Orono, Maine, February 11, 1960

Number 17

Don Sturgeon's Big Play

Don Sturgeon (41) in a last minute effort tallies the two points that brought Maine within one point of victory. He was fouled on the play and his two shots from the free throw line enabled Maine to edge Connecticut 75 to 74. The game reflected a great team effort by which the Bears were able to defeat the Huskies for the first time in 15 years.

Dr. Billias Publishes Story About General John Glover

By Mary Irving

General John Glover, a relatively unknown Revolutionary War figure, is the subject of a book by Dr. George Billias, Associate Professor of History at the University. *General George Glover and His Marblehead Mariners* concerns one of Washington's most reliable generals who ferried him across the Delaware on December 25, 1776.

Included in the book are a number of historical inaccuracies in Emanuel Leutze's painting of Washington crossing the Delaware.

"The biggest boner of all is that the flag shown in the picture was not officially adopted by Congress until 6 months after the crossing," Billias said. He further claims that Washington had too much sense to stand with one foot on the gunwale while crossing an icy river on a dark night.

"Actually the painter used the wrong kind of boat," Billias added; "The Durham boats were used at that time rather than a ship's longboat which Leutze used. Secondly there were too many men in the boat—that type of boat would swamp with such a large crew."

He further says that the uniforms were incorrect. All these blunders are noted in Billias' book along with much historical background to the crossing.

The book is not Billias' first publication as he has written widely for both scholarly and popular magazines. He has written more than a dozen articles

for various journals, and did a monograph for the University of Maine Study Series last April entitled *The Massachusetts Land Bankers of 1740*. His article *Soldier in a Longboat*, also about John Glover, will appear in this month's *American Heritage*.

After six years at the University of Maine, he says of the students here: "I really enjoy the University of Maine student; I think he is better than he thinks he is!"

Billias graduated Magna Cum Laude from Bates in 1948 and for the next three years studied for his M.A. and Ph.D. at Columbia. He worked for a time as military historian for the U. S. Air Force.

During World War II, Billias fought in the Battle of the Bulge and holds a Bronze Star for gallantry in evacuating the wounded from the Remagen Bridgehead.

General John Glover and his Marblehead Mariners is scheduled for publication on March 7 by Henry Holt and Company. The book will be on sale in the University Bookstore.

Novelty Mall Events Scheduled During Winter Carnival Weekend

Something new will be added during Winter Carnival weekend this year when the Mall will become the scene of novelty events on Saturday morning.

Snowshoe relay races, a snowball accuracy throw, a toboggan pull and a president's tug-of-war (which will include President Elliott and the presidents of organizations) are some of the events which will be taking place from 10 a.m. to noon. Along with faculty members and their children, students, and members of the administration, Steve Gould has promised to participate and will act as the judge of the Tug-of-War.

Betty Colley, chairman of the Winter Carnival Committee, said "Events such as these have been found to play an important part in Winter Carnival weekends at other colleges."

Intramural and intercollegiate ski events will take place on the slope across the river and at Bald Mountain. The intramural men's and women's ski events will take place Friday afternoon across the river. Schedule for the events will be: 1:30 to 1:45,

women's downhill; 1:45 to 2:30, men's downhill; 2:30 to 2:45, women's slalom; 2:45 to 3:15, men's slalom; and 3:15, jumping.

Bus service will be provided to the slope starting at 1 p.m. in front of the Union and approximately every 20 minutes thereafter.

Intercollegiate Skiing

The intercollegiate ski meet which will include teams from Yale, Colby, Bowdoin, University of New Brunswick and Maine, will start Friday afternoon with jumping events at 3:15. Saturday morning the cross country meet will be held and in the afternoon, the Giant Slalom will take place at Bald Mountain from 1 to 3 p.m.

For those who do not wish to walk around to see the snow sculptures on Saturday morning, hay rides will leave from the Union and tour the campus starting at 9.

To round out the weekend, Al Corey will play at the Intramural

Ball on Friday night from 9 p.m. to 1 a.m. Winter Carnival king and queen will be crowned at this time. Students running for Winter Carnival royalty are Valerie Beck, Carol Ivy, Nancy Kennedy and Pat Smith; Bill Lawlor, Manch Wheeler, Don Harnum and Don Streeter.

Saturday afternoon Dizzy Gillespie will hold forth for two hours in the Memorial Gymnasium. The famed jazz artist will present a lively concert starting at 1:30. An indoor track meet will follow at 3:30.

The Maine-Rhode Island game will be played at 8:15 in the gymnasium and will be followed by houseparties and a ski tog dance. The Sunday afternoon variety show in the Men's Commons will feature Bowdoin's Meddiebempsters and skits by fraternities.

New York City Clergyman Will Address Group

The annual Brotherhood Banquet will be held on February 17 at Stodder Hall. The principal speaker will be the Reverend C. Kilmer Myers.

Reverend Myers is Vicar of the Lower East Side Mission of Trinity Parish, New York City. He has been a fellow at Berkeley Divinity School, Rector of St. Marks Church, Buffalo, and a Chaplain in the Navy.

The Lower East Side Mission of Trinity Parish is the intensive effort of Historical Trinity Church to meet the needs of a people living in a multi-racial and crowded area of the city. The principal work of the Mission is among the young. Hundreds of young people move in and out of the two chapels of the church every week;

Father C. Kilmer Myers

among them are members of so-called street gangs. The job of mediating the differences between these conflict groups have often occupied the energies of the mission staff. Father Myers works very closely with other

Senior Class To Meet

The Senior Class will meet for the second time of the year on Thursday, February 18, in the Bangor Room of the Memorial Union, at 7 p.m. All members of the Senior Class are urged to attend.

Student Tells Experiences During Cuban Revolution

By Glenn Philippon

"I went to the University of Havana for twelve days but our freshman reception was gunfire."

Juan Nicholas, University sophomore from Central Manati, Oriente, Cuba, spent the next few months in virtual hiding because Batista's forces were still shooting students on sight. This did not endear him to the Batista cause.

As did most students in Cuba, Juan took a great interest in politics and generally supported Fidel Castro. Juan said at a Politics and International Relations Club meeting this fall that he felt "if the United States had criticized Batista half as much in the twenty years that he (Batista) was in power as they have Castro in two years, Cuba would be better off."

List Promotions For Ten Faculty

The promotion of two associate professors to the rank of professor and eight assistant professors to the rank of associate professor has been announced by President Lloyd Elliott.

Effective September 1, Dr. Carl M. Flynn will be professor of zoology and Dr. Herbert J. Edwards, professor of English.

In the College of Agriculture, Clinton R. Blackmon has been named associate professor of agronomy, Paul R. Hepler, associate professor of horticulture, Frnaklin E. Manzer, associate professor of plant pathology, and Samuel E. Sides, associate professor of agricultural engineering. These promotions are effective July 1.

Named associate professors in the College of Arts and Sciences, effective September 1, are Tadeusz Siedlik in business and economics, Robert B. Thomson in government, and Shih-Cheng Yu in business and economics.

In the college of Technology Jerry Braunstein will be associate professor of chemistry, effective September 1.

Juan pointed out that the Communist threat discussed now was as great in Batista's regime, but he added that in his opinion it is doubtful that Communism will gain too great a stronghold on the Latin American countries. "It is entirely against the grain of Latin American living which is notorious for its close family unity. Communism tries to break this unity and does not allow for individuality."

When asked what he thought of the alleged bombings by planes from Florida bases, Juan reserved comment. "I wasn't there. I really couldn't say." He did say, though, that Batista's aviation forces had done considerable damage during the insurrection. "Thirteen people were killed from my home."

Juan feels that the present U. S. stand on Cuba is winning friends in Cuba and has stopped some of Castro's anti-American speeches. "We are used to being threatened with Marines so this was a pleasant surprise."

Juan has high hopes for the future of Cuba. "I have great faith in this generation—probably because I am part of it—but I think that we will be able to help Cuba. People think that the student faction in Cuba is radical and maybe we are. It is not unusual for me in Cuba to get up in a bull session and say 'Let's do something. Let's get going!' Maybe I would be more conservative if I were in politics."

Juan illustrated his opinion of politicians when he said, "Maybe with a little money I wouldn't care what happened to the peasants anymore, either. Now, I think something should be done to help them."

Bull sessions in Cuba revolve primarily around politics. Extracurricular activities are also of a

Wright To Speak To Foresters

FORESTRY CLUB

Bruce Wright, Director of New England Wildlife Research, will be the guest speaker at a business meeting of the Forestry Club, February 17 at 7:30 p.m. in the Bangor Room.

Wright is a graduate of the University of New Brunswick, and received his master's degree from the University of Wisconsin. He will speak on "Predatory Mammals of the Cat Family."

Richard Goodenough was elected president of the Forestry Club at a meeting held February 3. Other officers

elected were: Alvah Latourette, Vice President; Oliver Becker, Secretary; and William Willard, Treasurer.

The women of Balentine Hall challenge the hardier members of the University of Maine faculty to a hockey game on Saturday morning of Winter Carnival Week-end.

Any of said members daring enough to even attempt to accept this challenge are sadistically invited to do so.

Display Color Graphics By Johnny Friedlaender

On exhibition this month are color graphics by Johnny Friedlaender and Irene Zevon. In the Oakes Room in the Library is an exhibition of 45 original etchings by Johnny Friedlaender. In the Print Room of Carnegie Hall a collection of 29 woodcuts by Irene Zevon are on display.

Friedlaender was accused of dena-

turing art and his punishment was to draw portraits of the Nazi leaders from photographs. When Hitler came to power, Friedlaender was arrested and placed in a concentration camp. He was released on probation late in 1933 and in 1935 fled from Dresden. He moved from country to country, occasionally exhibiting his work, on his way to Paris, where he arrived in 1937.

With the outbreak of the war, he was interned as a German political refugee, barely escaped deportation to Germany in 1941, and finally became a member of the Resistance. In 1945 he returned to Paris and devoted himself to making etchings, which were exhibited at the Librairie Galerie La Hune only three years later. From then on his prints have been exhibited in many countries. He opened his studio to students, and his reputation as one of the most distinctive and skilled etchers of our time is now international. Certain subjects repeat themselves in his work: female nudes, birds, cats, fish and landscape. There is an underlying intense, poetic mood, but also, occasionally, humor.

Irene Zevon, a native of New York City, studied at the Tschachbasov Art School, and has exhibited her work widely throughout the United States. Her most recent one-man exhibit, last year, was at the Lynn Kottler Galleries in New York.

In 1959 at the Annual Exhibition of the National Association of Women Artists, one of her color woodcuts received one of the association's awards while another was elected for a group show which has been circulated throughout the United States. Her work is also in the permanent collections of the Butler Art Institute, California State Library, Dallas Museum of Fine Arts, Library of Congress, University of Georgia Museum of Art, St. Louis Museum of Art and a large color woodcut, "Whispering Leaves," is in the University of Maine's permanent art collection.

In the production of her woodcuts, Miss Zevon employs a multiblock technique, wherein wood blocks of varying textures and characters are combined with a wide variety of fine papers and inks to produce prints which, though somewhat abstract, are almost always representational in content. She interplays clear and pure colors with black, controlled by a varied strong sense of design and pattern.

Lutheran Service Planned For MCA

M.C.A. will hold a Valentine Party on Friday evening beginning with supper at 6:00 o'clock at the M.C.A. House. Cost is \$3.00 and all students are welcome.

The Rev. William Scar, Director of Lutheran College and University Work in New England, will be guest preacher at both services of worship on Sunday morning. Services are held at 9:30 and 11:00 a.m. in the Little Theatre. The 9:30 o'clock service will be conducted according to the Lutheran Order of Worship.

A Quaker Meeting will be held at the M.C.A. House at 3:30 p.m. on Sunday. Any interested students and faculty members are invited to attend.

Pastor Scar will meet with Lutheran students in the Bumps Room of the Union at 4:00 p.m. on Sunday and will conduct a Lutheran Communion Service and discuss the question, "Are Lutherans Different from other Protestants?"

The Sunday evening Fellowship Hour is held weekly at M.C.A. House at 7:00 o'clock. This week Pastor Scar will discuss the meaning of the Lord's Prayer. M.C.A. Choir Rehearsal will be held from 7 to 8 p.m. in the Union on Tuesday. The Christian Science Group will meet in the Union on Tuesday from 7:30 to 8:30 p.m.

engineers

and what they do at Pratt & Whitney Aircraft...

The field has never been broader
 The challenge has never been greater

Engineers at Pratt & Whitney Aircraft today are concerned with the development of all forms of flight propulsion systems—air breathing, rocket, nuclear and other advanced types for propulsion in space. Many of these systems are so entirely new in concept that their design and development, and allied research programs, require technical personnel not previously associated with the development of aircraft engines. Where the company was once primarily interested in graduates with degrees in mechanical and aeronautical engineering, it now also requires men with degrees in electrical, chemical, and nuclear engineering, and in physics, chemistry, and metallurgy.

Included in a wide range of engineering activities open to technically trained graduates at all levels are these four basic fields:

ANALYTICAL ENGINEERING Men engaged in this activity are concerned with fundamental investigations in the fields of science or engineering related to the conception of new products. They carry out detailed analyses of advanced flight and space systems and interpret results in terms of practical design applications. They provide basic information which is essential in determining the types of systems that have development potential.

DESIGN ENGINEERING The prime requisite here is an active interest in the application of aerodynamics, thermodynamics, stress analysis, and principles of machine design to the creation of new flight propulsion systems. Men engaged in this activity at P&WA establish the specific performance and structural requirements of the new product and design it as a complete working mechanism.

EXPERIMENTAL ENGINEERING Here men supervise and coordinate fabrication, assembly and laboratory testing of experimental apparatus, system components, and development engines. They devise test rigs and laboratory setups, specify instrumentation and direct execution of the actual test programs. Responsibility in this phase of the development program also includes analysis of test data, reporting of results and recommendations for future effort.

MATERIALS ENGINEERING Men active in this field at P&WA investigate metals, alloys and other materials under various environmental conditions to determine their usefulness as applied to advanced flight propulsion systems. They devise material testing methods and design special test equipment. They are also responsible for the determination of new fabrication techniques and causes of failures or manufacturing difficulties.

Exhaustive testing of full-scale rocket engine thrust chambers is carried on at the Florida Research and Development Center.

Frequent informal discussions among analytical engineers assure continuous exchange of ideas on related research projects.

New F Put Into

A new improvement was put in effect February 1. Since it depends almost entirely on its fire protection, it has been included in the signals which have been included in the town.

Fitting into the campus is divided into each section has a number. Each has been assigned to its location. The "forty series" have been assigned. Should a fire break out, the signal sound the exact location in the zone.

Cards listing the buildings and other structures will be listed in numbers. Later in the campus, show zones. Director Francis S. the hope that, it will be outside a zone.

The zone number benefit of fire administrators in reporting a fire.

Agriculture At Hall's

Two prominent will deliver tall ceremony for University of Maine February 13, at 2 p.m.

Commissioner L. Newdick will deliver the State of Maine Corbett, a representative livestock industry "Science and the

Hitchner Hall research, and the departments of bacteriology, biology, science, and the department.

One of the features of the ceremony will be a lecture by Professor E. Reeve Elliott. Hitchner Hall, June, served on the faculty for 37 years, years head of the department of bacteriology and biology, also in charge of the Service of the building. The building is an appropriation of the Legislature. The University call for final wing to the total structure.

Talbot, Cille Elected Club

The Public Meeting and elected its year. Those elected Paul Talbot, president; secretary-treasurer.

Out-going president was lauded for ship of the club.

Contrary to membership in the club, people interested in understanding of local club features such as lecturers, movies, freshments of year meeting.

New Fire Signal System Put Into Effect On Campus

A new improved fire signal system was put in effect on campus Monday, February 1. Since the University depends almost entirely on Orono for its fire protection, the campus has been included in the modern system of signals which has been installed in the town.

Fitting into the Orono system, the campus is divided in nine sections, each section having its own alarm number. Each building on campus has been assigned a number according to its location. Within the system, the "forty series" and the "fifty series" have been ascribed to the University. Should a fire break out on the campus, the signal sounded would give the exact location immediately.

Cards listing the information will be posted as soon as possible. All buildings and other combustible structures will be listed with their assigned numbers. Later there will be maps of the campus, showing the division into zones. Director of Plant and Facilities, Francis S. McGuire, expressed the hope that, in future years, there will be outside alarm boxes on campus.

The zone numbers are for the benefit of firemen, police, and the administrators involved. A student reporting a fire should never attempt

to give the zone number, he should give only the name of the building. The numbers to call in the event of a fire are the same: Orono 6-3600, or the University exchange, 6-4441.

Bridge Tournament Held

Elimination for the National Inter-collegiate Bridge Tournament will be held tonight, Thursday, at 7 p.m. in the Women's Lounge.

From this playoff, sixteen top bridge players will represent the University in the National Tournament to be played before February 28. This will be regular bridge night with anyone playing for master points, but only undergraduates can be eligible for the National Tournament.

Any students who would like to enter the National competition must play in the elimination, and are urged by the Union Bridge Club to be present tonight.

Photos Shown In Memorial Union

An exhibit of prize-winning pictures from Popular Photography magazine is on display in the lobby of the Memorial Union.

Arranged by the department of art, the exhibit will be on display until Feb. 20. The exhibit features approximately 100 photographic prints, both color and black and white, representing examples of contemporary camera art from throughout the world.

All prints were selected from prize-winning photographs entered in Popular Photography's annual \$25,000 International Picture Contest.

The deadline for proctor applications is March 18. Interested upperclassmen are requested to submit applications to Barry Millett, 207 Library, as soon as possible, because interviews will begin within a week. Freshmen interested in proctorships should inform their proctors.

Agriculturists Speak At Hall's Dedication

Two prominent Maine agriculturists will deliver talks at the dedication ceremony for Hitchner Hall at the University of Maine on Saturday, February 13, at 2 p.m.

Commissioner of Agriculture Erlon L. Newdick will bring greetings from the State of Maine, while Donald P. Corbett, a representative of the Maine livestock industries, will speak on "Science and the Animal Industries."

Hitchner Hall provides teaching, research, and extension facilities for the departments of animal pathology, bacteriology, biochemistry and poultry science, and supplementary facilities for the department of animal science.

One of the features of the dedication ceremony will be a tribute to Professor E. Reeve Hitchner by President Elliott. Hitchner, who retired last June, served on the University's faculty for 37 years. He was for many years head of the department of bacteriology and biochemistry. He was also in charge of the Pullorum Testing Service of the University.

The building was made possible by an appropriation of Maine's 98th Legislature. Long range plans by the University call for construction of a final wing to complete a U-shaped total structure.

Talbot, Cilley, French Elected Club Officers

The Public Management Club met and elected its officers for the next year. Those elected to office were Paul Talbot, president; Larry Cilley, vice president; and Forrest French, secretary-treasurer.

Out-going president Roger Brown was lauded for his energetic leadership of the club.

Contrary to common belief, membership in the club is open to all people interested in securing a better understanding of local government. The club features such things as guest lecturers, movies, field trips, and refreshments of your choosing at each meeting.

Sophomore and Junior women interested in the positions of Upperclass Residents in the Freshman dormitories next year should get application blanks from the Dean of Women's office within the next week.

LUCKY STRIKE presents Dear Dr. Frood:

FROOD TELLS HOW TO CLEAN UP ON YOUR LAUNDRY

(see below)

Dear Dr. Frood: I told my girl I was in love, and she laughed. I told her I wanted to get married, and she laughed. How can I make her realize that I'm serious?
Serious

Dear Serious: Marry someone.

Dear Dr. Frood: I have been having trouble sleeping at night. Do you think it could be because I drink coffee?
Wide-Eyed

Dear Wide-Eyed: Possibly. It's very difficult to sleep while drinking coffee.

Dear Dr. Frood: A lot of the guys complain because their mothers don't pack their laundry boxes properly. Is there a certain way they should be packed?
Spokesman

Dear Spokesman: Indeed there is. Clip out the instructions below and mail them to your mother.

© A. T. Co.

Dear Dr. Frood: Do you believe in the old adage, "Choose a girl by ear rather than by eye"?
Shopping

Dear Shopping: This maxim is indeed a fine guide for any young man who is looking for a girl. But while choosing by "ear rather than by eye," he should also make sure she has two of each.

Dear Dr. Frood: Every night I come home tired and I find the house in a mess. There are dirty dishes and pans in the sink, and clothes are thrown all around. I'm fed up. What should I do?
Married Student

Dear Married Student: You should notify the police. Someone has obviously been there.

Dr. Frood, Ph.T.T.

Dear Dr. Frood: How far ahead should I call for a date?
Straight Arrow

Dear Straight Arrow: It depends. Some girls must be called at least a week in advance. With others, you just holler as you enter the dorm.

Dear Dr. Frood: My husband is an absent-minded college professor. He went out 7 years ago to buy a pack of Luckies and hasn't returned yet. I don't know what to do.
Patience

Dear Patience: Better buy another pack. He's probably smoked them all by now.

COLLEGE STUDENTS SMOKE MORE LUCKIES THAN ANY OTHER REGULAR!

When it comes to choosing their regular smoke, college students head right for fine tobacco. Result: Lucky Strike tops every other regular sold. Lucky's taste beats all the rest because L.S./M.F.T.—Lucky Strike means fine tobacco.

To Exhibit Student Art In Union

The student art exhibit which will open on March 6, in the Union Lobby, will be on display for the remainder of the month. The exhibit will open from 2-4 p.m. with a tea in the Music Room, followed by an organ concert from 4-5 p.m.

In view of the success of last year's exhibit, the Union Committee urges any students to display their artistic works at this time. Last year many pieces were sold at the exhibit.

This year an effort is being made to have three dimensional as well as two dimensional works. A section for mobiles, stables, sculptures and mosaics has been set aside, as well as the lobby wall areas for paintings, sketches, prints or any other medium the artist may want to display.

The following rules will apply to all entrants:

- 1) All exhibition pieces must be in the Union on or before February 25.
- 2) Pieces will be submitted only in the Activities Room from 2-5 p.m., and should be given to Mrs. Dunton.
- 3) All articles should be framed and ready for display.
- 4) All articles should be entitled, signed and if for sale, the price should be marked on them.
- 5) As many pieces as desired may be submitted, but may be limited in use according to the space available.
- 6) All paintings will be left at the risk of the owner. The Union will not be responsible for them, although precautions will be taken to protect them.

Juan Nicholas Discusses Cuban, American Customs

(Continued from Page One)

political rather than a social nature. Dances and parties are sponsored by private clubs of which there are many, "some I would not dare enter." Membership in many of the clubs is decided on the basis of high moral character, especially for the women. Men are the only ones to pay dues and girls are allowed only if they meet with the approval of the membership committee and with parental consent.

High moral character (the definition of which differs greatly from that held in the States) is a very important factor in a girl's life in Cuba. Dating, as we know it, is not practiced. Girls are chaperoned at all social functions. They do not date casually but rather very steadily. If a couple breaks up, it is as much as six months before a girl may graciously begin dating another boy.

"We figure that if a girl loves a boy that it will take her a while to get over him. If such a girl should start dating too soon after a break-up then she is considered of dubious character and boys refrain from dating her. If a boy should want to date her they are apt to be laughed at for taking left-overs. A girl who dates many boys may be called community-property!"

Terms such as "left-overs" and "community property" have a very different connotation from that held here at the University of Maine. One example of the rigid moral standards

which might illustrate the difference is the matter of male membership in the above mentioned social clubs. Any man seen "drunk, or eyeing the girls on the street is dropped from membership and shunned by the club members."

Rather than think that American girls are of questionable character because of their dating practices, Juan very calmly accepts the situation as a different custom. He noted that American children are allowed much more freedom than are Cubans.

"In Cuba, the father is the undisputed master of the house and his word is law and he is the first to obey it. As long as a person lives at home he is subject to the rules of the house regardless of his age."

Juan added that although women are very protected before marriage, they lose even more liberty after marriage and bow to the wishes of the master of the house. Where women are very highly respected, they still bear the burden of domestic life alone. "My father helped my mother but he is the exception rather than the rule." Juan is from a family of four boys and two girls all of whom are either through college or presently in school. His father and a brother are foundry technicians. "I was supposed to be the engineer but it's too tough for me!"

The standard question of "How do you like it here?" was answered with a smile and "although I don't care for the weather, I think the girls are very nice."

Society:

Fraternity Parties, U-Conn Collision Liven The Campus

By Diane Wiseman

Just about all the fraternities had a busy weekend with dances, jam sessions, splash parties, and other entertainment. With all this activity and the added excitement of last Saturday night's game against Connecticut, the campus was really alive.

It was Harold's Club at Phi Kappa, is being sponsored by Pi Beta Phi Sig Follies at Sigma Chi, and Klondike Nite at Sig Ep—all on Friday evening. There were also parties and dancing at Delta Tau, Phi Mu Delta, Sigma Nu, and Phi Eta. TEP had a Toga Party Friday night, while music for dancing was provided by the Javelins at TKE and Dick Jones' Band at Theta Chi. Alpha Gamma and Phi Eta both had Splash Parties at the Bangor Y Friday afternoon. Friday evening the Maine Bears played at Lambda Chi and Sammy Saliba at Phi Gam.

Many of the houses had jam sessions Sunday afternoon. The Colby Eight gave a great performance at the Phi Mu Delta house Sunday afternoon. Wednesday evening a general assembly was held in the Main Lounge of the Memorial Union. John Scott, foreign correspondent, author, and lecturer, spoke on the subject, The Soviet Empire. This Friday and Saturday Valentine Kisses will be sold downstairs in the Union—candy, of course! The sale

Engaged: Priscilla Hatt, Maine Medical Center, to Jerry Brooks, Theta Chi; Gail Grenke, Bristol, Conn., to Ted Davies, Alpha Tau Omega; Linda Bonden, Auburn, to Al Elwell, Theta Chi; Judy Maden to Bill Pickard, Lambda Chi Alpha.

'59: Lorna Payne, Scarborough, to Tom Tuttle, Theta Chi; Ann Haley, Old Town, to Ed LePage, Theta Chi. Married: Joan Robbins to Steve Bush, Tau Kappa Epsilon; Ada Coburn, Lincoln, to Larry Lowd, Theta Chi.

Do You Think for Yourself?

(DIAL IN THESE QUESTIONS AND SEE IF YOU'RE IN FOCUS*)

If you saw a full-rigged sailing ship in the middle of the desert, would you say (A) "Long time no sea!" (B) "Wish they'd invent talking mirages," or (C) "Anything can happen in Las Vegas!"

A ☐ B ☐ C ☐

When a man says, "Brevity is the soul of wit," he means (A) he's about to make a long speech; (B) wise thoughts come in short sentences; (C) "Shut up!"

A ☐ B ☐ C ☐

You're caught in a pouring rain—and you're offered a lift by a pal whose driving is dangerously erratic. Would you (A) tell him you enjoy walking in the rain? (B) say, "Sure—but let me drive"? (C) accept rather than hurt his feelings?

A ☐ B ☐ C ☐

In choosing a filter cigarette, would you pick one that (A) says the filter doesn't count, only the tobacco; (B) is designed to do the best filtering job for the best taste; (C) gives you an enormous filter but very little taste.

A ☐ B ☐ C ☐

When you think for yourself . . . you depend on judgment, not chance, in your choice of cigarettes. That is why men and women who think for themselves usually

smoke Viceroy. They know only Viceroy has a thinking man's filter—the most advanced filter design of them all. And only Viceroy has a smoking man's taste . . . the full rich taste of choice tobacco.

*If you have checked (C) in three out of four questions, you're pretty sharp . . . but if you picked (B), you think for yourself!

The Man Who Thinks for Himself Knows—
ONLY VICEROY HAS A THINKING MAN'S FILTER...A SMOKING MAN'S TASTE!

Woolley Named Executive Director Of General Alumni Association

By Ellen LeBlanc

Dr. T. Russell Woolley, Jr., the new Executive Director of the General Alumni Association, began his duties February 4.

"I am very pleased to return to my alma mater. I taught here from 1946 to 1954 and it seems good to be back", Dr. Woolley said. "All my efforts are now devoted to the unique and remarkable Alumni Association and to the students, all of whom are linked for the remainder of their lives to the University through the General Alumni Association. I hope, in being able to represent the students and the alumni, to serve in any way to promote the welfare of the University", he added. Dr. Woolley finished by saying, "It gives me a great pleasure to say 'Hello' to the University community."

Dr. Woolley is a graduate of the University in the class of 1941. He received his M.A. in 1950 and his Ph.D. in 1957 from Northwestern University. His career in college teaching began in 1946 when he taught speech at the University of Maine. Dr. Woolley served as acting head of the Speech Department from 1949-1950. In the early '50's Woolley was faculty producer of the "Maine Day" programs. He also served as clerk of the U. of M. General Alumni Association in 1953-1954. Before his present position, Dr. Woolley taught speech at the University of Texas.

Dr. Woolley, better known to everyone as "Russ", was very active as an undergraduate at the University. He held keys in Maine Masque and Debating. He was a broadcaster for WORO, played J.V. football, and served as vice-president of his class during the senior year.

A native of Bridgton, Me., Dr. Woolley is married and the father

of four children. He has two teen-age daughters, Pam and Linda, and two young sons, Rusty, nine, and Chris, four. His family came to Orono on February 1.

On Monday, February 15, at 7:30 p.m., Woolley will speak at the Penobscot Valley Alumni Association meeting in the Memorial Union Building. All alumni on campus and in the vicinity are invited. At 8:15 p.m., that evening, there will be an Open House for

"On The Waterfront" Is Featured Movie At The Union

The Union movie this weekend will be "On the Waterfront", a hard hitting drama of crime and corruption on New York's waterfront, and a winner of eight Academy Awards. The movie stars Eva Marie Saint and Marlon Brando.

On Sunday, February 14, the Humanities Lecture will be given

Dr. and Mrs. Woolley in the Union, sponsored by the General Alumni Association and local alumni groups. Alumni, faculty, and friends are invited.

by Dr. Robert Sherck at 4 p.m. in the Bangor Room. Sherck, Associate Professor of Classics, will speak on Menander and Greek New Comedy. Menander, who greatly influenced later Greek comedy, but was known only vaguely to us, is now revealed through the recent discovery of an Egyptian papyrus bearing the complete text of one of his plays Dyskolos (The Miser). Sherck will show pictures of the papyrus, explain the nature of Greek New Comedy, and discuss Menander's place in the development of high comedy.

The Poetry Hour on Tuesday, February 16, will be Religious Verse by Amos Wilder and others. Dr. Charles Virtue will be the reader at 4 p.m. in the Women's Lounge. Coffee will be served.

A special film, "The Guest", will be shown at 4 p.m. on Wednesday in the Bangor Room. A modest shoemaker has a vision that God will visit him. In his attempt to show kindness to those around him, he realizes that God is with him every day and in every endeavor.

Nuclear power
at the **Atomics International Division**
(Canoga Park, California)

Atomics International, located in the San Fernando Valley of Southern California, is a leader in the development and manufacture of nuclear reactors for power, research, and mobile systems. Two proven AI power reactor concepts are now under construction. Atomics International is building a Sodium

Graphite Reactor for the Consumers Public Power District of Nebraska and an Organic Power Reactor at Piqua, Ohio. AI also is engaged in extensive research activities to develop improved materials for fuel elements and reactor components.

Autonetics & electro-mechanics at the Autonetics Division
(Downey, California)

Autonetics, a leader in the field of electronics, is engaged in research, development, and manufacture of Computers, Inertial Guidance, Armament Control and Flight Control Systems. Autonetics designed and built the inertial navigation system for the USS Nautilus and Skate; the first, completely auto-

matic landing system for supersonic missiles and aircraft; the first, general purpose, all-transistor, digital computer. It is now at work on the inertial navigation system for the first nuclear-powered Polaris-carrying submarines and the guidance and control systems for the Minuteman and GAM-77 missiles.

Naval aircraft & missiles at the Columbus Division
(Columbus, Ohio)

The Columbus Division, designed and built the Navy's T2J Buckeye, America's most versatile jet trainer which will train today's jet cadets to command tomorrow's manned weapons systems, and the Navy's supersonic, all-weather A3J Vigilante, today's most versatile manned weapons system. Advanced

design studies now underway at the Columbus Division include undersea, land, and air weapons systems for all Military Services. Current studies include ASW, missiles, ECM, intercept aircraft, electronics systems, VTOL-STOL, ground support equipment, and other still confidential programs.

Design & development of manned weapon systems at the Los Angeles Division
(Los Angeles, California)

The Los Angeles Division is the home of the next-generation manned weapon system—the Mach 3 B-70 Valkyrie multi-purpose bomber—and America's first manned space vehicle, the X-15. Engineers in this division are engaged in research, development, and

production of complete manned weapon systems. Work encompasses the fields of Electronics, Metallurgy, Structures, Aerodynamics, Thermodynamics, Dynamics, Mathematics, Physics, Human Factors and Industrial Engineering.

Missile weapon system management & space research at the Missile Division
(Downey, California)

The Missile Division is the home of the GAM-77 "Hound Dog," an air-to-surface missile for the Air Force's B-52 bomber. The Missile Division has within its ranks some of the nation's most experienced engineers and scientists in the fields of missiles and weapon systems. They are performing research on

missiles and space exploration vehicles of a wide variety of range, speed and propulsion methods. Scientists at the Aero-Space Laboratories, an organization within the Missile Division, are conducting creative research well in advance of existing technology in the space sciences.

Propulsion systems and concepts at the Rocketdyne Division
(Canoga Park, California)
(McGregor, Texas)

Rocketdyne is engaged in ideas-to-hardware development of propulsion systems. High-thrust liquid propellant engines, built by Rocketdyne, have powered most of the missiles used for military and civilian space projects including Atlas, Jupiter, Thor, Redstone, Explorer, Discoverer, Pioneer, Juno, and others. Under development at present are two super performance liquid systems. While leading the nation in liquid propellant

systems, the division is under contract for high energy solid propellant motors and unique accessory equipment. Solid propellant operations are located at McGregor, Texas. Other propulsion system concepts are actively under development employing the principles of ion energy, nuclear energy, plasma jets, arc-thermodynamic and magnetohydrodynamic systems.

IS IT A WORD OR A WAY OF LIFE?

Courtesy Father McCarthy
Chicago Syndicate

Next week is Brotherhood Week. Now to some, that may not mean any more than if it was National Fried Egg Week or National Yo-Yo Week. But it should!

Despite all the talk of nuclear war, the biggest problem facing humanity is the need for a solution to the latent and active bigotry that besets men and nations. We have been living with it so long that we have decided to put up with these "prejudices" rather than do anything about them. It is easier to "co-exist" with prejudice than to attempt to conquer it.

If Brotherhood is to mean anything to us in America and throughout the world, it must be more than a word. It must come from the heart rather than the lips; it must be a topic of conversation for longer than a week, but a way of life forever.

The fact that bigotry and intolerance do exist is certainly a sad commentary on man and the social order, particularly in a Nation which prides itself on its high standards of "fair-play".

The idea of Brotherhood Week is not that we should make others start practicing Brotherhood, but that we ourselves should make a conscious effort to utilize its principles.

There are shortcomings to be faced and acknowledged when Brotherhood week rolls around. That doesn't make a mockery of the week, it underscores its meanings and objectives.

We spend billions of dollars every year for materials with which to wage defense. But even as we do there is a cancerous ill of hate and prejudice dividing us in some degree.

The theme for Brotherhood week is this: Brotherhood — Believe it, Live it, Support it! This is far from an easy task, but it is an essential one. We should at least try.

Scintilla Two

By Lee Morton

It was another one of those drizzly Saturday nights, and I found myself heading into the Paramount. SHE was dancing on the stage, and Jimbo was already there at the bar, harassing the bartender. Every time the bartender would pour a shot to mix a drink and turn his back to get the mixings, Jimbo would down the shot, quick and silent-like. The bartender was going bats. I grabbed Jimbo by the buckle-down four-button buckles and dragged him over to a table. I begged him to acknowledge my existence and accept a mixed drink. He acquiesced, gallantly. As soon as he got his fingers curled around the drink he started talking.

"Lee, you know, I've been thinking. (I didn't have time to insert my usual crack; it was not printable anyway.) When I was a kid I remember how I used to be completely selfless. I was not self-conscious, this is true, but it was more than that. I had no feeling of ME as a separate, unique chump from every other chump. There I stood," gesticulating at an empty table over in the corner, "with my own two muddy hands, not caring what people thought of me and my grubby marbleshooters. And then there's the bit about helping some old lady with her packages or returning lost money; even I used to do this occasionally — not for the glory — just a natural thing, which makes it great. Anything natural is great, you may quote me," he said as a fleeting immortal look came over him. "Most kids are like this — selfless, aren't they?"

"But then times changed. Now everything I do, say or think is saturated by me. ME. I'm firmly entrenched, along with most of the Joes today, in the Battle of the Egos. Like I was making this chick the other night and I was telling her about myself, you know, the me that is going to buy a Porsche next summer and go to Denver, the teachers and courses that me is taking, and my plans for the future, and my likes, and my dislikes and so on till it was her turn at bat. Then she steps in and it's me. ME all over again. Some of us are big enough to say we, but it's the same story, same hero. Do you realize how hard it is for two people to really get together any more?"

"It's the same in a group, which is the more common unit now; everybody tries to assert themselves and what they represent and nothing happens, except big masculinity scuffles. And the big boys who push and make it are figures for the Milquetoasts of America to follow. There's something rotten to the whole cycle, Lee. I still think the guy who's really got it, is the guy who doesn't sweat his own case, and makes it just the same."

Union News

On Wednesday, the Chess Club will meet in the Bumps Room. New members are being sought by the club in order to carry on the chess activities of the past.

Last week's Bridge Tournament winners were:

Student Political Activity Is Moribund

February 8, 1960

To the Editor:

It seems to us deplorable, that student political activity at Maine is apparently moribund, despite the fact that this is a presidential election year. The President and the Congress are presently feuding over the defense posture of the nation. Measures involving civil rights, education, housing, highways, labor relations and national health policy will be discussed passionately in the Congress and in the Press during the coming spring and summer. Foreign policy toward the Soviet Union is currently in a state of flux, and important new policy positions will probably be assumed as President Eisenhower travels to Paris, to Latin America, and to Tokyo. At the state level a serious political fight which will have a considerable effect on the development of two-party government in Maine is developing for the office of governor.

Notwithstanding the existence of these and other important political struggles, the students at Maine say and do little if anything that would indicate an interest in the politics of the state or nation. In *The Campus* we read of the Student Senate battling over bowling pins; and of Mary being pinned to Joe, and of professors traveling; and of athletes winning bitter contests; and of students going home — for one reason or another. Although such items are noteworthy, we would like to see more discussion on controversial political issues. And *The Campus* is not alone in its political languor. Partisan student organizations are notable only for their absence. Neither the young Democrats nor the young Republicans are effectively organized on campus.

We are writing in an attempt to stimulate student political activity. Such activity should be part of the educational life of every citizen in a democratic society. Young people have the energy, the drive, and perhaps the ideas to give new direction to a society which seems to find it more and more comfortable to relegate its political life to the reception of televised generalities expressing the truth and the good of the uncritically-reviewed past. We hope that young Republicans and young Democrats on campus will organize and work actively at the local, state, and national levels. We hope that important issues of both domestic and foreign policy will be discussed vigorously throughout this year. We hope that the students at Maine will begin to recognize that they are politically important and operate in a society that not only permits but requires their political interest.

Walter S. Schoenberger
Herbert H. Wood, Jr.

Placement Bureau Offers Taped Interview Samples

The Placement Bureau has available taped job interviews for any clubs, committees or groups who wish to listen to examples of good and bad interviewing. The interviews have been taped

with the permission of both student and employer, and have been edited, eliminating names. The interviews selected are of several different types and major job interests and illustrate not only interviewing techniques but the types of questions that students can expect to be asked.

According to Placement Director Philip Brockway, six of these recordings have been completed, and anyone wishing to hear them should contact the Placement Office in 104 East Annex.

This is probably the first time in the history of college place-

plus an opportunity to participate in the Regional Competition at the University of New Hampshire. Any student or campus group is invited to compete, and is asked to leave their name with Mrs. Owen Dunton, Program Advisor, in the Activities Room of the Union before March 10.

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

COMMITTEES: AN AGONIZING REAPPRAISAL

To those of you who stay out of your student government because you believe the committee system is just an excuse for inaction, let me cite an example to prove that a committee, properly led and directed, can be a great force for good.

Last week the Student Council met at the Duluth College of Veterinary Medicine and Belles-Lettres to discuss purchasing a new doormat for the students union. It was, I assure you, a desperate problem because Sherwin K. Sigafoos, janitor of the students union, threatened flatly to quit unless a new doormat was installed immediately. "I'm sick and tired of mopping that dirty old floor," said Mr. Sigafoos, sobbing convulsively. (Mr. Sigafoos, once a jolly outgoing sort, has been crying almost steadily since the recent death of his pet wart hog who had been his constant companion for 22 years. Actually, Mr. Sigafoos is much better off without the wart hog, who tusked him viciously at least once a day, but a companionship of 22 years is, I suppose, not lightly relinquished. The college tried to give Mr. Sigafoos a new wart hog—a frisky little fellow with floppy ears and a waggly tail—but Mr. Sigafoos only turned his back and cried the harder.)

Invictus Millstone was a man of action

But I digress. The Student Council met, discussed the doormat for eight or ten hours, and then referred it to a committee. There were some who scoffed then and said nothing would ever be heard of the doormat again, but they reckoned without Invictus Millstone.

Invictus Millstone, chairman of the doormat committee, was a man of action—lithe and lean and keen and, naturally, a smoker of Marlboro Cigarettes. Why do I say "naturally"? Because, dear friends, active men and active women don't have time to fuss and fumble and experiment with cigarettes. They need to be sure their cigarettes will never fail them—that the flavor will always be mild and mellow—that the filter will always filter—that the pack will always be soft or flip-top. In short, they need to be sure it's Marlboro—dependable, constant, tried and true Marlboro. Smoke one. You'll see.

Well sir, Invictus Millstone chaired his doormat committee with such vigor and dispatch that, when the Student Council met only one week later, he was able to rise and deliver the following recommendations:

1. That the college build new schools of botany, hydraulic engineering, tropical medicine, Indo-Germanic languages, and millinery.
2. That the college drop football, put a roof on the stadium, and turn it into a low-cost housing project for married students.
3. That the college raise faculty salaries by \$5000 per year across the board.
4. That the college secede from the United States.
5. That the question of a doormat for the students union be referred to a subcommittee.

So let us hear no more defeatist talk about the committee system. It can be made to work!

© 1960 Max Shulman

* * *

You don't need a committee to tell you how good Marlboro are. You just need yourself, a Marlboro, and a match... Or if you like mildness but you don't like filters, try Marlboro's sister cigarette—Philip Morris.

A Night Maine Will Long Remember

Skip Chappelle (33) displayed his usual excellent form Saturday night. (Above) Chappelle is pictured shooting his jumpshot. Guarding him are John Pipsynski (44) and a teammate.

Maury Dore provided Maine with considerable strength at the center slot. (Above) He is being guarded by Walt Griffin (40) of Uconn. Alternating with Jon Ingalls at center, Dore was a great part of the team effort.

Coach Brian McCall was a "most happy fella" in the Maine dressing room after Saturday night's thriller.

Photos by Crawshaw

Feature by Rick Brennan

Jon Ingalls jumps and tosses from short of the foul line. Behind are Pipsynski (44) and Larry Schiner (23). Ingalls played well and was of considerable help to the Bears under the boards.

Larry Schiner, the game's leading rebounder, takes one off the boards. Behind him is George Uhl (34), Uconn guard. Other players are Don Sturgeon (41), Jon Ingalls (24), and John Pipsynski (44).

The above number appears to be a parody on the minut as John Pipsynski (44) and Jon Ingalls (24) scramble for a loose ball. At the left is Larry Schiner.

Brotherhood Week Committee prepares posters to advertise events during Brotherhood Week which will be held this coming week. The group is sponsoring a talk by Father C. Kilmer Myers and will collect books and clothing for Japan and Algeria.

Sigma Chi Elects Jay Pease President

The new officers who will serve Sigma Chi for the coming year are: Jay Pease, President; David Espling, Vice President; William Meissner, Secretary; Jay Partridge, Treasurer; Jack Lynn, Social Chairman; Dean Stearns, Corresponding Secretary; Peter Tewhey, Sergeant-at-Arms; and Jim Cornish, Pledge Trainer.

Clothing Specialist Will Explain Seams And Darts On TV

"The Truly Fine Seam" presented by Jean Spearin, acting clothing specialist with the Agricultural Extension Service, will be featured on "The University and You" program this Sunday, over WABI.

Miss Spearin will explain the techniques the home sewer would use on pile fabrics and delicate sheers. She'll be working with velveteen and nylon chiffon. On the velveteen Miss Spearin will demonstrate seam stitching and pressing, while on the nylon she'll make a french seam and single thread dart. Miss Mable Lovejoy will assist Miss Spearin.

Dave Robinson's guests will be members of the Brotherhood Week committee. They will explain their campaign to collect books for Japan and also they'll say a few words about Rev. C. Kilmer Myers, the featured guest at the Brotherhood Banquet.

File For Student Teaching

All students electing student teaching (Ed M 90 or 91-full day) for the 1960-61 school year must file an application by February 10, 1960. Students electing Ed M 92, 93, 94, or 95-half day must file an additional application as soon as possible. Application blanks are available on request at the office of the Director of Teacher Training, Carl H. Porter-Shirley, 24 South Stevens.

Schedules for half-day students must be arranged so that three com-

plete periods, the same each day, are available for student teaching. This means free time each morning until 11 o'clock or the last period in the forenoon and two periods in the afternoon.

Courses Py 1 and 2, Py 65, Ed H1, and EdM 6 are prerequisites for secondary school teaching. Courses Py 1 and 2, Py 65, and Ed H1 are prerequisites for elementary school teaching. Most states require student teaching

A Campus-to-Career Case History

Mark Dollard (center) discusses an impending customer service problem with two of his supervisors.

There's a message for you in Mark Dollard's progress story

Mark C. Dollard earned his B.A. degree in English from Yale University in June, 1955. He joined the New York Telephone Company the following July 13th. Three and a half years later, he became a District Manager for the company in New York City—with a staff of 37 people reporting to him and responsibility for 49,000 customer accounts.

Mark's choice of a telephone career came after numerous job interviews in a variety of business fields. "What sold me," he says, "was the telephone company's reputation for solid managerial training, stability and growth. And I was impressed by the high caliber of people I met during my visit to the company."

And those are the things to which Mark credits his rapid advancement. His training during his first two years covered a wide range of activities...including the handling of customer contacts in the business office, selling communications

services to businessmen and supervising a business office.

"It was the company's vigorous growth that created the opportunity for me to become District Manager in January, 1959," Mark points out.

"What I like most about my present position is the variety of managerial responsibilities I have," he says. "It's interesting, stimulating work. I deal with sales and marketing programs, handle personnel problems and make a lot of public relations contacts."

* * *

The message for you? Stability, growth, systematic training and genuine advancement opportunities all add up to rewarding careers with the Bell Telephone Companies. Be sure to look into the opportunities for you. Talk with the Bell interviewer when he visits your campus—and read the Bell Telephone booklet on file in your Placement Office. You'll like what you learn.

BELL TELEPHONE COMPANIES

INTERVIEWS for:

**Sales and
Sales Management
Training Program**

**Home Office
Administrative Openings**

This Program is designed to develop young, inexperienced men for careers in life insurance sales and sales management. It provides an initial training period of 8½ months (including one month at a Home Office School) before the men move into full sales work.

Those trainees who are interested in and who are found qualified for management responsibility are assured of ample opportunity to move on to such work in either our field offices or in the Home Office after an initial period in sales.

A limited number of attractive opportunities are also available at the Home Office for Actuarial Trainees and Administrative Trainees.

The Connecticut Mutual is a 114-year-old company with 500,000 policyholder-members and over four billion dollars of life insurance in force. Aggressive expansion plans provide unusual opportunities for the limited number of men accepted each year.

Arrange with the placement office for an interview with:

'UM Triumph Attributed To Team Effort' - McCall

Last Saturday night after the Maine-UConn encounter, yours truly sauntered back to his brick house to devour with a sweet relish, 75 to 74, the words which were printed in this column last week. Could I have chosen a more appropriate way to be wrong?

Seldom, if ever before in the history of Memorial Gymnasium, has a victorious Maine team been greeted by such a deafening ovation at the conclusion of a ball game. Upon mentioning to Coach McCall a particularly outstanding performance by one of the players, McCall retorted that they had all played well and that the victory could not have been realized without any one of them.

Champion's ballhandling and floor leadership, Chappelle's steady ballplaying and uncanny shooting, Schiner's rebounding, Sturgeon's spectacular second half sixteen-point scoring outburst, Dore's strength at center, and Ingalls' rebounding combined to create a most effective basketball machine and put forth a very great team effort.

UConn coach, Hugh Greer, and the Connecticut ballplayers took the loss like the true champions that they are. However, the Connecticut sports writers maintained that Maine was only lucky and that it would be different story at Storrs this Friday night. In view of the fact that Connecticut fans take their basketball quite seriously and envision Maine as a motley group of backwoodsmen with coonskin caps and muskets, I would say that they (the Connecticut fans) are not particularly happy with the status quo. It's the ultimate in humiliation and disgrace when a Connecticut team bows to Maine. In consideration of this, there will be very much pressure on the Huskies when they face Maine at Storrs this weekend.

No Stein Song?

When talking with Coach McCall the other day, he seemed quite disturbed that the Stein Song is not played after home games that Maine wins. McCall stated that having come from the midwest, he has seldom heard a more inspiring tribute to a school and wished that the students would sing it before the home games and afterward, if Maine should win. The Audio-Visual department is presently working on a tape that will carry the Stein Song. This tape could be played before and after games.

Could have broken record—

Dave Pound, former Stearns high basketball ace, had ample opportunity to break the standing freshman scoring record of 33 points set by Skip Chappelle last year. Instead, Pound, having reached the 32 point mark against MCI Saturday, consistently passed to his teammates rather than take advantage of the opportunity to set a new record. Pound will be invaluable to the varsity next year and should provide McCall's squad with reserve strength.

PLAYER OF THE WEEK: Don Sturgeon, by his spectacular second-half play and his cool deliberateness at the foul line, enabled Maine to defeat Connecticut for the first time in fifteen years. Sturgeon combined with his teammates in a Herculean effort to defeat the favored Huskies, 75 to 74.

UM Ski Team To Compete At Colby Winter Carnival

Colby College will be host Friday and Saturday for the Maine Intercollegiate State Ski Meet and the Colby Winter Carnival. This season, the ski meet will be scored twice, first as the State Ski Meet and second as the Colby Carnival.

Towle will defend his state title. His biggest threats will be his own teammates, Russell and Gatz.

At the Dartmouth Carnival held at Hanover last weekend, the Maine Bears captured fifth place in an eight team race.

Seven teams are entered in the Colby Carnival while the four state colleges will have their top skiers in shape for the State Championship. Events begin on Friday at Sugarloaf Mountain in Kingfield. The Downhill is scheduled at 10 a.m. and the Slalom at 1:30 p.m. Saturday the seven teams will move to Titcomb Ski Slope in Farmington for the Cross Country event and the jumping.

Maine will send eight men to the Carnival and State Meet.

A beautiful Skimeister trophy is being offered this season by the State Officials. Curtis plans to send captain Brett Russell and sophomore Dan Gatz in hopes of bringing the trophy back to Maine.

REWS ANSWER

(At left) Wayne Champeon (15) tallies two points for the Bears as Ed Martin of Uconn guards against him. John Pipscynski (44), the Huskie's big forward, closes in from the left. (At right) The ball is up for grabs as Walt Griffin (40), Jon Ingalls (24), Larry

Schiner (23), and an unidentified Uconn player leap in unison. The Huskies dropped a 75 to 74 decision to Maine in what will probably be one of the most memorable hoop engagements in Maine history.

UM Cagers Seek 15th At Storrs; Rams Prep For Rampaging Bears

By Bill Mortensen

The University of Maine's great basketball team remains unbeaten at the time of this printing. McCall's Marauders, as they so often have been tabbed, again accomplished the unbelievable by defeating the strong University of Connecticut Huskies. The team will have played UNH between the writing of this article and printing, but we feel they will be still undefeated when they head South on Friday. As is the situation with all undefeated teams, the season progresses and the schedule gets tougher, with all opponents aiming at that spotless record.

On Friday the Bears face the University of Connecticut at Storrs in what will again be a strong challenge to the record and prestige. Uconn will have revenge in their eyes as the large university no doubt is still nursing her wounds from Saturday night. And as Coach Hugh Greer of the Huskies was heard to remark to Brian McCall, "We'll be waiting for you."

Saturday night sees the Black Bears invade Kingston, Rhode Island for a game with the University of Rhode Island. At present Rhode Island has a 3-1 conference record. This season Rhode Island has a small team, but are very fast and employ the fast break. Rhode Island has six lettermen returning from the squad that last season split with the Bears. Maine defeated R.I. at Orono last season 94-77, but lost at Kingston 83-78. In past years the teams have met 56 times with Maine defeating

R.I. six times. Three of the six wins have been in the last two seasons so the present trend of victories leans toward Maine.

Maine will play a stronger Rhode Island team this season as there are several lettermen and a strong sophomore group supporting the veterans. Rhode Island plays a schedule that is one of the best in the East and much the same as Uconn's. Some of the opponents besides the annual Yankee Conference foes, are Boston College, Brown, Dartmouth, Fordham, Holy Cross, Providence, Rutgers, and Georgetown.

Ernie Calverley is still head coach at Rhode Island and he has Tom Harrington, Barry Multon, Harry Edmonds, Jack Anderson, Don Brown, and Bill Holland back from last season. Harrington was the team's leading scorer and was top scorer in the Yankee Conference also. Dave Ri-

cereto is the outstanding sophomore addition to the team and he is presently leading the team in scoring, hitting at a 20 point per game clip. Gary Koenig, Ron Stenhouse, Tony Lasal, and Stewart Schachter are the other sophomores who are showing well so far in the season. Rumor has it that three of last year's starters are sitting on the bench, being replaced by sophomores who moved up from a freshman team that had a 16-1 record and defeated the varsity during practice scrimmages.

Both the Uconn and R.I. games should be very interesting and could

very decidedly affect the current Yankee Conference race.

McCall Cagers Tame Wildcats

By Art Zalkan

Skip Chappelle propelled the University of Maine to a 85-60 win over the University of New Hampshire Tuesday evening. The Black Bears in winning their 14th straight game had little difficulty in taming the Wildcats.

Maine jumped off to a 27-17 edge after the first 10 minutes of the game. During the first three minutes, the two teams looked even, as both teams scored three baskets. Jim Green's long set shot put the visiting Wildcats into the lead 8-6. It looked as if the Maine Bears were in for a troublesome night. However, Larry Schiner tied the count at 8-8.

With the score even, Don Sturgeon hit for a one-pointer that gave Maine a lead they never relinquished. Sturgeon followed this performance with another basket and the Maine Bears raced away. The first half ended with Maine leading 43-29.

Maine wasted little time in the second half. They opened a 20 point bulge before New Hampshire could stop the hot Bears. The Wildcats never did... With the Maine team hitting from all angles, the score continued to climb.

When Chappelle wasn't able to drive the scoring attack, Wayne Champeon took over the controls. His unbelievable ability to feed his teammates gave Maine a 21 point lead. When Champeon was covered, Jon Ingalls took command. His control of the boards proved to be a key factor in Maine's win.

New Hampshire was helpless as they watched the Black Bears race up and down the court to score basket after basket. Maine held a 61-42 advantage with the clock showing 10 minutes left.

Once again Maury Dore proved to be a key man as he dropped in two baskets that came at the right moment.

Tuesday evening in another important contest, the University of Connecticut sneaked past Rhode Island 66-62. The Rams now have two losses and three wins. The Huskies have a record of 4-2.

Pound, Robertson Lead Bear Cubs

By Bob Stack

The University of Maine Frosh basketball team picked up its eighth victory last Saturday night with an easy 95-58 verdict over M.C.I. This was an impressive win for their new coach Dick Sturgeon, who recently took over the helm of the frosh.

In an earlier contest this year Maine beat the Huskies 88-85 in an overtime ballgame at Pittsfield.

Dave Pound, the sharp shooting lefty from Stearns, led the frosh with 32 points. Pound came within two points of tying Skip Chappelle's old mark of 34 points in a single contest. "Pud" Robertson hit for 22 points and Ted Leadbetter ended up with a total of 12 points.

The frosh are now averaging 84.7 points per game to their opponents' 60. Dave Pound pushed his average to 18.6 for the season. He is followed closely by "Pud" Robertson 15.7 and Ted Leadbetter 12.1.

Intramural Play

The above is intramural action from a game between Phi Eta Kappa and Sigma Alpha Epsilon. Phi Eta's Bob Chapman hooks one over the head of an SAE defender. Phi Eta won 77 to 29.

Phi Eta, Lambda Chi Top Frat Basketball Leagues

By Stan Allain

Five teams have maintained undefeated records in their respective divisions in the non-fraternity basketball league. Newman, 6-0; Hart 3, 4-0; Dunn 2, 4-0; Gannett 1, 4-0; and Corbett 2 with a 4-0 record are the teams that entered the play-offs.

In the Fraternity league, which is split into two divisions, there are two undefeated teams left. In the American league, Lambda Chi has a 5-0 record, followed closely by Beta with 4 wins and 1 loss. Over in the National league, which appears to be the stronger league, Phi Eta has a 5-0 record to top Phi Mu's 5-1 mark.

The scores of league games played: Alpha Gam, led by Laurie Caldwell, topped TEP, 87 to 32; while Phi Mu beat Phi Kap, 59 to 38. Phi Gam forfeited a game to Beta, and Sigma Nu dropped SAE, 50 to 42. In a very important game, Phi Eta beat Phi Mu, 60 to 49. Delta Tau, behind little Ron Allen, belted Sig Ep, 58 to 40, while Sigma Chi outscored Phi Kap, 47 to 44. Lambda Chi won over ATO, 72 to 48.

NATIONAL LEAGUE

Phi Eta	6-0
Phi Mu	5-1
Sigma Chi	4-2
Sigma Nu	3-3
Phi Kap	3-3
SAE	1-5
TKE	1-5
Theta Chi	1-5

AMERICAN LEAGUE

Lambda Chi	5-0
Beta	4-1
Phi Gam	4-2
ATO	3-3
Delta Tau	3-3
Kappa Sig	3-3
Sig Ep	2-3
TEP	1-4
Alpha Gam	0-6

Preparing early for the novelty Mall events during Winter Carnival Weekend are Betty Lunt, President Lloyd H. Elliott, and Steve Gould. Steve will be the judge of the President's tug-of-war.

WORO Concert Hall 9:00-10:00 p.m.

Feb. 15-19

Monday, Feb. 15—Beethoven, Emperor Concerto

Tuesday, Feb. 16—Handel, Concerti Grossi

Wednesday, Feb. 17—Stravinsky, Capricci

Thursday, Feb. 18—Brahms, Symphony #1 in C minor

Friday, Feb. 19—Rimsky-Korsakov, Scheherazade

The above are the featured works. There will be other works on these shows to fill out the time. This semester WORO will attempt to present the scope of Classical music from Baroque to Modern by pinpointing important composers and their works. Wednesday evening will spotlight 20th century composers.

cut out and save

Father Meyers Speaks

agencies and community centers in the neighborhood and is on the Executive Committee of the Lower East Side Neighborhood Association (LENA). Father Myers is also Chairman of the LENA Youth Committee.

Tickets for the Brotherhood banquet, \$6.00 for students and \$1.50 for non-students, are on sale at the SRA office.

Also included in the plans for Brotherhood Week is a drive for clothing and books, particularly unusable texts, for World University Service to distribute in Algeria and Japan.

12th Annual Debate Tournament Held

The twelfth Annual High School Debate Tournament on the topic, "Resolved: That the Federal Government should substantially increase its regulation of labor unions, will take place Friday and Saturday, February 12 and 13.

More than 25 high schools from Maine, New Hampshire, and Massachusetts will participate. There will be eight rounds of elimination debate during the two days of the tournament.

Plan For Housemother

After nearly 50 years without a housemother, the members of Sigma Nu recently voted to get one sometime this spring. Sigma Nu is the only fraternity on the campus that has never had a housemother.

The University of Maine Black Bears tallied a total of 1,605 points during the 1958-59 basketball season to establish a new record in this department.

NE Conference Held Feb. 19-21

The annual Eastern New England Conference, sponsored by the Student Christian Movement in New England, will be held at the Rolling Ridge Conference Center in North Andover, Massachusetts, from February 19 through February 21, 1960.

This year the Conference Theme is "Do I Make Any Difference?" and the conferees will consider such questions as: "Is there a necessary significance which the Christian faith has for human individuals in the midst of personal and social concerns?"; "Does the individual make any difference in the Church?"

Leaders of the conference include Dr. Clarence Jordan, a founder and the leader of the Koinonia Farm community in Americus, Georgia; a community of Christian persons who have made a significant witness for nearly two decades to problems such as alcoholism, racial and religious prejudice, and agricultural improvement in a small Georgia town. The Rev. William McGinnis will be a Seminar Leader.

Any student may attend and those who are interested in going should see Mr. McGinnis, Dave Robinson, or any M.C.A. Executive. Registration must be completed by February 15th.

IBM Seminar Open to Faculty, Students, Public

The University Committee on Data Processing Equipment will sponsor a seminar on the Use and Application of Digital Computers presented by the IBM personnel at 10:00 a.m. Friday, February 12.

The presentation is one of general education open to faculty, students, and the general public.

Chi O Initiates Girls

Nellie Gushee, a sophomore, and Jane Chapman, a senior, were initiated into Chi Omega sorority Sunday afternoon, February 7.

The date for the initiation of the pledges taken in during rushing this year has been set for March 19.

Debaters Return From Harvard

Two Maine students have returned from the Harvard Invitational Debate Tournament at Cambridge, Massachusetts. The two debaters, Joyce Higgins and Dawn Daly, debated both sides of the issue, Resolved: that Congress should be given the power to reverse decisions of the Supreme Court.

At the tournament 79 colleges and universities from 30 states, the University of Maine team debated Augustana College, Augustana, South Dakota; Dillard College, New Orleans, Louisiana; Morgan State College, Baltimore, Maryland; St. Peter's College, Jersey City, New Jersey; Clark University, Worcester, Massachusetts; University of Rhode Island, Kingston, Rhode Island; U. S. Mer-

chant Marine Academy, Kingspoint, Long Island; City college of New York, New York City.

Final results have not yet been obtained for the tournament.

Riflemen Select Sponsor

Four candidates have been chosen for the title of "honorary sponsor" of company M-12 of the Pershing Rifles. The candidates are: Celine Dumont, Jean Gerry, Sally Grindell, and Sally Kennett. The winner will be announced at a formal dance to be held later this year.
