders and exchanged brave smiles, and if their eyes were a trifle moist, who can blame them?

For a time things went swimmingly. Then a cloud appeared. Mary Ellen, it seems, was a rich girl and accustomed to costly pleasures. Poseidon was bone-poor and he quickly ran out of money. Unable to take Mary Ellen to the posh places she fancied and too proud to tell her the reason, he turned surly and full of melancholy. Soon their romance, so promising at the beginning, was headed for a breakup. But at the last moment, Poseidon managed to blurt out the truth.

"Oh, beloved agrarian!" cried Mary Ellen, grappling him close. "Oh, proud husbandman! Oh, foolish reaper! Why have you not told me before? I have plenty of money, and I will contribute according to my ability."

Poseidon, of course, protested, but she finally persuaded him of the wisdom of her course. From then on they split all expenses according to their incomes. Rather than embarrass Poseidon by handing him money in public, a joint bank account was set up to allow him to write checks. Into this account each week they faithfully deposited their respective allowances—35 cents from Poseidon; \$2300 from Mary Ellen.

And it worked fine! They were happy—truly happy! And what's more, when they graduated they had a nice little nest egg—eight million dollars—with which to furnish a lovely apartment in Lubbock, Texas, where today they operate the local laundromat.

So you see? You too can salvage your failing romance if you will only adopt a healthy, sensible attitude toward money.

© 1961 Max Shulman

Letters to the Editor

Writes On Insurance

To the Editor:

An editorial in your November 16th issue is erroneous and subject to misinterpretation. There are no special student insurance rates and no insurance company in this or any other state can provide insurance protection without receipt of the full regular premium.

Your lead statements were inspired by certain life insurance salesmen who offer a deferred-payment method, but the insurance company is not a party to such a transaction and the buyer must pay interest and carrying charges to the lender, whether the salesman or a bank, which means that the student suffers a higher, not a lower cost. Therefore, your readers would do well to investigate carefully before incurring addi-

tional liabilities and charges. A certain Pennsylvania life insurance company has also circularized University students and their parents—but is not admitted to do business in Maine and, therefore, buyers cannot be protected by the State of Maine Insurance Department.

Insurance is a complicated and specialized service. Look carefully before you sign, do business with a qualified person you can trust, after satisfying yourself that he has complied with the regulations of the University and the laws of Maine. If in doubt, you can easily verify with any official of the University or the Maine Insurance Commissioner in Augusta.

Yours very truly,
Howard M. Goodwin,
C.L.U., '38

Bright futures in data transmission at W. E.

New engineers with initiative who can meet Western Electric's high standards are offered many exciting career opportunities with our company in data processing development work as it relates to communications.

For example, Western's engineers—working closely with Bell Telephone Laboratories—have solved development and manufacturing problems connected with the Bell System's new DATA-PHONE Data set (made by Western Electric). DATA-PHONE service lets business machines, such as computers, "speak" to each other in a language of numbers and symbols over existing telephone communication networks. This represents a tremendous boon to business; and consequently, it is estimated that some day there may be more machine talk than people talk using telephone lines.

Of course, data communications is only one of many rewarding career areas that await you at Western Electric. Here are just a few of the others: electronic switching... solid state electronic devices... microwave radio relay... computer-programmed production lines... solar cells... optical masers... futuristic telephones.

We need high-caliber, forward-thinking engineers now to help us transform these plans into realities or to work with us in scores of other key communications areas. Your future, the future of Western Electric, and the future of America's communications—could well depend on your first career connection.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial, and chemical engineers, as well as physical science, liberal arts, and business majors. All qualified applicants will receive careful consideration for employment without regard to race, creed, color or national origin. For more information about Western Electric, write College Relations, Western Electric Company, Room 6106, 222 Broadway, New York 38, New York. And be sure to arrange for a Western Electric interview when our college representatives visit your campus.

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J.; Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 33 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.

We Must Recognize Red China

Communist China is there—we cannot deny her existence and say that Chiang Kai-shek represents the Chinese people any longer. We must be realistic and recognize Red China. We have everything to gain and nothing to lose.

Recognition of Red China would strengthen our cause in Southeast Asia; having State Department personnel in China would increase our knowledge of the country and how to deal with it; and bringing China into the international community may soften her belligerence.

China will soon have the A-Bomb and if we have not recognized her by then, we may find ourselves in an uncompromising position from which we can never retreat. We must recognize China.

Our Muzzled Military

The people who are arguing for freedom of speech for the military seem to have forgotten that our armed forces were designed as a tool for our civilian government to use as it saw fit.

The Armed forces are based on discipline and when an officer does something he isn't told to, he is subject to court martial.

If our military isn't kept subordinate to the civilian government it could become a political power as it is in France and other smaller countries throughout the world.

If a General doesn't approve of what he is being ordered to do — he should resign, as General Walker did, and work for what he believes as a civilian.

Et Tu Brute!

If Caesar's gladiators thought they had a rough sport, they should have been around a few centuries later to join a hunting party during the Maine open deer season.

As we go to press, the 1961 hunting season is finished. Although the final tabulations are not yet in, the deer kill will be less than half and the total man-kill of 14 is double the 1960 mark. We would advocate a much stiffer penalty for those who shoot before they look. Caesar would have thrown them to the lions . . . but this is the Space Age.

Education in Maine

Maine Has Fallen Behind

The Governor's Advisory Committee's Report on Education

Maine's Ability to Pay

Any survey of school costs and revenue sources should refer, if briefly, to the important aspects of ability to pay and effort. Have they moved in close conformity in the state? In other words, have local and state government moved together toward making as large an effort as possible, within the ability of the people of Maine to sustain public education?

Maine has a relatively low per capita income, yet increasing more rapidly than the national average and twice as fast as the nearby state of Rhode Island. Maine is only slightly above the national average in the percentage of personal income taken by local and state government taxes.

At first glance, one might be tempted to agree with the tentative conclusions of the first installment of the Sly Report. Dr. Sly states that Maine is doing about all that it can do on present yields and present bases.

When two other significant measurements of the ability to pay factor are considered, however, it is learned that

while Maine had a personal income per child of school age of over \$7,000 annually in 1957, placing the state 31st in the country, it was spending only \$225 per pupil in the average daily attendance and occupying 40th position in this category. When these figures are considered as a percentage of the United States average, Maine is given an "ability" factor of 80, but a "performance" factor of only 71.

Maine's Effort

How does Maine compare with other states in the effort it has been making in recent years to upgrade its schools? When we consider the local property tax, which bears two thirds of the burden of financing schools, we discover that the percentage of increase in Maine, from 1953 to 1958, was only 25.4 percent, as compared with a national average of 46.2 percent.

State government has done better in Maine, for it has increased its share of the total cost of public schools by over 86 percent in the same period, with the United States increase averaging 64.8 percent. Even so, the per capita state

expenditure for all public education in Maine in 1958 was only \$25.05, hardly more than half the national average of \$43.22, putting Maine in 45th place.

Per capita spending of state and local governments for local schools in Maine, in 1958, was \$55.99, compared with \$76.82 for the national average. This assigns to Maine a rank of 40th among the states, although Maine's per capita income places the state in 35th spot. In this category, Maine is only \$12.62 ahead of Mississippi, the state with the lowest per capita income in the country. Mississippi's effort, therefore, is far greater than Maine's.

From the above, the committee draws this conclusion: that Maine has an ability to pay for better schools not yet taxed beyond its limit, considering especially the current progress in boosting per capita incomes. In effect, Maine has fallen behind what might be expected of a state with comparable resources.

NEXT WEEK: Tax sources of Educational support in Maine.

Letters to the Editor

About That Food

Ed. Note: The following letter is addressed to Misses LeGoff and Morrison who wrote a reply to Bill Parks' attack on the Commons which appeared in the November 9, '61 issue of the MAINE CAMPUS.

Misses LeGoff and Morrison:
% Maine Campus

The girls of Kennebec Hall can't help but wonder, after reading your article, how many people agree with your ideas on the food situation here at the U. of M. After eating at Estabrooke Hall for two and three years, we feel qualified to invite you in front of the lines to straighten out some of your misconceptions.

We would say that it is not the quantity of the food that encourages growth and expansion, but rather the starches and fats in overabundance. Seconds on anything but meat, salad, juice, and dessert sounds very generous, but when you think about it, there really isn't very much to a meal after you eliminate those things. Vegetables, bread, and milk may be staples of life, but they are also starches of life, and the vegetables are usually still frozen, or watery and tasteless when they are served. Granted, there are many institutions serving worse food than we, but there are many more serving better food than we, and if they can do it, why can't we?

The menus show variety if nothing else. And most people would not get this kind of variety at home. But there are two different kinds of variety. One means that ordinary, popular foods are served at sufficient intervals so as not to make them tiresome. The other

is that unusual, unpopular foods are served when enough leftovers have accumulated to give the cooks a chance to use their fertile imaginations. The latter is the kind of variety we would not get at home.

As far as the food being hot when we get it, we have seldom witnessed any steam rising from the food on the plates. It may be reasonably warm when served, but after it has been dished onto cold plates it cools off quite rapidly. Whether we walk or run to the tables makes little difference in the hotness of our foods.

Restaurants are not run for the same purpose that our dining halls are run. Restaurants are businesses, and are operated for a profit. Cer-

tainly we can't expect the same foods as offered in a restaurant, but our dining halls cannot be compared to them, either. Very few restaurants of any quality would charge a customer for breakage, and not many would charge for a second serving. We have worked in restaurants and hotels, and very seldom has anything like that happened.

Opinions of one person may be insignificant, but when one opinion is voiced by well over half of the campus, then it is time to pay attention and do something about it. Why can't something be done? Or is this another way of showing the state how poor we are?

Signed by twenty girls
from Kennebec Hall

Editor's Corner

We will be the first to agree that there is an argument against Educational Television. However, any opposition should be done by reason, not by name-calling. Neil Bishop, oft-defeated Republican candidate for Governor and Congressman, called ETV "socialistic" during the Special Session last week. He said ETV "opened the door to the 'Pinks,'" meaning, we suppose, the near-Reds. Bishop is a teacher of chemistry at Cony High in Augusta. As one professor said: "It's a good thing he isn't teaching social studies."

We take this opportunity to pay tribute to the late Senator Styles Bridges of New Hampshire, who died Nov. 26. Bridges, Minority Leader in the Senate, was graduated from the

University of Maine in 1918.

Many comments have been tossed about of late concerning the why's of the size of the Hauck Auditorium. Final plans call for 600 seats. There is a good reason for the reduction from 1,500 seats. In a nutshell, the 1,500 seat building would not be large enough for graduation and other large events, and it would be too large for use as a theatre. (Anything bigger would require a public address system.) Even though it will be used for many other purposes other than theatrical productions, this function is important. If you don't think so, ask your fellow students. The tickets for three performances of the current production "Ah, Wilderness!" were sold out three days before the opening.

Bookstore Will Stock Paperbacks

The University Bookstore will be adding a stock of paperback books in the near future.

The quantity of books carried will be limited because of a lack of space. The Bookstore has asked a faculty committee to draw up a list of 100 books that they would recommend stocking. This committee would like the assistance of students and the rest of the faculty in making up the list.

On the coupon below list five paperback books that you would like to see on Bookstore counters. The listing of books does not necessarily indicate order of preference. If you do not know the author and publisher, the title will be sufficient.

Send to the University Bookstore as soon as possible. If the books you choose are not put on display at once, they still may appear in the future.

I would like to see the following paperback books on stock at the University Bookstore.

Name:

D+1 By D-2 Theme For Military Ball

The announcement of the Honorary Lieutenant Colonel for the University's R.O.T.C. regiment will highlight the annual Military Ball this Friday night.

Candidates for the title are: Alice McKiel, Albion; Sally Kennett, Topsham; Barbara Cramer, Reading, Mass.; Karen Reid, Hendersonville, N. C.; and Molly Fay, Westfield, N. J. One of the candidates will be chosen by vote of the student body in the Union Lobby from 9-4 p.m. Friday.

The theme for the Ball, presented by the Scabbard and Blade Military honor society, is D+1 by D-2. It comes from the date D-Day+1=Dec. 8, and the designation of the

University Scabbard and Blade Chapter, D-Company 2nd Regiment.

The Memorial Gymnasium will be decorated with scenes from World War II. Music will be furnished by Nat Dimond's Orchestra from 9 p.m. to 1 a.m.

Tickets may be purchased from Scabbard and Blade members, at the armory after drill, and in the downstairs hall of the Union from 9 a.m. to 4 p.m.

The three chief disease targets of The National Foundation, supported by March of Dimes contributions, are birth defects, arthritis and polio.

Notices

Attention Junior Class! Committees are being formed for the Junior Prom under the Executive Committee. A general class meeting will be held as soon as the spring semester begins. All juniors are urged to attend. The Executive Committee: Jim Hanson, President; Baron Hicken, Vice President; Jo Ann Chandler, Secretary; Charlie Crockett, Treasurer; Parker Harris, Debbie Chapman, Tom Deans, Gail Hoxie, Bill Ireland, and Phil Campbell.

The Forestry Wives' Club will hold a Christmas Party for their children on Saturday, Dec. 9, at 2 p.m. in the Coe Lounge of the Union. Bring a 50¢ gift for your child to be handed out by Santa Claus. Refreshments will be served and cartoons will be shown. On Dec. 14, the next meeting of the Club will take place at 8:00. Brownie Schrumph will demonstrate Christmas breads. Don't forget your gifts, coffee, and the two recipes.

James Nelson of the U. S. Department of Labor, Boston, Mass., will speak at the Conference of Federal Laws Affecting Labor-Management Relations on Dec. 14 and 15. The meeting will be held on Dec. 15 in the Lown Room of the Union. Dr. W. Stanley Devino, assistant professor of business economics, will serve as chairman of the session. Management, Labor, and Government officials concerned with industrial relations will take part in the two-day conference. A public session will be held at 8 p.m. on Dec. 14.

The Mrs. Maine Club will hold its next meeting on Tuesday, Dec. 12, at 8 o'clock in the Main Lounge of the Union. There will be a business meeting followed by a guest speaker who will present a talk on Civil Defense.

All married couples are invited to attend the Christmas Dance held this Saturday in the Main Lounge of the Union. Music will be furnished by "Charlie Freeman's Band." Admission is free and refreshments will be served.

Send your poetry for the poetry magazine to: Box S, Fernald Hall, or to Dr. Terrell, 250 Stevens Hall or bring your poetry to 210 Stevens Hall any Tuesday night at 6:30.

John P. Hoover, special assistant to the Assistant Secretary of State for Inter-American Affairs, will speak Monday, Dec. 11, at 4:00 p.m. in the Bangor Room of the Union. Mr. Hoover, an authority on Caribbean policy, will discuss "American Experience in the Caribbean." He will be the guest of the Politics and International Relations Club.

The Maine Student Branch of the American Society of Agricultural Engineers will meet Dec. 13, at 4:00 p.m. in Room 1 of the Agricultural Engineering Building. Dean Winthrop Libby will speak on his recent visit to Haiti.

The next meeting of the Debate Club will be held on December 11 at 3:10 p.m. in 310 Stevens Hall.

BETTER

Fallout is the topic of the day. But it comes in different forms. If it isn't radioactive, it may be Melolontha melolontha.

Melolontha melolontha is a red-dish-brown beetle from Paris who recently decided to emigrate to the United States. Government inspectors find the passengers arriving on planes at New York, Boston, Chicago and Anchorage, Alaska.

Unfortunately for "Melo," and fortunately for us, the happy eater is being destroyed. Planes are being treated before leaving for the States, and again when arriving.

Girl Watcher's Guide

Presented by Pall Mall Famous Cigarettes

The sign of the amateur

LESSON 5 - The importance of head control

We are told that bird watchers, who always take notes while they watch, are able to keep one eye on the bird and one eye on the notebook. Eye dexterity of this type is also a great asset to the girl watcher. It enables him to watch two girls at the same time, even when the girls are sitting on opposite sides of a classroom. The beginner,

who must watch the girls one at a time in a situation of this type, must learn to restrict his movements to the eye-balls. The girl watcher never moves his head. Undue head-turning, particularly if it is accompanied by shouts or whistles, is the sign of the amateur. (If you want something to shout about, try a Pall Mall!)

WHY BE AN AMATEUR? JOIN THE AMERICAN SOCIETY OF GIRL WATCHERS NOW!

Christmas Vespers

Chorus Sings Sunday

The Christmas portion of Handel's "Messiah" will be presented as part of the Christmas Vespers program Sunday at 4:00 p.m. in the gym. The University Chorus of 110 voices will be directed by Lewis Niven, music department chairman, and will be accompanied by the orchestra, Robert Groth, assistant professor of music.

The opening antiphon will include a setting by J. S. Bach of the chorale, "Planets, Stars and Airs of Space." The chorus will then enter in a candle-light procession to present the "Messiah." This great choral work, composed in a 24 day period in 1741, has probably had more performances than any other masterwork in the history of music.

University students appearing as soloists with the orchestra and chorus are: Leona Murch and Joann Peakes, sopranos; Pamela Trojanoski and Ann Ziegler, contraltos; Alan Treworgy and Ernest True, tenors; and John McConnell, baritone.

Students, faculty and the general public are invited to attend this event. There is no admission charge.

Maine Debaters Win Tournament

Joyce Higgins and Royce Flood represented the University at the Tufts University Debate Tournament, Dec. 1 and 2. This team won debates from Emerson College, St. Michael's College, and William and Mary College, and lost debates to Tufts University, St. Anselm's, and Dartmouth.

The University will send four debaters to the St. Anselm's College Novice Debate Tournament on December 9.

Cercle Francais Club Invites Students To Sing Carols

The Cercle Francais Club will sing Christmas carols on campus Dec. 13. All those interested in joining the group are urged to meet in 17-A North Stevens at 6:30 on that evening. Song sheets are now available in North Stevens.

Plans have also been made for

future club projects. There will be a public showing of French films next semester, as well as discussions on French literature and civilization, readings of French poetry and play production. To create a more continental atmosphere, the organization

of the club will be that of a 17th century royal court. Various soirées, including a coronation party, will be held in connection with the court. All students interested in participating in these activities should attend the January meeting of the club.

Ackor's Angle

BY JEFF ACKOR

The 1961 Deer season ended quietly on Tuesday. Possibly, it would be fitting for me to say that the "man season" ended Tuesday. In a little over a month the licensed hunters in Maine managed to kill what appears to be well under a record number of deer and what no doubt is well over a record number of men.

I have never seen a man that even vaguely resembled a deer. A man can sound like a deer if he is walking in thick underbrush, and a glimpse of a man's white or brown shirt collar might resemble the white or brown on a deer, but a man is as different from a deer as he is from a bear. I find the problem relatively easy to present here, but I am without any practical suggestion which might eliminate the majority of needless hunting accidents.

There is one bright light, however, rising out of the dark shadows of the month, and that is word from the Department of Inland Fisheries and Game announcing the appointment of Game Warden Dean Jordan to the newly created post of Department Safety Officer. In his new job, Dean will work with sportsmen's clubs and other similar organizations on matters of Hunter Safety, Water Safety and other Safety projects. Dean's new job will also require him to work closely with the National Rifle Association-Co-operative Hunter Safety

Program.

The Department of Inland Fisheries and Game is not in a position to extend the necessary Safety education to all the youngsters in Maine, but the Department is making an effort to have its facilities and knowledge on matters of safety available through the many sportsmen's clubs in the State. In order for any type of Safety program to be effective in Maine, the co-operation of all interested adult sportsmen and parents is essential. Safety Officer Jordan will be available, upon reasonable notice, to help clubs with their safety programs and to help new clubs get started on the right foot.

Dean Jordan is a qualified man who understands many of the safety problems existing in the state, but he is only one man. The effectiveness of his work will depend on the co-operation he receives throughout the state. That's the story folks. Those of us who cherish the privilege allowing us to hunt and fish will have to work harder to assure this privilege if we intend to keep it.

Late reports: Paul Houlares, of TKE, dropped a 110 pound spikehorn on Streaked Mountain, in Buckfield with a 30.30. Bob McDonald tagged a 90 pound doe in Bridgeton. "Ozzie" Plummer, of Beta, hocked his 35 last week after missing his ninth straight.

Baby Blue Meet Preppers In Tough Contest Monday

Unbeaten in two starts, the Maine frosh basketball team will meet its first tough game at MCI Monday, according to coach Woody Carville.

In their first two contests, the Baby Bears romped to victories over Cheverus and John Bapst. However, MCI will be rugged for several reasons. The preppers feature a tall club led by

Hartford from last year's Eastern Maine Championship Presque Isle team and 6-10 Bob Teenan from Lincoln.

In addition, MCI's home gym is small and the preppers, used to their own floor, are always tough at home.

After the first two games, Carville had praise for 6-3 forward John Gillette and 6-2 forward Dave Svendsen. The coach liked Gillette's outstanding rebounding in both contests and his 25 point outburst in the opener, against Cheverus. In the contest with John Bapst, Gillette spent over half the game on the bench. Svendsen also scored and rebounded well.

Cage Buzzes As Styrynmen Work

BY BILL SMULLEN

With the cross country season over and winter approaching, the University of Maine field house is the site each day of tryouts for the freshman and varsity indoor track teams.

Maine has always turned out an excellent track team, and this winter should be no exception, according to coach Ed Styryna. The varsity is blessed with a large number of returnees as well as fresh talent from last year's frosh club.

Several fine men graduated last year, but there are some strong runners moving up to fill important slots, according to Styryna. Maine should be adequate in the jumping events al-

though thin is the weight department, the coach says. There is a lack of depth in the middle distances, but a lot of strength in the long runs, Styryna adds.

Styryna feels that his men are improving each day and should be ready for the forthcoming season.

The frosh team is showing a lot of potential and is strong in number, says Styryna, who handles both the varsity and freshman aggregations. However, the squad could use more hurdlers and strength in other events, as the team lacks quality rather than quantity.

Check your opinions against L&M's Campus Opinion Poll #13

Dr. Milford Wence: "It is a great effort to read this magazine."

Asst. Prof. James Barushok: "No doubt about the . . . quality."

Dr. Herbert J. Bass: "Don't blame me—I voted for Coffin."

Green Cagers Hit Cats' Lair

Three games under their belts, Brian McCall's inexperienced cagers travel to Burlington, Vermont, for back-to-back Yankee Conference contests with the UVM Catamounts tomorrow and Saturday, then return home for Bowdoin on Tuesday.

Maine played its second State Series game last night with Bates at Lewiston after bowing to Colby on Monday, 76-74, and beating Tufts in the 1961-62 opener on Saturday.

Following the Colby game, Coach McCall commented that the contest could have gone either way and that he was satisfied with his club's 100% effort. He was pleased by the improvement shown by Art Warren, who scored 18, and Lennie MacPhee, who dumped in 15.

Naturally the play of Skip Chappelle, who scored 52 points in the first two contests, drew praise from McCall. Chappelle ran his three year total to 1014, breaking Larry Schiner's record of 969.

Ironically, Colby beat the Bears at their own game, scoring 22 of 32 from the foul line against the Bear's 20 of 32, while both clubs had 27 field goals. McCall also thought that the Mules showed more hustle than in the past and attributed the improvement to the lift given the club by sophomore Ken Stone. Stone scored 25 points and excelled in all phases in the contest.

As for the upcoming Vermont and Bowdoin contests, the Bears are in for a tough time. Vermont returns with four starters including Benny Becton, a 21.7 point scorer as a soph and an All Yankee Conference choice. Others returning and out to avenge the 94-

63 and 85-51 losses of a year ago, include Jack Shabel (14.3), Dick Ader (10.8) and John Stahler (5.0).

Becton will long be remembered for his fantastic jumping ability. In an effort to improve the rebounding the Bears will need against Becton, McCall stated that sophomore John McGonagle will get a chance to see more action. McGonagle showed well in the Colby contest after replacing Pud Robertson and Gary Johnston at center, who both fouled out, and will work out at center.

While McCall expects Vermont to be tougher than any of the state clubs, he is not brushing off Bowdoin. The Polar Bears and the other clubs in the state are all evenly matched on paper.

Bowdoin handed the Bears their first home loss in two years last winter, 69-62. All-State guard Billy Cohen is high scorer for the Polar Bears and is always dangerous.

Orange Victors In Close Game

Phi Mu Delta won its second straight last week in a thrilling overtime victory over TKE, 40-38. Two days later, undefeated Kappa Sigma crushed the same Teke team, 45-19.

Phi Kap dumped TEP, 40-16, for its second straight as Sigma Chi easily defeated Sigma Nu, 52-24. Bill Bourbon again connected for 20 points as Phi Gam downed Beta, 52-40. Lambda Chi broke into the win column

with a 49-25 victory over Alpha Gam.

In other fraternity action, Phi Eta beat ATO, 53-37; SAE downed Theta Chi, 45-38; and Delta Tau whipped Sig Ep, 52-25.

In dorm action, Gannett 3 whipped

(Continued on Page Eleven)

CAN ANYONE FILL THEIR SHOES?

BEAR FACTS

BIG SHOES

The opening week of basketball has shown one thing Maine fans knew all along; the fabulous four will be hard to replace. Ball players like Larry Schiner, Don Sturgeon, Wayne Champeon and Jon Ingalls do not come along every year.

However, at the same time, the 1961-62 Black Bear basketball edition has shown signs that it should be able to win ball games.

Maine's main difficulty in the Tufts and Colby contests was in rebounding. The Bears weren't able to come up with the key boards. Not only did this give both the Jumbos and Mules a better chance of scoring, but also, without the ball, the Bears were not able to pile up points.

REPLACE SCHINER

At his pre-season press conference, McCall said that he has yet to find the man to replace Larry Schiner. Of the fabulous four, Schiner and Sturgeon will be the hardest to forget. Not only did both pour points through the hoop, but they both came down with the key rebounds.

Ted Leadbetter, Art Warren and Don Harnum all looked like they may score well in the future, but none were able to rebound too effectively. Of course, the key to many rebounds by Schiner and Sturgeon was position, and that comes with experience.

John McGonagle may end up being the man for the job. The big sophomore climbs on the backboard. With careful handling and game experience, McGonagle may be the big board man by second semester.

Chappelle, as usual, showed why he is a Little All-American. Anytime Skip has his hands on the ball he is a threat for two points, and the opposition knows it. As long as Chappelle keeps shooting the ball up, Maine can win ball games.

TV TIME

TELEVISION STATION WLWZ (Channel 2) will televise five Maine home games this winter. On the agenda are the Maine-Bates game January 10, Rhode Island February 17, Connecticut February 20, and Colby February 22 in addition to the Colby opener last Monday. . . The fall awards banquet will be held Wednesday, December 13, in the Commons at 6:45, according to TED CURTIS. . . BUMP HADLEY, Maine's outstanding football guard, was named to the BANGOR DAILY NEWS All-Maine team in addition to end Dick Kinney, tackle Ed Reidman, quarterback Manch Wheeler, and fullback Dale Curry, all of whom had made the PORTLAND TELEGRAM selections. . . UConn will feature 6-10 soph ED SLOMCENSKI at center this year and last year's center, BOB HAINES (6-7) at forward. In addition, 6-6 letterman WALT GRIFFIN has returned to school.

WELL RECEIVED

Once again, on Monday night, Colby's Lee Williams was well received by the Maine crowd. Williams has always been a welcome figure at Orono Colby, as in the past, built up a lead and then sat on the basketball. However, they almost blew that lead at the end by attempting the stall too early. The Mules' ball handling was not smooth enough to put on a highly effective freeze. However, the final score did indicate that Williams' tactic can win games.

BASEBALL?

Baseball coach JACK BUTTERFIELD has asked that all freshmen interested in playing baseball sign up with him. . . FRED LEWIS, who got bogged down in the mud up here, finished the season with 52 yards rushing for UMass. Teammate SAM LUSSIER led the club however with 609 yards. Quarterback JOHN MCCORMICK completed 5 of 107 passes for 562 yards and 7 TD's. MANCH WHEELER completed 43 of 96 for 715 yards and 8 TD's for Maine.
